[The Puritan Culture of America's Military](#) May 11 2021 This book explores Puritanism and its continuing influence on U.S. and military law in the Global War on Terror, exploring connections between Puritanism and notions of responsibility in relation to military crimes, superstitious practices within the military, and urges for revenge. Engaging with the work of figures such as Durkheim, Fauconnet and Weber, it draws on primary data gathered through participation and observation at the U.S. Army courts-martial following events at Abu Ghraib, Operation Iron Triangle, the Baghdad canal killings and a war crimes case in Afghanistan, to show how Puritan cultural habits color and shape both American military actions and the ways in which these actions are perceived by the American public. A theoretically sophisticated examination of the cultural tendencies that shape military conduct and justice in the context of a contemporary global conflict, *The Puritan Culture of America's Military* will appeal to scholars across the social sciences with interests in social theory and sociology, cultural studies, politics and international relations and military studies.

[Policy Patrons](#) Jul 01 2020 *Policy Patrons* offers a rare behind-the-scenes view of decision making inside four influential education philanthropies: the Ford Foundation, the W. K. Kellogg Foundation, the Bill & Melinda Gates Foundation, and the Eli and Edythe Broad Foundation. The outcome is an intriguing, thought-provoking look at the impact of current philanthropic efforts on education. Over a period of several years, Megan E. Tompkins-Stange gained the trust of key players and outside observers of these four organizations. Through a series of confidential interviews, she began to explore the values, ideas, and beliefs that inform these foundations' strategies and practices. The picture that emerges reveals important differences in the strategies and values of the more established foundations vis-à-vis the newer, more activist foundations—differences that have a significant impact on education policy and practice, and have important implications for democratic decision making. In recent years, the philanthropic sector has played an increasing role in championing and financing education reform. *Policy Patrons* makes an original and invaluable contribution to contemporary discussions about the appropriate role of foundations in public policy and the future direction of education reform.

[School](#) Jun 24 2022 This book encourages readers to think about and discuss the purpose of education. It provides an opportunity to consider how the way in which purposes are framed has consequences for student-teacher relationships and teacher-administrator relationships. The author introduces a moral/ethical dimension into the consideration of purposes—Why would anyone do that to kids? This book suggests that failure to reflect on the purpose of education underlies the lack of impact of many education reform efforts. The author presents a fictional roundtable discussion of educational issues. The participants include teachers, school administrators, state politicians and bureaucrats, parents, community members, and business people.

["You Can't Fire the Bad Ones!"](#) May 23 2022 Overturns common misconceptions about charter schools, school "choice," standardized tests, common core curriculum, and teacher evaluations. Three distinguished educators, scholars, and activists flip the script on many enduring and popular myths about teachers, teachers' unions, and education that permeate our culture. By unpacking these myths, and underscoring the necessity of strong and vital public schools as a common good, the authors challenge readers--whether parents, community members, policy makers, union activists, or educators themselves--to rethink their assumptions.

Coaching Teacher-Writers Oct 04 2020 When teachers write, good things can happen; writing helps educators to better understand themselves, as well as students, parents, and colleagues. This practical book illustrates how to encourage, lead, and sustain teacher-writers, especially in group contexts. In contrast to guides on writing and teacher research, this book is designed for those who support teacher-writers, such as teacher educators and literacy coaches. The authors offer descriptions of key practices they have developed over years of coaching, teaching, and collaborating with K–12 teachers who write about classroom instruction, teacher research, or advocacy for better policy and pedagogy. Knowing firsthand just how hard writing can be for teachers, they provide a repertoire of strategies to elicit writing, to support teachers as they write, to find audiences for the teachers’ work, and much more. This book offers clear guidance to coach teacher-writers to: Choose topics and shape ideas. Conquer insecurities and draw from their strengths. Establish authority with their audience. Navigate publishing, including choosing venues and working with editors. Find time and space to write and create the habits of writing daily. Respond to audience reaction to their writing. Reflect on their teaching and writing. Develop a voice and vision as a professional. “Understanding writing is a lifelong journey. This book is an indispensable guide to beginning that journey yourself and together with colleagues.” —Elyse Eidman-Aadahl, executive director, National Writing Project “Gives advice on how I can become a better collaborator, facilitator, and cocreator who helps teachers celebrate the power (and joy) that writing can give them.” —Cathy Fleischer, professor, Eastern Michigan University “The authors know how to support teachers in gathering the courage to write. I am grateful for the ideas that have ignited my own writing.” —Penny Kittle, Teacher and Author

