Fundamentals of Financial Accounting Dec 11 2020 "Fundamentals of Financial Accounting responds by using carefully chosen focus companies that students recognize and engage with in their everyday lives. From tech start-ups to some of the world's most familiar trademark brands, each chapter opens with an engaging scenario or story using a familiar company. The same focus company, such as Walmart, Cedar Fair, American Eagle, National Beverage, Under Armour, or General Mills, is used throughout the entire chapter so that students can see how the concepts and calculations apply to a real-world company they are already familiar with"--

Transaction Accounting Oct 01 2022 This book has been devised to enable students to attain knowledge and understanding in carrying out cash and credit transactions in accounting. It has been structured into a number of parts to enable students to undertake a particular topic to meet their specific needs. Whilst the book centres on the two main topics of Recording and Accounting for Cash and Credit Transactions, other topics, such as Introduction to double entry have been included, since competence is needed in the double entry system of book-keeping when undertaking accounting transactions. Each chapter in the book includes 'Student Activities' to enable students to assess their progress. Practice assessments have been devised to simulate the AAT Central Assessments and the ACCA Multi-choice assessments. These are designed for the student to gain a valuable indication as to their competence and readiness for undertaking either the AAT or ACCA assessments. Transaction Accounting for NVQ Level 2 is suitable for students studying the following courses: the Lead Body for Accounting NVQ Level 2, AAT Foundation NVQ Level 2, AAT Diploma in Accounting (for non-UK students), ACCA Accounting Technician Certificate and Edexcel Accounting at NVQ Level 2. It is also ideal for other accounting courses where a basic book-keeping knowledge and understanding is required.

Summary of Tycho Press's Accounting for Small Business Owners Apr 14 2021 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The most important concept in accounting is the accounting equation, which is made up of the following four elements: assets, liabilities, expenses, and equity. You will need to understand these elements to understand how to categorize your assets, expenses, and liabilities. #2 The two sides of the accounting equation are always equal to each other. For every transaction that affects one side of the equation, there is a corresponding change on the other side. All transactions are either debits or credits. #3 A chart of accounts is a list of all the accounts you will be using in your bookkeeping. It determines how you record your business transactions and is the basis of all your important financial statements. #4 The accounting equation is identical to the balance sheet. At the end of every month, an accounting procedure is done that closes out all revenue and expense accounts into the owner's equity account.

Financial Analysis of Mergers and Acquisitions Jun 28 2022 Mergers and acquisitions (M&As) reshape the corporate landscape helping companies expand market share and gain a strategic advantage. The ability to understand and analyze these transactions is a crucial skill. The first step in acquiring that skill is being able to gather and analyse information on M&As from public sources, such as financial statements. This textbook helps its readers better analyze M&A transactions using information provided in financial statements. Covering accounting and reporting of consolidations, goodwill, non-controlling interests, step acquisitions, spin-offs, equity carve-outs, joint ventures, leveraged buyouts, disposal of subsidiaries, special purpose entities, and taxes, it focuses on the link between underlying economic events and the information in financial statements and how this link affects the assessment of corporate performance. The first part of the book provides description of the accounting rules governing M&A transactions, while the second part includes cases of M&A transactions. Each case focuses on a different element of an M&A transaction, and it is followed by a detailed solution with a complete analysis. Unlike other books in this field, this textbook focuses exclusively on accounting and financial analysis for graduate and upper undergraduate level courses in financial analysis, corporate finance, and financial accounting.

M&A Disputes Jun 04 2020 Navigate M&A accounting arbitrations with insider perspective

M&A Disputes takes you inside the dispute resolution process to help you put together the many "moving parts" necessary to obtain a successful outcome. With deep insight from experts in the field—including valuable advice from the arbitrator's perspective—this book guides you through the entire process to explore the variables at work. The high volume of M&A transactions makes post-closing price adjustment provisions and accounting arbitrations a critical part of doing business. Yet, the field is opaque to non-practitioners and important issues can be easily misunderstood without specific knowledge and experience. A resulting award can make or break a transaction; an intimate understanding of the process's inner working can help you plan your position to the greatest advantage. This book explores the many factors that contribute to a successful resolution across the entire transaction life cycle from contract negotiation through the dispute phase including due diligence, determination of the target net working capital, conception and closing of the purchase agreement, post-closing negotiation and dispute resolution, the impact of accounting practices, guidance, and documentation as well as relevant auditing concepts, and various facts and circumstances surrounding the target business and the transaction that need to be considered. M&A volume remains high and continues to result in large numbers of current and future post-closing M&A disputes. Clients rely on their attorneys and advisers to guide them through the process and counsel them toward a positive outcome. Those professionals will find that M&A accounting arbitrations carry a range of distinctions that require a specialized knowledge base to navigate correctly. This book provides real-world guidance from experts in the field, with invaluable insight for every stage of the process. Walk through the entire dispute resolution process from arbitrator selection through final award Understand how M&A agreement provisions impact the awarded amount as well as the options available to limit the scope of potential disputes and the "gaming" of the post-closing process by the counterparty Understand the nature of accounting estimates and guidance, their interaction with accounting arbitrations, and how to synthesize facts, circumstances, and GAAP into a persuasive argument to present to the accounting arbitrator Get situation-specific advice for different types of transactions Learn practitioner "dos" and "don'ts" from the arbitrator's perspective M&A Disputes provides transaction parties and their representatives an inside view at the transaction and commonly disputed items through the eyes of the arbitrator to provide them with uniquely valuable insight. In addition to being an invaluable tool for practitioners appearing before an accounting arbitrator, M&A Disputes also provides advice to would-be and experienced arbitrators alike to successfully resolve disputes that can be significant and complex.
