[Web, Graphics & Perl/TK Programming](#) Apr 20 2022 In its first five years of existence, The Perl Journal (TPJ) became the voice of the Perl community. Every serious Perl programmer subscribed to it, and every notable Perl guru jumped at the opportunity to write for it. TPJ explained critical Perl topics and demonstrated Perl's utility for fields as diverse as astronomy, biology, economics, AI, and games. Back issues were hoarded, or swapped like trading cards. No longer in print format, The Perl Journal remains a proud and timeless achievement of Perl during one of its most exciting periods of development. [Web, Graphics & Perl/TK](#) is the second volume of The Best of the Perl Journal, compiled and re-edited by the original editor and publisher of The Perl Journal, Jon Orwant. In this series, we've taken the very best (and still relevant) articles published in TPJ over its five years of publication and immortalized them into three volumes. The forty articles included in this volume are simply some of the best Perl articles ever written on the subjects of graphics, the Web, and Perl/TK, by some of the best Perl authors and coders. Much of Perl's success is due to its capabilities for developing web sites; the Web section covers popular topics such as CGI programs, mod_perl, spidering, HTML parsing, security, and content management. The Graphics section is a grab bag of techniques, ranging from simple graph generation to ray tracing and real-time video digitizing. The Perl/TK section shows you how to use the popular Perl/TK toolkit for developing graphical applications that work on both Unix/Linux and Windows without a single change. Written by twenty-three of the most prominent and prolific members of the closely-knit Perl community, including Lincoln Stein, Mark-Jason Dominus, Alligator Descartes, and Dan Brian, this anthology does what no other book can, giving unique insight into the real-life applications and powerful techniques made possible by Perl.

Mastering Visual Studio .NET May 29 2020 A detailed handbook for experienced developers explains how to get the most out of Microsoft's Visual Studio .NET, offering helpful guidelines on how to use its integrated development environment, start-up templates, and other features and tools to create a variety of applications, including Web services. Original. (Advanced)

Law of the Internet, 4th Edition May 09 2021 Law of the Internet, Fourth Edition is a two-volume up-to-date legal resource covering electronic commerce and online contracts, privacy and network security, intellectual property and online content management, secure electronic transactions, cryptography, and digital signatures, protecting intellectual property online through link licenses, frame control and other methods, online financial services and securities transactions, antitrust and other liability. The Law of the Internet, Fourth Edition quickly and easily gives you everything you need to provide expert counsel on: Privacy laws and the Internet Ensuring secure electronic transactions, cryptography, and digital signatures Protecting intellectual property online - patents, trademarks, and copyright Electronic commerce and contracting Online financial services and electronic payments Antitrust issues, including pricing, bundling and tying Internal network security Taxation of electronic commerce Jurisdiction in Cyberspace Defamation and the Internet Obscene and indecent materials on the Internet Regulation of Internet access and interoperability The authors George B. Delta and Jeffrey H. Matsuura -- two Internet legal experts who advise America's top high-tech companies -- demonstrate exactly how courts, legislators and treaties expand traditional law

into the new context of the Internet and its commercial applications, with all the citations you'll need. The Law of the Internet also brings you up to date on all of the recent legal, commercial, and technical issues surrounding the Internet and provides you with the knowledge to thrive in the digital marketplace. Special features of this two-volume resource include timesaving checklists and references to online resources.

China Court Cases on Intellectual Property Rights Mar 07 2021 This book presents, in extraordinary detail, sixteen landmark cases that profoundly affect the protection of intellectual property rights in China. Written by six prominent Chinese legal scholars and jurists - including judges who themselves participated in these decisions - each case is fully described and analysed: the parties and their representatives, the basic facts, the facts ascertained by the court, the evidence presented by plaintiffs and defendants, the judges' opinions with their arguments and reasoning, the unanimous conclusions, and the judgment, along with a wealth of deeply informed comment. Among the questions raised by these cases are the following: Is a website within the definition of a 'work' in copyright law, and thus protected? How should the acts of uploading and downloading of works from the Internet be classified? Can the concept of torts be applied in the Internet context? What is the legal liability of an Internet service provider? How is a defendant's 'unreasonable conduct' to be determined? Who is responsible for the determination of 'artistic value' - e.g., of clothing designs? What evidence must be presented to serve as sufficient proof that a domain name is a party's own creation? In what a manner should packaging and decoration be regarded? How should the 'author' in copyright conflict cases be identified? How should an unauthorized web link be judged? When do separate components assembled to create a product enjoy copyright protection? How should damages be determined? An introductory essay provides a detailed overview of the characteristics of China's intellectual property law as it continues to develop, with attention to such factors as the specific laws enacted, the various courts and tribunals to which IP cases are assigned, the progress of a case, starting from filing to winding up, regulations, reform programs, and rules of evidence. The editor puts forward his own proposals - particularly in light of the so-called 'interfering factors' - on reform of civil trial style in intellectual property cases. It is difficult to overstate the value of this book to anyone involved in business dealings in China. With its authoritative expertise, abundant detail, and thorough elucidation of the salient features of developing IP law and practice in China, it will serve interested parties for years to come.

Network World Apr 27 2020 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

ASP.NET by Example Aug 20 2019 ASP developers need to understand how ASP.NET can help them solve business problems better than any prior product. ASP.NET by Example is designed to provide a "crash course" on ASP.NET and quickly help the reader start using this new technology. As part of the By Example series, this book approaches ASP.NET in an easy-to-use tutorial way, giving the reader a much faster and more interactive learning experience than the traditional reference book. By building the sample applications taught in the book, readers will learn how to create custom ASP.NET controls, how to use ADO+ objects in ASP, and how to deploy and manage applications. ASP.NET by Example also provides tools and information needed to migrate old ASP files to the new platform, saving developers significant time and money. As an added feature Steven A. Smith has included multiple case studies on how ASP.NET is used in e-commerce applications.

Directory of Corporate Affiliations Jul 19 2019 Described as "Who owns whom, the family tree of every major corporation in America," the directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility.
