The Academic Writer's Toolkit Sep 28 2019 Berger's slim, user-friendly volume on academic writing is a gift to linguistically-stressed academics. Author of 60 published books, the author speaks to junior scholars and graduate students about the process and products of academic writing. He differentiates between business writing skills for memos, proposals, and reports, and the scholarly writing that occurs in journals and books. He has suggestions for getting the "turgid" out of turgid academic prose and offers suggestions on how to best structure various forms of documents for effective communication. Written in Berger's friendly, personal style, he shows by example that academics can write good, readable prose in a variety of genres.

The Human Operating System Jan 01 2020 Transform Your Life and Leadership. There are two ways to get through the great rain forest in Brazil. You can hack your way through the dense forest with a machete, or you can find the nearest tributary that will eventually take you through the jungle to the mighty Amazon river. The Human Operating System is like the Amazon in that it flows through the heart of leadership development like a mighty river. Applying the five transformative principles of the HOS is so much more effective than hacking through the forest of leadership trade books, workshops, and management techniques. Many of these tools

can be helpful, but they often function more like "Apps" or accessories rather than a deeper Operating System that can offer meaning, direction, and coherence to everything you might do as a Leader. Jack Nicholson and Rob Murray have been developing the Human Operating System over many years of work with executive leaders, teams, and organizations. The deep change process and principles embedded in the HOS have made a significant difference with leaders who have become frustrated, depleted, and fragmented, trying to build enterprises with tools and resources no longer sufficient. With the HOS, leaders can experience a sense of flow and convergence that makes leading their organization much more energizing and fulfilling than merely trying harder and running faster to perform. When the Human Operating System is installed, everything else in the leader and organizational development can work better. That is the hope of this book—that high-capacity leaders and teams will experience the authentic power, energy, and strength of the Amazon River flowing beneath them.

Tornado Class A1 Aug 08 2020 This is a manual about the construction of 60163 Tornado, the new steam locomotive that has been making its first public runs in recent months. The locomotive has been built by the A1 Steam Locomotive Trust, a charitable trust founded in 1990 to build Tornado and possibly further locomotives. Tornado was conceived as an evolution of the LNER Peppercorn Class A1 class, incorporating improvements likely had steam continued, and changes for cost, safety, manufacturing and operational benefits, while replicating the original design's sound and appearance. Tornado, completely new-built, is considered the 50th Peppercorn A1, numbered next in the class after 60162, Saint Johnstoun, built in 1949. The 49 original Peppercorn A1s were built in Doncaster and Darlington for the London and North Eastern Railway (LNER). Tornado was built in the trust's Darlington works. The original 49 locomotives were scrapped by 1966 after an average service of 15 years. None survived into preservation, and Tornado fills a gap in the classes of restored steam locomotives that used to operate on the East Coast Main Line.