Making Up Our Mind Sep 15 2021 If free market advocates had total control over education policy, would the shared public system of education collapse? Would school choice revitalize schooling with its innovative force? With proliferating charters and voucher schemes, would the United States finally make a dramatic break with its past and expand parental choice? Those are not only the wrong questions—they’re the wrong premises, argue philosopher Sigal R. Ben-Porath and historian Michael C. Johanek in Making Up Our Mind. Market-driven school choices aren’t new. They predate the republic, and for generations parents have chosen to educate their children through an evolving mix of publicly supported, private, charitable, and entrepreneurial enterprises. The question is not whether to have school choice. It is how we will regulate who has which choices in our mixed market for schooling—and what we, as a nation, hope to accomplish with that mix of choices. Looking beyond the simplistic divide between those who oppose government intervention and those who support public education, the authors make the case for a structured landscape of choice in schooling, one that protects the interests of children and of society, while also identifying key shared values on which a broadly acceptable policy could rest.

Public Education Apr 22 2022 "Twenty-eight eminent essayists remind our nations parents, educators, school board members and politicians that our democracy is in jeopardy and that our nation's system of free universal public education is also under attack. If that attack succeeds, American democracy itself would be further imperiled. That is because American democracy rests on a belief that the power of our government comes from the people, and the diffusion of knowledge and the enlightenment of the people has been a cornerstone of our democracy since the founding of our republic. America's public schools, therefore, have a special mandate"--

Teacherpreneurs Oct 24 2019 We need a bold new brand of teacher leadership that will create opportunities for teachers to practice, share, and grow their knowledge and expertise. This book is about "teacherpreneurs"—highly accomplished classroom teachers who blur the lines of distinction between those who teach in schools and those who lead them. These teacherpreneurs embody the concept that teachers can teach as well as lead the transformation of teaching and learning. It’s about empowering expert teachers who can buoy the image of teaching and enforce standards among their ranks while all along making sure that their colleagues as well as education policymakers and the public know what works best for students. The book follows a small group of teacherpreneurs in their first year. We join their journey toward becoming teacher leaders whose work is not defined by administrative fiat, but by their knowledge of students and drive to influence policies that allow them and their colleagues to teach more effectively. The authors trace the teacherpreneurs' steps—and their

own—in the effort to determine what it means to define and execute the concept of "teacherpreneurism" in the face of tough demands and resistant organizational structures.

Learning from the Federal Market-Based Reforms Oct 16 2021 Over the past twenty years, educational policy has been characterized by top-down, market-focused policies combined with a push toward privatization and school choice. The new Every Student Succeeds Act continues along this path, though with decision-making authority now shifted toward the states. These market-based reforms have often been touted as the most promising response to the challenges of poverty and educational disenfranchisement. But has this approach been successful? Has learning improved? Have historically low-scoring schools “turned around” or have the reforms had little effect? Have these narrow conceptions of schooling harmed the civic and social purposes of education in a democracy? This book presents the evidence. Drawing on the work of the nation’s most prominent researchers, the book explores the major elements of these reforms, as well as the social, political, and educational contexts in which they take place. It examines the evidence supporting the most common school improvement strategies: school choice; reconstitutions, or massive personnel changes; and school closures. From there, it presents the research findings cutting across these strategies by addressing the evidence on test score trends, teacher evaluation, “miracle” schools, the Common Core State Standards, school choice, the newly emerging school improvement industry, and re-segregation, among others. The weight of the evidence indisputably shows little success and no promise for these reforms. Thus, the authors counsel strongly against continuing these failed policies. The book concludes with a review of more promising avenues for educational reform, including the necessity of broader societal investments for combatting poverty and adverse social conditions. While schools cannot single-handedly overcome societal inequalities, important work can take place within the public school system, with evidence-based interventions such as early childhood education, detracking, adequate funding and full-service community schools—all intended to renew our nation’s commitment to democracy and equal educational opportunity.

