*The Oxford Handbook of Archaeology* May 19 2021 This handbook provides an authoritative guide to the full range of archaeological activities past and present. It will give the reader a sense of the history of the subject and of the main theoretical debates, as well as a taste of the excitement generated by archeological exploration.

**Severe Asthma** Sep 22 2021 Severe asthma is a form of asthma that responds poorly to currently available medication, and its patients represent those with greatest unmet needs. In the last 10 years, substantial progress has been made in terms of understanding some of the mechanisms that drive severe asthma; there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma – epidemiology, diagnosis, mechanisms, treatment and management – but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various ‘omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.

**World Development Indicators 2015** Nov 12 2020 World Development Indicators 2015 World Development Indicators 2015 provides a compilation of relevant, highquality, and internationally comparable statistics about global development and the fight against poverty. It is intended to help policymakers, students, analysts, professors, program managers, and citizens find and use data related to all aspects of development, including those that help monitor progress toward the World Bank Group’s two goals of ending poverty and promoting shared prosperity. Six themes are used to organize indicators—world view, people, environment, economy, states and markets, and global links. As in past editions, World Development Indicators reviews global progress toward the Millennium Development Goals (MDGs) and provides key indicators related to poverty. WDI 2015 includes: \* A selection of the most popular indicators across 214 economies and 14 country groups organized into six WDI themes \* Thematic and regional highlights, providing an overview of global development trends \* An in-depth review of the progress made toward achieving the Millennium Development Goals \* A user guide describing resources available online and on mobile apps A complementary online data analysis tool is available this year to allow readers to further investigate global, regional, and country progress on the MDGs:

data.worldbank.org/mdgs. Each of the remaining sections includes an introduction; six stories highlighting specific global, regional or country trends; and a table of the most relevant and popular indicators for that theme, together with a discussion of indicator compilation methodology. WDI DataFinder Mobile App Download the WDI DataFinder Mobile App and other Data Apps at data.worldbank.org/apps. WDI DataFinder is a mobile app for browsing the current WDI database on smartphones and tablets, using iOS, Android, and Blackberry, available in four languages: English, French, Spanish, and Chinese. Use the app to: \* browse data using the structure of the WDI \* visually compare countries and indicators \* create, edit, and save customized tables, charts, and maps \* share what you create on Twitter, Facebook, and via email

*Gout & Other Crystal Arthropathies E-Book* Dec 14 2020 Gout and Other Crystal Arthropathies, by Dr. Robert Terkeltaub, presents the state-of-the-art, clinically-focused coverage you need to manage these increasingly prevalent diseases. Diagnose the full range of crystal arthropathies—including pseudogout, intercritical gout, hyperuricemia, and gouty arthritis—and treat your patients effectively with discussions of recently-approved drugs like Uloric and those currently under review, such as Kristexxa and Colcryst. With coverage of the latest therapies, preventions, and imaging studies, along with access to the fully searchable text online at www.expertconsult.com, this comprehensive resource is ideal for any physician who diagnoses, treats, and manages gout and crystal-induced arthropathies. Stay current on recent developments such as uricosuric therapy and inhibitor therapy; gout flare prophylaxis and colchicines; ultrasound in the diagnosis of crystal deposition diseases; imaging of gout, CPPD, and hydroxyapatite deposition diseases; and uricase therapy of gout. Manage the full range of crystal arthropathies with 25 clinically-focused chapters on pseudogout, intercritical gout, hyperuricemia, gouty arthritis, and more. Treat your patients effectively using the latest information on drug treatments, from the recently-approved Uloric to Kristexx and Colcryst, which are still under review.

