Library Users and Reference Services Oct 15 2021 This useful book helps reference librarians understand the information seeking needs and behaviors of the diverse groups of people in the communities they serve. With the increasing diversity of the American population, librarians striving to plan and deliver excellent reference services must enhance their understanding of how best to assist many types of individuals and groups, from children to the elderly. Library Users and Reference Services provides much-needed help in this area, delivering strategies and methods to aid readers in their quest for increasingly effective service for all members of the communities in which they work. Library Users and Reference Services is divided into four sections of chapters which cover a broad range of topics to assist readers in planning and delivering appropriate services. Section One explores customer service, economics of information, and marketing as key concepts useful in studying information needs of specific groups in the population. Section Two focuses on scholars and students in three broad academic disciplines: science, humanities, and social sciences. Section Three covers groups with special characteristics such as age, economic standing, gender, or profession. Section Four discusses evaluation and provides guidance in the use of the most widely accepted measures for assessing reference effectiveness. The book's final chapter explores redesigning reference services for the future, providing a glimpse of how such services may change. Library Users and Reference Services is a practical guide to help readers understand the many issues related to serving diverse populations in a community. Reference librarians and graduate library school students and faculty will learn more effective ways to help a heterogeneous public with the help of this new book.

Repair Work Ethnographies Jan 18 2022 This pioneering book homes in on repair as an everyday practice. Bringing together exemplary ethnographies of repair work around the world, it examines the politics of repair, its work settings and intricate networks, in and across a wide range of situations, lay and professional. The book evidences the topical relevance of situated inquiry into breakdown, repair, and maintenance for engaging with the contemporary world more broadly. Airplanes and artworks, bicycles and buildings, cars and computers, medical devices and mobile phones, as virtually any commodity, infrastructure or technical artifact, have in common their occasional breakdown, if not inbuilt obsolescence. Hence the point and purpose of closely examining how and when they are fixed.

The Society of Text Feb 19 2022 This collection of essays continues Barrett's investigations into implementingnetworked online systems described in his first book Text, ConText, and HyperText, with a morefocused emphasis on specific hypermedia systems. In four parts the 22 essays take up designinghypertext and hypermedia systems for the online user; textual intervention and collaboration; newroles for writers; and sensemaking and learning in the online environment.In his introduction,Barrett analyzes the design of networked online systems as part of a collaborative process,asserting that the online environment fosters collaboration by using computer technology to supportinteraction among those who design, use, and write software.The first five essays present agenealogy of hypertext development, assess various hypertext designs, discuss users' wants andneeds, and analyze the "rhetoric" of hypertext applications in light of new models for computerhuman interaction. Seven essays then take up new, important online systems for informationretrieval, document production, and training in the online environment. Included are a first timefull scale analysis of the Athena Muse hypermedia system developed at MIT, the hypertext environmentIntermedia, developed at Brown, the University of Maryland's Hyperties, and the Educational OnlineSystem for document production and training technical writers, now in its second year of use atMIT.New roles for writers and productivity gains provided by online environments are the subject ofthe next six essays. The final four essays discuss instructional efficiency and the failures ofinstructional materials. Novel proposals are described for addressing the needs and strategies oflearners, for supporting cooperative work in creating, revising, and testing a software program, forevaluating online help systems, and for eliminating ambiguity in online text.Edward Barrett isLecturer in the Writing Program at MIT. The Society of Text is included in the Information Systemsseries, edited by Michael Lesk.

Building a Special with Ant Anstead Master Mechanic Dec 17 2021 Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a

finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

Evolution of Supply Chain Management Feb 07 2021 In the last half of the twentieth century industry encountered a revolutionary change brought about by the harnessed power of seemingly ever-increasing capacity, speed and functionality of computers and microprocessors. This strength provided management and workers within industries with new capabilities for management, planning and control, design, quality assurance and customer support. Organized information flow became the mainstay of industrial companies. New tools and information technology systems emerged and evolved to enable companies to integrate the various departments (Design, Procurement, Manufacturing, Sales and Finance) within companies, particularly the lager ones, including international corporations. This was to give them a chance to meet new demands for product time to market, just in time supply of orders, and customer support. To the smaller company these changes were not so apparent. Neither the tools nor systems nor indeed their economic value seemed appropriate to them except for special cases. While all this was happening the structure of the larger companies began to disintegrate. Strong competitive pressures and globalization of the market place brought this about. Shedding unwanted competence and subcontracting it to others became common practice. Regional market pressures triggered companies to reorganize to create, produce, and distribute goods and services. Greater dependency on chains of supply from external companies became the norm. Medium and smaller sized companies began to gain some advantage and at the same time some were sucked into management and control systems governed by the larger companies.

Shock of the New Mar 28 2020 Find the Leading Edge in a Disrupted World. Planning our response to disruption seems impossible. Most new and emerging technologies have been in development for decades, but as soon as they land on our doorstep, they inspire "the shock of the new." How do you, as a learning professional, prepare for what you don't know is coming? How do you judge what is important and what is just a fad? In Shock of the New: The Challenge and Promise of Emerging Learning Technologies, Chad Udell and Gary Woodill create a new framework for anticipating emerging learning technologies, outlining six key perspectives you should consider with any new technology. They examine some of the day's most commonly discussed emerging technologies and pose the questions that will point the way to your own strategy. These insights aren't limited to specific applications; they give you an approach you can apply to any new tech coming your way, so you're always braced for the shock of the new. Udell and Woodill optimistically point out that emerging technologies will help us make sense of our increasingly complex world; many more changes will occur over the next decade, so buckle up! What was once science fiction has just become real—and now is your opportunity to be on the leading edge.