Learning Personalized Jan 19 2022 A real-world action plan for educators to create personalized learning experiences Learning Personalized: The Evolution of the Contemporary Classroom provides teachers, administrators, and educational leaders with a clear and practical guide to personalized learning. Written by respected teachers and leading educational consultants Allison Zmuda, Greg Curtis, and Diane Ullman, this comprehensive resource explores what personalized learning looks like, how it changes the roles and responsibilities of every stakeholder, and why it inspires innovation. The authors explain that, in order to create highly effective personalized learning experiences, a new instructional design is required that is based loosely on the traditional model of apprenticeship: learning by doing. Learning Personalized challenges educators to rethink the fundamental principles of schooling that honors students' natural willingness to play, problem solve, fail, re-imagine, and share. This groundbreaking resource: Explores the elements of personalized learning and offers a framework to achieve it Provides a roadmap for enrolling relevant stakeholders to create a personalized learning vision and reimagine new roles and responsibilities Addresses needs and provides guidance specific to the job descriptions of various types of educators, administrators, and other staff This invaluable educational resource explores a simple framework for personalized learning: co-creation, feedback, sharing, and learning that is as powerful for a teacher to re-examine classroom practice as it is for a curriculum director to reexamine the structure of courses.

Failure to Disrupt Apr 10 2021 A leader in educational technology separates truth from hype, explaining what tech can—and can’t—do to transform our classrooms. Proponents of large-scale learning have boldly promised that technology can disrupt traditional approaches to schooling, radically accelerating learning and democratizing education. Much-publicized experiments, often underwritten by Silicon Valley entrepreneurs, have been launched at elite universities and in elementary schools in the poorest neighborhoods. Such was the excitement that, in 2012, the New York Times declared the “year of the MOOC.” Less than a decade later, that pronouncement seems premature. In Failure to Disrupt: Why Technology Alone Can’t Transform Education, Justin Reich delivers a sobering report card on the latest supposedly transformative educational technologies. Reich takes readers on a tour of MOOCs, autograders, computerized “intelligent tutors,” and other educational technologies whose problems and paradoxes have bedeviled educators. Learning technologies—even those that are free to access—often provide the greatest benefit to affluent students and do little to combat growing inequality in education. And institutions and investors often favor programs that scale up quickly, but at the expense of true innovation. It turns out that technology cannot by itself disrupt education or provide shortcuts past the hard road of institutional change. Technology does have a crucial role to play in the future of education, Reich concludes. We still need new teaching tools, and classroom experimentation should be encouraged. But successful reform efforts will focus on incremental improvements, not the next killer app.

The Social Media Handbook May 31 2020 The Social Media Handbook is a comprehensive risk and compliance management toolkit that walks employers step-by-step through the process of developing and implementing effective social media policy and compliance management programs that are designed to minimize—and in some cases prevent—social networking and web 2.0 risks and other electronic disasters. Throughout this important resource Nancy Flynn (an internationally recognized expert on workplace social media) offers a guide to best practices for creating safe, effective, and compliant electronic business communications. The book contains a thorough review of the risks inherent in employees' social media use and content and explores how organizations can help manage behavior, mitigate risks, and maximize compliance through the implementation of strategic social media compliance management programs. The Opportunity Equation Feb 20 2022 Schwarz, founder of the groundbreaking Citizen Schools program, shares his vision for reducing inequality by pairing successful adults with low-income students. Parental wealth now predicts adult success more than at any point in the last hundred years. And yet as debates about education rage on, and wealth-based achievement gaps grow, too many people fix the blame on one of two convenient scapegoats: poverty or our public schools. But in fact, low-income kids are learning more now than ever before. The real culprit for rising inequality, Eric Schwarz argues in *The Opportunity Equation*, is that wealthier kids are learning much, much more—mostly outside of school. In summer camps, robotics competitions, sessions with private tutors, and conversations around the dinner table, children from more affluent families build the skills and social networks that propel them to success. In *The Opportunity Equation*, Schwarz tells the story of how he founded the pioneering Citizen Schools program to combat rising inequality by bringing these same opportunities to children who don't have access to them. By increasing learning time in schools and harnessing the power of an army of volunteers with various skills and professional backgrounds—lawyers, engineers, carpenters, journalists, nonprofit leaders, and grandmothers who sew—Citizen Schools offers after-school apprenticeships that provide the building blocks for adult success. Recounting the triumphs and setbacks he's encountered in implementing the program, Schwarz shows that some of the nation's lowest-performing schools in its lowest-income cities can, with help, provide their students with many of the same experiences wealthy communities afford to their children. The results have been proven: in the dozen school districts, from New York to Oakland, that have partnered with Citizen Schools, rates of attendance, proficiency, graduation, and college acceptance have gone up—and the achievement gap closes. At a time when many stakeholders in the education debates are looking for new, silver-bullet shortcuts to educational excellence, Schwarz shows that the best solution is human-centered, rooted in the American tradition of citizen voluntarism, and, most important, achievable. We can provide quality education for all students and close the opportunity gap in this country—and we can do it together.