**Machine Vision and Augmented Intelligence—Theory and Applications** Sep 10 2020 This book comprises the proceedings of the International Conference on Machine Vision and Augmented Intelligence (MAI 2021) held at IIIT, Jabalpur, in February 2021. The conference proceedings encapsulate the best deliberations held during the conference. The diversity of participants in the event from academia, industry, and research reflects in the articles appearing in the volume. The book theme encompasses all industrial and non-industrial applications in which a combination of hardware and software provides operational guidance to devices in the execution of their functions based on the capture and processing of images. This book covers a wide range of topics such as modeling of disease transformation, epidemic forecast, COVID-19, image processing and computer vision, augmented intelligence, soft computing, deep learning, image reconstruction, artificial intelligence in healthcare, brain-computer interface, cybersecurity, and social network analysis, natural language processing, etc.

**Social Protection in Africa** Sep 03 2022 This timely book makes accessible to a broad audience the ideas, principles and practicalities of establishing effective social protection in Africa. It focuses on the major shift in strategy for tackling hunger and vulnerability, from emergency responses mainly in the form of food transfers to predictable cash transfers to the chronically poorest social groups. The first part of the book comprises nine theme chapters, covering vulnerability, targeting, delivery, coordination, cost-effectiveness, market impacts, and asset effects, while the second part consists of fifteen social protection case studies. The continuous interplay between these two parts makes for a unique contribution to the contemporary literature on social protection. The book takes a positive and forward looking view regarding the feasibility of achieving successful social transfers to the poorest in Africa; nevertheless, a critical stance is taken where appropriate, and unresolved strategic issues regarding the targeting, coverage and scale of social transfers are highlighted. Social Protection in Africa is an essential read for personnel, advisors and consultants working for aid donors, United Nations agencies, NGOs and governments on social transfer programmes in sub-Saharan African countries. In addition, the book represents a valuable resource for training courses on social protection, and will be vital reading for Masters level students and researchers studying emergency relief, social protection, vulnerability and poverty reduction in low-income countries.

**The Structure and Practices of the Debt Buying Industry** Dec 26 2021 In a 2009 study of the debt collection industry, the Commission concluded that the “most significant change in the debt collection business in recent years has been the advent and growth of debt buying.” “Debt buying” refers to the sale of debt by creditors or other debt owners to buyers that then attempt to collect the debt or sell it to other buyers. Debt buying can reduce the losses that creditors incur in providing credit, thereby allowing creditors to provide more credit at lower prices. Debt buying, however, also may raise significant consumer protection concerns. The FTC receives more consumer complaints about debt collectors, including debt buyers, than about any other single industry. Many of these complaints appear to have their origins in the quantity and quality of information that collectors have about debts. In its 2009 study, the Commission expressed concern that debt collectors, including debt buyers, may have insufficient or inaccurate information when they collect on debts, which may result in collectors seeking to recover from the wrong consumer or recover the wrong amount. The FTC initiated this debt buyer study in late 2009 for two main purposes. First, the FTC sought to obtain a better understanding of the debt buying market and the process of buying and selling debt. Second, the Commission wanted to explore the nature and extent of the relationship, if any, between the practice of debt buying and the types of information problems that the FTC has found can occur when debt collectors seek to recover and verify

debts. Many stakeholders recognize the concerns that have been raised about debt buying, including consumer groups, members of Congress, federal and state regulatory and enforcement agencies, and the debt buyer industry itself. Indeed, the debt buyer industry has launched a self-regulatory effort to address some of these concerns, and the FTC is encouraged by that effort. This study of debt buyers is the first large-scale empirical assessment of the debt buying sector of the collection industry. The FTC hopes that its findings contribute to a greater understanding of debt buying, enhance ongoing reform efforts, and prompt further study of the industry. To conduct its study, the Commission obtained information about debts and debt buying practices from nine of the largest debt buyers that collectively bought 76.1% of the debt sold in 2008, with six of these debt buyers providing the information the Commission used in most of its analysis. The FTC also considered its prior enforcement and policy work related to debt collection, as well as available research concerning debt buying. The study focused on large debt buyers because they account for most of the debt purchased; it did not address the practices of smaller debt buyers that are a frequent source of consumer protection concerns, a limitation that must be considered in evaluating the study's findings. The Commission acquired and analyzed an unprecedented amount of data from the studied debt buyers, which submitted data on more than 5,000 portfolios, containing nearly 90 million consumer accounts, purchased during the three-year study period. These accounts had a face value of \$143 billion, and the debt buyers spent nearly \$6.5 billion to acquire them. Most portfolios for which debt buyers submitted data were credit card debt, with such debt accounting for 62% of all portfolios and 71% of the total amount that the buyers spent to acquire debts. In addition to these data, the debt buyers provided copies of many purchase and sale agreements between themselves and sellers of debts. The debt buyers also submitted narrative responses to questions concerning their companies and their practices, as well as the debt buying industry. The key findings of the study are as follows:

