Self-consciousness and "split" Brains Jun 27 2022 Elizabeth Schechter explores the implications of the experience of people who have had the pathway between the two hemispheres of their brain severed, and argues that there are in fact two minds, subjects of experience, and intentional agents inside each split-brain human being: right and left. But each split-brain subject is still one of us.--

19-21, 2013. The conference series was initiated at Tsinghua

University in 1991 and has since become the premier

international HVAC conference initiated in China, playing a

significant part in the development of HVAC and indoor

environmental research and industry around the world. This

international conference provided an exclusive opportunity for

policy-makers, designers, researchers, engineers and managers

to share their experience. Considering the recent attention on

building energy consumption and indoor environments,

ISHVAC2013 provided a global platform for discussing recent

research on and developments in different aspects of HVAC

consumption, energy efficiency and indoor environments. These

categories span a broad range of topics, and the proceedings

provide readers with a good general overview of recent advances

in different aspects of HVAC systems and related research. As

such, they offer a unique resource for further research and a

valuable source of information for those interested in the subject.

The proceedings are intended for researchers, engineers and

graduate students in the fields of Heating, Ventilation and Air

What would modern war be like if the front-line foot soldiers were not our sons and daughters, but genetically engineered animals with superhuman strength and speed, and just enough intelligence to understand commands and follow them blindly? This is exactly the weapon being developed at a base in the desert by a top-secret government agency.

Attorney Herman Strockmire, a ruffled man with a very big but defective heart, champion of lost legal causes and the infuriating nemesis of giant corporate polluters, becomes involved when one of his employees is literally torn limb from limb by one of the experimental prototypes. When Pete and Maggie Adams get off the school bus upset about
a classmate, Grandpa does the only thing he knows to do: he tells
them a story one of God's stories, at that! Join the Adams children
as they hear the parable of Tom the unhappy sheep and all of the
dangerous adventures he finds himself on when he wanders into
the forest, away from the shepherd, one Friday afternoon. Along
the way, you will encounter joke-telling cardinals, well-spoken
owls, fun-loving rabbits, a smooth-talking snake, one very angry
bear, and many more of the forest's wild creatures. At the end of
the path, though, Pete and Maggie must watch Tom make a very
important choice a choice we all must make at one time or
another: life or death. For the Adams children, things will never
be the same.