Conform Aug 26 2022 #1 bestselling author and popular radio and television host Glenn Beck considers the hot-button issue of education in the US, exposing the weaknesses of the Common Core school curriculum and examining why liberal solutions fail. Public education is never mentioned in the constitution. Why? Because our founders knew that it was an issue for state and local governments—not the federal one. It's not a coincidence that the more the federal government has inserted itself into public education over the years, the worse our kids have fared. Washington dangles millions of dollars in front of states and then tells them what they have to do to get it. It's backdoor nationalization of education—and it's leading us to ruin. In *Conform*, Glenn Beck presents a well-reasoned, fact-based analysis that proves it's not more money our schools need—it's a complete refocusing of their priorities and a total restructuring of their relationship with the federal government. In the process, he dismantles many of the common myths and talking points that are often heard by those who want to protect the status quo. Critics of the current system are just “teacher bashers”...Teachers' unions put kids first...Homeschooled kids suffer both academically and socially...“local control” is an excuse to protect mediocrity...Common Core is “rigorous” and “state led”...Critics of Common Core are just conspiracy theorists...Elementary school teachers need tenure...We can't reform schools until we eradicate poverty...school choice takes money away from public schools...Charter schools perform poorly relative to public schools. There is no issue more important to America's future than education. The fact that we've yielded control over it to powerful unions and ideologically driven elitists is inexcusable. We are failing ourselves, our children, and our country. *Conform* gives parents the facts they need to take back the debate and help usher in a new era of education built around the commonsense principles of choice, freedom, and accountability.

On the Same Track Sep 27 2022 A public school principal's account of the courageous leaders who have dismantled the tracking systems in their schools in order to desegregate classrooms What would happen if a school eliminated the “tracks” that rank students based on their perceived intellectual abilities? Would low-achieving students fall behind and become frustrated? Would their higher-achieving peers suffer from a “watered-down” curriculum? Or is tracking itself the problem? A growing body of research shows that tracking doesn't increase learning for the minority and low-income students who are overrepresented in low-track classrooms. This de facto segregation has led many civil rights advocates to argue that tracking is turning back the clock on equal education. As a principal at a New York high school, Carol Corbett Burris believed that the curriculum for the best students was the best curriculum for all. She helped lead a bold plan to eliminate tracking from her school, and the results couldn't have been further from the doom-and-gloom scenarios of tracking proponents. Instead, there was a dramatic improvement in the achievement of all students, across racial and socioeconomic divisions, and a near elimination of the achievement gap. Today, due to those efforts, International Baccalaureate English is the twelfth-grade curriculum for South Side students, and all students take the same challenging courses, together, to prepare them for college. In *On the Same Track*, Burris draws on her own experience, on the experiences of other schools, and on the latest research to make an impassioned case for

detracking. Not only does the practice of tracking fail to benefit lower-tracked students, as Burriss shows, but it also results in the resegregation of classrooms. Furthermore, she argues that many of today's popular reforms emanate from the same "sort and select" mentality that reinforces social stratification based on race and class. *On the Same Track* is a rousing, controversial, and yet optimistic account of how we need to change our assumptions and policies if we are to live up to the promise of democratic public education. Only by holding all students to the same high standards can we ensure that all have the same opportunity to live up to their full potential.

