We Slaves of Suriname Jun 04 2020 Anton de Kom's *We Slaves of Suriname* is a literary masterpiece as well as a fierce indictment of racism and colonialism. In this 1934 book, published here in English for the first time, the Surinamese writer and resistance leader Anton de Kom recounts the history of his homeland, from the first settlements by Europeans in search of gold through the era of the slave trade and the period of Dutch colonial rule when the old slave mentality persisted, long after slavery had been formally abolished. De Kom wrote this book to help free the people of Suriname from the yoke of colonial rule: 'No people can reach full maturity as long as it remains burdened with an inherited sense of inferiority.' In 1933, de Kom was banished by the colonial authorities in Suriname, who saw him as a threat. He wrote *We Slaves of Suriname* from exile in The Netherlands, where it was first published in 1934 in a censored form. When World War II broke out, de Kom joined the Dutch resistance and his works were banned. He was arrested by the Germans in 1944 and deported to the Neuengamme concentration camp, where he died on 24 April 1945. 159 years after the abolition of slavery in Suriname and 88 years after its initial publication, *We Slaves of Suriname* has lost none of its brilliance and power.

Contemporary Linear Algebra Apr 14 2021 From one of the premier authors in higher education comes a new linear algebra textbook that fosters mathematical thinking, problem-solving abilities, and exposure to real-world applications. Without sacrificing

mathematical precision, Anton and Busby focus on the aspects of linear algebra that are most likely to have practical value to the student while not compromising the intrinsic mathematical form of the subject. Throughout Contemporary Linear Algebra, students are encouraged to look at ideas and problems from multiple points of view.

Translators' Strategies and Creativity Sep 19 2021 In their contributions the authors reflect upon Levy's thinking on translation as a communication process and on Popovič's insistence on the importance of re-creating a text both at the surface and deep levels. Examples are drawn from literary translation, technical translation, from audio-visual translation and from interpreting, and the authors point out that translators in all domains inevitably come up against linguistic, textual and other constraints, which, if they are to be resolved successfully, call upon a translator's and interpreter's strategies and creativity. The authors argue that this is the essence of professional decision-making in translation according to Levy translation is a decision-making process and that translation teachers should help students develop an understanding of translation strategies and of the vital role that creativity plays throughout the translation/interpreting process.

Charity Crossing Borders Dec 11 2020 Throughout the European Union, national income tax systems support charitable activities by way of preferential treatment. However, a number of Member States operate relief regimes which appear to trigger the question of compatibility with Union law with respect to the fundamental freedoms. In this first study to examine charity and donor taxation regimes across a wide range of Member States, the author focuses on compatibility with EU non-discrimination law. She examines twenty national regimes, both comparatively and from the perspective of overarching EU law. The countries covered are Austria, Belgium, Bulgaria, Cyprus, Estonia, Finland, Germany, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, The Netherlands, Poland, Portugal, Slovakia, Spain, Sweden, and the United Kingdom. Although charity and donor taxation falls within the competence of the Member States, they must nonetheless observe primary Union law and grant non-discriminatory treatment where a fact pattern falls within the ambit of the fundamental freedoms. In the course of defining this framework, the study addresses such issues as the following: types of relief schemes maintained for charities and donors; administrative requirements; international aspects (both inbound and outbound); privileged donations and capital gains treatment of in-kind donations; eligible donees; whether and to what extent charitable entities and donors can actually rely on the fundamental freedoms; specific applicability of each of the relevant fundamental freedoms; the issue of comparability; justifications for restrictive measures in Member State practice; and the issue of proportionality.

Cosmic Trigger I Dec 31 2019 The great modern classic of a brilliant rebel's personal exploration into the nature of consciousness Featuring a New Introduction by John Higgs "Cosmic Trigger deals with a process of deliberately induced brain change. This process is called "initiation" or "vision quest" in many traditional societies and can loosely be considered some dangerous variety of self-psychotherapy in modern terminology. I do not recommend it for everybody . . . briefly, the main thing I learned in my experiments is that "reality" is always plural and mutable." - Robert Anton Wilson from the Preface The Robert Anton Wilson Trust Authorized Hilaritas Press Edition

Michelangelo's Design Principles, Particularly in Relation to Those of Raphael Nov 29 2019 Abstract: The discovery of the actual manuscript was featured on the front pages of the major German newspapers and reported throughout the world. It consists of 334 pages, typewritten, with extensive handwritten amendments, notes, and edits. According to Gerda Panofsky, her husband had continued to expand and edit the manuscript until 1922, and was preparing it for publication when he had to leave it behind. In this study, Panofsky provides a detailed analysis of Michelangelo's artistic style, comparing Michelangelo directly with Raphael, and then later taking a larger historical view. This text offers important new information about the evolution of Panofsky's scholarship, as well as on the state of research on Michelangelo and the High Renaissance during a period of transition for the discipline, in which formal readings of artworks began to take precedence over artists' biographies.
