Management of Agricultural Inputs Jun 29 2022 Environment, problems and policies attempts to rectify the lacunae of an absence of any comprehensive book on "Management of Agricultural Inputs". This is despite the fact that three-fourth of India's population is rural whose main occupation and profession is agriculture and allied activities. In the present context of economy and situation, it is a challenge for the agriculturists/ farmers to continue with their profession. This book provides an in-depth analysis of the environment, the problems associated with agri-inputs management and marketing. The book elaborately covers market information on agri-inputs and government policies to support the farming community. This book offers an interesting reading for academicians, students, agripreneurs and agri-input manufacturers to know about the vibrant dynamics of agri-input market in India.

**Oily Hands and the Smell of Diesel** Mar 27 2022 1960 saw the dawn of an era of unprecedented innovation and development in farm machinery. It was a period of rapid technical advancement, that produced machines which are the mainstay of the current very buoyant vintage tractor restoration movement. At the start of the decade, spark-ignition Standard Fordson tractors still occasionally required repair; by the end of the decade, the Fordson Diesel Major had been replaced by the Ford 1000 series. The history of these iconic brands is well-known; *Oily Hands and the Smell of Diesel* gives an alternative view-the inside story of the agricultural machinery repair trade. Author David Harris gives an

entertaining, informative, and personal account of his time spent at a Ford main tractor dealership, working on Ford, Fordson, County, Roadless and Muirhill tractors, Chaseside loaders, Claas combines, and New Holland and Jones balers, amongst others. David describes the technical challenges in detail, and tells of the ups and downs of life in the workshop and out in the field. Well-written and with many historical photographs, this book will be a must-read for anyone who is or was involved in the machinery industry, anyone looking to restore or repair vintage agricultural machinery, and anyone with a general interest in farming and machinery history. David Harris is a frequent contributor to *Tractor & Machinery* and other magazines. [Subject: Transportation, Tractors, Farm Vehicles]

Market imperfections for tractor service provision in Nigeria Nov 22 2021 In Nigeria, despite the scarcity of tractors, average horsepower and prices of tractors appear high. These patterns are different from the experiences in other parts of the world where initially tractor horsepower was often smaller, such as Asia, or farmers were better endowed with land and wealth, such as Latin America. In Nigeria, joint ownership of tractors is rare, and formal loans are often unavailable due to high transactions costs. IFPRI's survey in Kaduna and Nasarawa states in 2013 suggested that the spatial mobility of tractors is generally low and the use of tractors is highly seasonal. There do not seem to be plausible explanations for the seeming dominance of large tractor use based on available information on prices and soils. Nevertheless, these patterns seem driven by the own initiative of the private sector rather than by government policies. Indivisibility of large tractors and limited mobility of supplies may cause imperfections in the custom tractor hiring market. In order to distinguish the impacts of technology adoption at the extensive margin from those at the intensive margin, in the empirical analyses for the research presented here we tested these hypotheses focusing on the differences among marginal adopters of tractor hiring services and non-adopters with similar characteristics. The results are three-fold: (1) adoptions patterns of

tractor services are partly explained by basic factor endowments, suggesting that the market for custom hiring is in some way functioning efficiently in response to economic conditions; (2) adoptions are, however, affected by supply-side factors, including the presence of large farm households (and thus potential tractor owners) within the district, and (3) per capita household expenditure level differs significantly between the marginal adopters and non-adopters with similar characteristics. This difference seems to arise from adoption per se, rather than the intensity of adoption, which is consistent with the hypothesis of imperfection in the custom tractor hiring market.

*Is access to tractor service a binding constraint for Nepali Terai farmers?* Sep 20 2021

Using results from the three rounds of Nepal Living Standard Surveys (conducted in 1995, 2003, and 2010), this study empirically assesses whether access to rented tractors or custom hiring services is a binding constraint on the income growth of farm households in Nepal. Because four-wheel tractors of medium horsepower are still the primary suppliers of these tractor services, access to these services can be restricted. First, we investigated the determinants of the adoption of hired tractors as well as the intensity of their use (measured by real annual expenditures on renting tractors). Results suggest that the adoption and the intensity patterns are generally consistent with the conventional theory of the demand for agricultural mechanization, indicating that the supply of these services may be relatively efficient in meeting the demand. However, adoption is still affected by the presence of tractor owners within the same village district committee, indicating that the proximity to tractor service providers may still partly determine accessibility. This second point was more formally tested using matching estimators within the Terai region of Nepal. It was found that, on average, the supply of tractor services might have evolved to a relatively efficient level in the Terai so that those who benefited from renting in tractors generally had access to such services. However, for at least certain segments of farm households in the Terai, insufficient access to tractor services was still a binding constraint on the growth of farm household incomes. The policy implications of these findings are briefly discussed in the last section.

*Ford Tractor 1320, 1520, 1620, 1715 & 1720 Repair Manual* Aug 27 2019 This Ford Tractor 1320, 1520, 1620, 1715 & 1720 Repair Manual is a high-quality, licensed PRINT reproduction of the service manual authored by Ford New Holland, Inc and published by Detroit Iron. This OEM factory manual is 8.5 x 11 inches, paperback bound, shrink-wrapped and contains 564 pages of comprehensive mechanical instructions with detailed diagrams, photos and specifications for the mechanical components of your vehicle such as the engine, transmission, suspension, brakes, fuel, exhaust, steering, electrical and drive line. Service / repair manuals were originally written by the automotive manufacturer to be used by their dealership mechanics. The following 1987-2000 Ford models are covered: 1320, 1520, 1620, 1715, 1720. This factory written Detroit Iron shop manual is perfect for the restorer or anyone working on one of these vehicles.