Rethinking Value-Added Models in Education Feb 26 2020 Since passage of the of No Child Left Behind Act in 2001, academic researchers, econometricians, and statisticians have been exploring various analytical methods of documenting students' academic progress over time. Known as value-added models (VAMs), these methods are meant to measure the value a teacher or school adds to student learning from one year to the next. To date, however, there is very little evidence to support the trustworthiness of these models. What is becoming increasingly evident, yet often ignored mainly by policymakers, is that VAMs are 1) unreliable, 2) invalid, 3) nontransparent, 4) unfair, 5) fraught with measurement errors and 6) being inappropriately used to make consequential decisions regarding such things as teacher pay, retention, and termination. Unfortunately, their unintended consequences are not fully recognized at this point either. Given such, the timeliness of this well-researched and thoughtful book cannot be overstated. This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research-based ways.

School's Choice Feb 08 2021 "This book takes a comprehensive look at the ways in which charters control enrollment and retention in their schools, often limiting equitable access for all students. It critiques the manner in which charters "counsel out" students--frequently English learners, students with special needs, and non-White students--for even minor infractions or poor academic performance, and urges state and federal policy makers to design a more inclusive and equitable charter sector"--

Brain Science for Principals Dec 26 2019 *Brain Science for Principals: What School Leaders Need to Know* features leadership of learning from the perspective of recent findings of educational neuroscience. Each chapter explores a question related to learning and offers practical suggestions for principals. Divided into six sections, each of the 24 short chapters can stand alone or the book can be read cover-to-cover. The opening section explains how understanding brain neuroplasticity changes belief in fixed intelligence. A partial list of subjects explored in the book includes neurogenesis, neurodiversity, memory, brain fitness, the emotional connection, effects of stress, poverty, embodied cognition, movement, mindset, ELL issues, multitasking, the role of the arts, ages and stages of the brain, emotional intelligence, creating resonance, and maintaining mindfulness. The conclusion underscores how neuroscientifically literate principals can enhance learning and advance social justice. Writers of the book anticipate a future when educational neuroscience findings about learning become part of the education of every principal and school leader. Knowing how the brain works is the key to the future of education.

The Pedagogy of Confidence Dec 18 2021 In her new book, prominent professional developer Yvette Jackson focuses on students' strengths, rather than their weaknesses, to reinvigorate educators to inspire learning and high intellectual performance. Through the lens of educational psychology and historical reforms, Jackson responds to the faltering motivation and confidence of educators in terms of its effects on closing the achievement gap. The author seeks to rekindle the belief in the vast capacity of underachieving urban students, and offers strategies to help educators inspire intellectual performance. Jackson proposes that a paradigm shift towards a focus on strengths will reinvigorate educators passion for teaching and belief in their ability to raise the intellectual achievement of their students. Jackson addresses how educators can systematically support the development of motivation, reflective and cognitive skills, and high performance when standards and assessments are predisposed to non-conceptual methods. Furthermore, she examines challenges and offers strategies for dealing with cultural disconnects, the influence of new technologies, and language preferences of students.

A Mission from God Dec 06 2020 “I am not a civil rights hero. I am a warrior, and I am on a mission from God.” —James Meredith James Meredith engineered two of the most epic events of the American civil rights era: the desegregation of the University of Mississippi in 1962, which helped open the doors of education to all Americans; and the March Against Fear in 1966, which helped open the floodgates of voter registration in the South. Part memoir, part manifesto, *A Mission from God* is James Meredith’s look back at his courageous and action-packed life and his challenge to America to address the most critical issue of our day: how to educate and uplift the millions of black and white Americans who remain locked in the chains of poverty by improving our public education system. Born on a small farm in Mississippi, Meredith returned home in 1960 after nine years in the U.S. Air Force, with a master plan to shatter the system of state terror and white supremacy in America. He waged a fourteen-month legal campaign to force the state of Mississippi to honor his rights as an American citizen and admit him to the University of Mississippi. He fought the case all the way to the Supreme Court and won. Meredith endured months of death threats, daily verbal abuse, and round-the-clock protection from federal marshals and thousands of troops to become the first black graduate of the University of Mississippi in 1963. In 1966 he was shot by a sniper on the second day of his “Walk Against Fear” to inspire voter registration in Mississippi. Though Meredith never allied with traditional civil rights groups, leaders of civil rights organizations flocked to help him complete the march, one of the last great marches of the civil rights era. Decades later, Meredith says, “Now it is time for our next great mission from God. . . . You and I have a divine responsibility to transform America.”