*Digital Audio Broadcasting* Feb 02 2020 Now the standardisation work of DAB (Digital Audio Broadcasting) system is finished many broadcast organisations, network providers and receiver manufacturers in European countries and outside of Europe (for example Canada and the Far East) will be installing DAB broadcast services as pilot projects or public services. In addition some value added services (data and video services) are under development or have already started as pilot projects. The new digital broadcast system DAB distinguishes itself from existing conventional broadcast systems, and the various new international standards and related documents (from ITU-R, ISO/IEC, ETSI, EBU, EUREKA147, and others) are not readily available and are difficult to read for users. Therefore it is essential that a well structured technical handbook should be available. The Second Edition of Digital Audio Broadcasting has been fully updated with new sections and chapters added to reflect all the latest developments and advances. Digital Audio Broadcasting: Provides a fully updated comprehensive overview of DAB Covers international standards, applications and other technical issues Combines the expertise of leading researchers in the field of DAB Now covers such new areas as: IP-Tunneling via DAB; Electronic Programme Guide for DAB; and Metadata A comprehensive overview of DAB specifically written for planning and system engineers, developers for professional and domestic equipment manufacturers, service providers, as well as postgraduate students and lecturers in communication technology.

*Wooden Eyes* Aug 10 2020 "I am a Jew who was born and who grew up in a Catholic country; I never had a religious education; my Jewish identity is in large measure the result of persecution." This brief autobiographical statement is a key to understanding Carlo Ginzberg's interest in the topic of his latest book: distance. In nine linked essays, he addresses the question "what is the exact distance that permits us to see things as they are?" To understand our world, suggests Ginzburg, it is necessary to find a balance between being so close to the object that our vision is warped by familiarity or so far from it that the distance becomes distorting. Opening with a reflection on the sense of feeling astray, of familiarization and defamiliarization, the author goes on to consider the concepts of perspective, representation, imagery, and myth. Arising from the theme of proximity is the recurring issue of the opposition between Jews and Christians - a topic Ginzberg explores with an array of examples, from Latin translations to Greek and Hebrew scriptures to Pope John Paul II's recent apology to the Jews for anti-Semitism. Moving with equal acuity from Aristotle to Voltaire, touching on philosophy, history, philology and ethics, and including examples from present-day popular culture, *Wooden Eyes* offers a new perspective on the universally relevant theme of distance. [from book jacket].

*Radiological Sciences Dictionary: Keywords, names and definitions* Aug 29 2019 The Radiological Sciences Dictionary is a rapid reference guide for all hospital staff employed in diagnostic imaging, providing definitions of over 3000 keywords as applied to the technology of diagnostic radiology. Written in a concise and easy to digest form, the dictionary covers a wide variety of subject matter, including: · radiation legislation and measurement · computing and digital imaging terminology · nuclear medicine radionuclides and radiopharmaceuticals · radiographic contrast agents (x-ray, MRI and ultrasound) · definitions used in ultrasound and MRI technology · statistical expressions and general scientific terms relevant to radiology. Keywords are linked so that a particular topic can be followed by reference to all relevant keywords. In many instances, keywords are further defined by showing worked examples. Additional useful entries to the dictionary include historical reference to notable persons who have contributed to diagnostic imaging, as well as web page contacts for relevant worldwide organisations. The Radiological Sciences Dictionary is an invaluable reference for anyone training or qualified in diagnostic imaging, including radiologists, radiographers, physicists and technicians
