[DOM Scripting](#) Apr 27 2022 With this second edition of the popular DOM Scripting: Web Design with JavaScript and the Document Object Model comes a modern revision to update best practices and guidelines. It includes full coverage of HTML5 in a new, dedicated chapter, and details on JavaScript

libraries and how they can help your scripting. The book provides everything you'll need to start using JavaScript and the Document Object Model to enhance your web pages with client-side dynamic effects and user-controlled animation. It shows how JavaScript, HTML5, and Cascading Style Sheets (CSS) work together to create usable, standards-compliant web designs. We'll also cover cross-browser compatibility with DOM scripts and how to make sure they degrade gracefully when JavaScript isn't available. DOM Scripting: Web Design with JavaScript and the Document Object Model focuses on JavaScript for adding dynamic effects and manipulating page structure on the fly using the Document Object Model. You'll start with a crash course in JavaScript and the DOM, then move on to several real-world examples that you'll build from scratch, including dynamic image galleries and dynamic menus. You'll also learn how to manipulate web page styles using the CSS DOM, and create markup on the fly. If you want to create websites that are beautiful, dynamic, accessible, and standards-compliant, this is the book for you!

Papal Genealogy Jul 19 2021 The papacy has often resembled a secular European monarchy more than a divinely inspired institution. Roman pontiffs bestowed great wealth on their families and forged strategic alliances with other powerful families to increase their power. Pope Alexander VI (Rodrigo Borgia), for example, forced his daughter Lucrezia into a series of marriages for political reasons. When her marital alliance was no longer advantageous, as was the case in her second marriage, her husband was brutally murdered. Many papal families also intermarried in hopes of forming a hereditary papacy; at least two members of the Fieschi, Piccolomini, Della Rovere, and Medici families served as pope. Papal families since the early history of the church are fully covered in this comprehensive work. Genealogical charts graphically show the descendants of the popes, presenting in many cases the interrelationships between the papal families and their relationships with many of the leading families of Europe. Detailed histories examine the impact of the papacy on each pope's family and how each influenced the history of the church.

Design to Live Jul 31 2022 The power of design to create a life worth living even in a refugee camp: designs, inventions, and artworks from the Azraq Refugee Camp in Jordan. This book shows how, even in the most difficult conditions--forced displacement, trauma, and struggle--design can help create a life worth living. Design to Live documents designs, inventions, and artworks created by Syrian refugees living in the Azraq Refugee Camp in Jordan. Through these ingenious and creative innovations--including the vertical garden, an arrangement necessitated by regulations that forbid planting in the ground; a front hall, fashioned to protect privacy; a baby swing made from recycled desks; and a chess set carved from a broomstick--refugees defy the material scarcity, unforgiving desert climate, and cultural isolation of the camp. Written in close collaboration with the residents of the camp, with text in both English and Arabic, Design to Live, reflects two perspectives on the camp: people living and working in Azraq and designers reflecting on humanitarian architecture within the broader field of socially engaged art and design. Architectural drawings, illustrations, photographs, narratives, and stories offer vivid testimony to the imaginative and artful ways that residents alter and reconstruct the standardized humanitarian design of the camp--and provide models that can be replicated elsewhere. The book is the product of a three-year project undertaken by MIT Future Heritage Lab, researchers and students with Syrian refugees at the Azraq Refugee Camp, CARE, Jordan, and the German-Jordanian University. Copublication with Future Heritage Lab, MIT

Master Posing Guide for Wedding Photographers Jun 05 2020 "Posing is one of the most important tools used by photographers to optimize the appearance of their subjects. Unfortunately, at weddings--where time is tight and couples don't want lengthy photo sessions to distract them from their guests--there's often little opportunity to craft the best pose for each individual. As Bill Hurter shows in this book, this means that photographers need to adopt a new approach to idealizing their subjects. Through staging, subtle direction, and careful observation, Hurter reveals how the skilled photographer, armed with a solid understanding of the principles of posing, can create stunning images that make everyone look their best--and capture more of the emotion and energy of the wedding day"--Back cover.