Read, Write, Lead Jul 25 2022 Literacy is a skill for all time, for all people. It is an integral part of our lives, whether we are students or adult professionals. Giving all educators the breadth of knowledge and practical tools that help students strengthen their literacy skills is the focus of *Read, Write, Lead*. Drawing on her experience as a mentor teacher, reading specialist, instructional coach, and staff developer, author Regie Routman offers time-tested advice on how to develop a schoolwide learning culture that leads to more effective reading and writing across the curriculum. She explains how every school—including yours—can

- * Implement instructional practices that lead to better engagement and achievement in reading and writing for all students, from kindergarten through high school, including second-language and struggling learners.
- * Build Professional Literacy Communities of educators working together to create sustainable school change through professional learning based on shared beliefs.
- * Reduce the need for intervention through daily practices that ensure success, even for our most vulnerable learners.
- * Embed the language of productive feedback in responsive instruction, conferences, and observations in order to accelerate learning for students, teachers, and leaders.

In their own voices, teachers, principals, literacy specialists, and students offer real-life examples of changes that led to dramatic improvement in literacy skills and—perhaps just as important—increased joy in teaching and learning. Scattered throughout the book are “Quick Wins”—ideas and actions that can yield positive, affirming results while tackling the tough work of long-term change.

A Guide to Designing Curricular Games Nov 05 2020 This book is a guide to designing curricular games to suit the needs of students. It makes connections between video games and time-tested pedagogical techniques such as discovery learning and feedback to improve student engagement and learning. It also examines the social nature of gaming such as techniques for driver/navigator partners, small groups, and whole class structures to help make thinking visible; it expands the traditional design process teachers engage in by encouraging use of video game design techniques such as playtesting. The author emphasizes designing curricular games for problem-solving and warns against designing games that are simply “Alex Trebek (host of Jeopardy) wearing a mask”. By drawing on multiple fields such as systems thinking, design theory, assessment, and curriculum design, this book relies on theory to generate techniques for practice.

Education Is Upside-Down Jul 21 2019 *Education Is Upside Down* cuts through adjustments being made at technical levels of educational practice and accountability, challenging ideals and philosophies that have powered American Education for most of the last century. This book explains how and why long-standing approaches generate flawed instructional practices, flawed systemic reform efforts, and a fundamental misalignment between the educational institution and the society it is missioned to serve. *Education Is Upside Down* urges readers wishing to improve American Education to more carefully consider the institution’s central mission, challenge long-accepted truths of practice, and question current reform efforts and actions. In full, *Education Is Upside Down* resists the practitioner-vs.-reformer blame game, seeking ultimately to carefully untangle—not tighten by yanking on any single strand—the long-complicated knot of American Education.

Music Lessons Now! Jan 07 2021 Every week, I see an article extolling the educational benefits of playing or singing music. From brain imaging to empirical data, the benefits are becoming well known. But I have yet to see a book describing the correlation between the elements of music and the elements of other areas of educational endeavor such as reading, math, and science. What I attempted to do in this book is to show these relationships in context of musical elements and elements found in other academic fields.

The Cage-Busting Teacher Jul 13 2021 The Cage-Busting Teacher adopts the logic of Cage-Busting Leadership and applies it to the unique challenges and opportunities of classroom teachers. Detailed, accessible, and thoroughly engaging, it uncovers the many ways in which teachers can break out of familiar constraints in order to influence school and classroom practice, education policy, and school reform. “Cage-busting is concrete, precise, and practical,” writes Frederick M. Hess. This invaluable book helps teachers understand why and how to revisit their assumptions and enables them to have greater impacts upon their schools and beyond. Based on interviews with hundreds of teachers, teacher advocates, union leaders, and others, Hess identifies the challenges teachers face, seeks concrete and workable solutions, and offers recommendations to put those solutions in place. A uniquely practical and inspiring book, The Cage-Busting Teacher is for educators who want to shape the schools and systems in which they work.

