The Search for HMAS Sydney May 07 2020 In November 1941 HMAS Sydney, the pride of Australia's wartime fleet, and its crew of 645 disappeared without a trace off the Western Australian coast. All that was known was Sydney had come under fire from the German raider HSK Kormoran, which also sank. After numerous unsuccessful searches from the mid 1970s onwards, the Finding Sydney Foundation was set up and in March 2008 one of Australia's greatest maritime mysteries was solved when both wrecks were finally discovered. The Search for HMAS Sydney pieces together the incredible story of Sydney, its crew and the families left behind. It details the innovative and powerful research procedures implemented by the Foundation to locate the wrecks of Sydney and Kormoran, their discovery and the detailed forensic analyses and commemorations that followed.

American Cars, 1946D1959 Jan 03 2020 From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

American Cars, 1960-1972 Sep 22 2021 The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard

equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

Naval Ship Models of World War II in 1/1250 and 1/1200 Scales Jun 19 2021 The origins of 1/1250 and 1/200 scale models can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War. When peace came the manufacturers aimed their increasingly sophisticated products at collectors, and ever since then acquiring, enhancing, modifying or scratch-building miniature ship models has been an avidly pursued hobby around the world. This new book focusses on models of the ships of the Second World War, probably the most popular subject for miniature model collectors, and the author, a well-known modeller himself, addresses all the practical issues that might confront those many collectors who like to enhance, convert, and modify their models, or even scratch-build models of ships not commercially available. The book covers both Allied and Axis warships, naval airplanes, merchant conversions and even an Italian armed schooner, and provides historic and technical information on the ships represented as well as practical advice on modelling them. The latter is extensive with twenty-five chapters covering everything from initial production techniques such as spin casting, silicon mould casting, resin casting, die-casting, plastic mould injection, and 3D printing through techniques for enhancing and modifying models to eventually researching and scratch-building an uncommon ship or type. The focus is always on particular vessels and the vast array covered by the author builds into a fascinating panorama of the vessels that fought across the world's oceans in that era. The combination of intriguing background and historical information, combined with detailed practical information and more than 300 stunning photographs will make this book irresistible to any collector or modeller and, indeed, to anyone with an interest in the navies of the Second World War.

Cost Conscious Cruiser Dec 26 2021 The pleasures and adventures of cruising under sail are amazingly affordable, say Lin and Larry Pardey. But to keep your dream on budget, you have to decide: Are you a cruiser or a consumer? In this book, a logical successor to their Self-Sufficient Sailor and Capable Cruiser, they discuss making your getaway plans, finding a truly affordable boat, keeping your outfitting costs and maintenance time under control, and learning to feel confident as you cruise farther afield. Their comparison of the gear considered necessary by many yachting experts and the gear carried by several cost-conscious cruisers will help you gauge whether you are buying the true necessities or overloading your boat with high-tech items that can break down and steal your sense of confidence offshore. The chapters on getting the most from your cruising funds, the attributes of successful long-term voyagers, how to upgrade your boat with your own hands, plus answers to the then questions most frequently asked by potential cruisers will help you prepare to explore under sail. as Lin and Larry explain, "The decisions you make now will determine if you'll come back from your cruise feeling more empowered or more enslaved by today's consumer society."

The Battlecruiser HMS HOOD Jul 09 2020 The battlecruiser HMS Hood is one of the great warships of history. Unmatched for beauty, unequalled for size, for twenty years the Hood was the glory ship of the Royal Navy, flying the flag across the world in the twilight years of the British Empire. Here, in words, photos and colour illustrations, is the story of her life, her work and her people from keel-laying on the Clyde in 1916 to destruction at the hands of the Bismarck in 1941. Among the eye-catching strengths of the book is a unique gallery of photos, including stills from a recently discovered piece of colour footage of the ship, plus a spectacular set of computer-generated images of both the exterior and interior by the world's leading exponent of the art - a man who worked with the film director James Cameron (of Titanic fame). A wealth of new information on Hood's structure and operation make it essential reading for the enthusiast, modeller and historian alike. Hugely successful from its first publication, this is the third printing of the ultimate book on the ultimate ship of the pre-war era.

Lemon-Aid New Cars and Trucks 2011 Aug 29 2019 As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, fess up."