The Myth of the Spoiled Child Apr 29 2020 A prominent and esteemed critic challenges widely held beliefs about children and parenting, revealing that underlying each myth is a deeply conservative ideology that is, ironically, often adopted by liberal parents. Somehow a set of deeply conservative assumptions about children—what they're like and how they should be raised—has congealed into the conventional wisdom in our society. Parents are accused of being both permissive and overprotective, unwilling to set limits and afraid to let their kids fail. Alfie Kohn systematically debunks these beliefs, not only challenging erroneous factual claims but also exposing the troubling ideology that underlies them. Complaints about pushover parents and coddled kids are hardly new, he shows, and there is no evidence that either phenomenon is especially widespread today—let alone more common than in previous generations. Moreover, new research reveals that helicopter parenting is quite rare and, surprisingly, may do more good than harm when it does occur. The major threat to healthy child development, Kohn argues, is parenting that is too controlling rather than too indulgent. With the same lively, contrarian style that marked his influential books about rewards, competition, and education, Kohn relies on a vast collection of social science data, as well as on logic and humor, to challenge assertions that appear with numbing regularity in the popular press and are often accepted uncritically, even by people who are politically liberal. These include claims that young people • suffer from inflated self-esteem • are entitled and narcissistic • receive trophies, praise, and A's too easily • are in need of more self-discipline and “grit” Kohn's invitation to reexamine these and other assumptions is particularly timely; his book has the potential to change our culture's conversation about kids and the people who raise them.

Class War Nov 17 2021 What America has at stake when some children go to school hungry and others ride in \$1,000 strollers In an age of austerity, elite corporate education reformers have found new ways to transfer the costs of raising children from the state to individual families. Public schools, tasked with providing education, childcare, job training,

meals, and social services to low-income children, struggle with cutbacks. Meanwhile, private schools promise to nurture the minds and personalities of future professionals to the tune of \$40,000 a year. As *Class War* reveals, this situation didn't happen by chance. In the media, educational success is framed as a consequence of parental choices and natural abilities. In truth the wealthy are ever more able to secure advantages for their children, deepening the rifts between rich and poor. The longer these divisions persist, the worse the consequences. Drawing on Erickson's own experience as a teacher in the New York City school system, *Class War* reveals how modern education has become the real "hunger games," stealing opportunity and hope from disadvantaged children for the benefit of the well-to-do.

Breakout Sep 22 2019 It is not between the Left and the Right, but between the past and the future. America is on the edge of a breakout. In fact, we are poised for one of the most spectacular leaps in human well-being in history. Pioneers of the future—innovators and entrepreneurs—are achieving breakthroughs in medicine, transportation, energy, education, and other fields that will make the world a dramatically different and better place. Unless the "prison guards" of the past stop them. Every American must choose a side. Will you be a champion of the future or a prisoner of the past? Every potential breakthrough has to get past a host of individuals and institutions whose power and comfort depend on the status quo. These prison guards of the past will strangle every innovation that threatens to change the way things have always been done—if we let them.

Confronting Racism in Teacher Education Jun 12 2021 *Confronting Racism in Teacher Education* aims to transform systematic and persistent racism through in-depth analyses of racial justice struggles and strategies in teacher education. By bringing together counternarratives of critical teacher educators, the editors of this volume present key insights from both individual and collective experiences of advancing racial justice. Written for teacher educators, higher education administrators, policy makers, and others concerned with issues of race, the book is comprised of four parts that each represent a distinct perspective on the struggle for racial justice: contributors reflect on their experiences working as educators of Color to transform the culture of predominately White institutions, navigating the challenges of whiteness within teacher education, building transformational bridges within classrooms, and training current and inservice teachers through concrete models of racial justice. By bringing together these often individualized experiences, *Confronting Racism in Teacher Education* reveals larger patterns that emerge of institutional racism in teacher education, and the strategies that can inspire resistance.
