Online Security for the Business Traveler Feb 11 2021 Whether attending conferences, visiting clients, or going to sales meetings, travel is an unavoidable necessity for many businesspeople.

Today's high-tech enabled businessperson travels with electronic devices such as smartphones, tablets, laptops, health sensors, and Google Glass. Each of these devices offers new levels of productivity and efficiency, but they also become the weak link in the security chain: if a device is lost or stolen during travel, the resulting data breach can put the business in danger of physical, financial, and reputational loss. *Online Security for the Business Traveler* provides an overview of this often overlooked problem, explores cases highlighting specific security issues, and offers practical advice on what to do to ensure business security while traveling and engaging in online activity. It is an essential reference guide for any travelling business person or security professional. Chapters are organized by travel stages for easy reference, including planning, departure, arrival, and returning home Touches on the latest technologies that today's business traveler is using Uses case studies to highlight specific security issues and identify areas for improved risk mitigation

### **Modeling Information Diffusion in Online Social Networks with Partial Differential**

**Equations** Apr 15 2021 The book lies at the interface of mathematics, social media analysis, and data science. Its authors aim to introduce a new dynamic modeling approach to the use of partial differential equations for describing information diffusion over online social networks. The eigenvalues and eigenvectors of the Laplacian matrix for the underlying social network are used to find communities (clusters) of online users. Once these clusters are embedded in a Euclidean space, the mathematical models, which are reaction-diffusion equations, are developed based on intuitive social distances between clusters within the Euclidean space. The models are validated with data from major social media such as Twitter. In addition, mathematical analysis of these models is applied, revealing insights into information flow on social media. Two applications with geocoded Twitter data are included in the book: one describing the social movement in Twitter during the Egyptian revolution in 2011 and another predicting influenza prevalence. The new approach advocates a paradigm shift for modeling information diffusion in online social networks and lays the theoretical groundwork for many spatio-temporal modeling problems in the big-data era.

**Online Business Security Systems** Nov 03 2022 This book applies the concept of synchronization to security of global heterogeneous and hetero-standard systems by modeling the relationship of risk access spots (RAS) between advanced and developing economies network platforms. The proposed model is more effective in securing the electronic security gap between these economies with

reference to real life applications, such as electronic fund transfer in electronic business. This process involves the identification of vulnerabilities on communication networks. This book also presents a model and simulation of an integrated approach to security and risk known as Service Server Transmission Model (SSTM).

*Online Casinos For Real Money* Aug 20 2021 Online casinos, also known as virtual casinos or Internet casinos, are online versions of traditional casinos. Online casinos generally offer odds and payback percentages that are comparable to land-based casinos. Some online casinos claim higher payback percentages for slot machine games, and some publish payout percentage audits on their websites. Assuming that the online casino is using an appropriately programmed random number generator, table games like blackjack have an established house edge. The payout percentage for these games are established by the rules of the game. This ebook by John Kalwin will give a brief explanation on Online Casino Ground, for more information visit: <http://www.onlinecasinoground.nl>

**Online Retrieval** Oct 02 2022 This comprehensive introduction gives basic how-to information on the use of online systems, discusses topics for which there are no accepted paradigms, and presents alternative points of view within a framework of previous research. Expanding on their immensely popular and critically acclaimed first edition, the authors have added extensive new material addressing Internet search and retrieval techniques as well as the more traditional Dialog and Lexis-Nexis services.

*Massive Open Online Courses and Higher Education* Jan 25 2022 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by 2014, the number of academic leaders who

believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.

**Girl Online** Jan 01 2020 What happens when a woman goes online? She becomes a girl. The unwritten contract of the internet, that a user is what is used, extends from the well-examined issue of data privacy and consent to the very selves women are encouraged to create in order to appear. Invited to self-construct as “girls online,” vloggers, bloggers and influencers sign a devil’s bargain: a platform on the condition they commodify themselves, eternally youthful, cute and responsibility-free, hiding offline domestic, professional and emotional labour while paying for their online presence with “accounts” of personal “experience.” Told via the arresting personal narrative of one woman negotiating the (cyber)space between her identities as girl, mother, writer, and commodified online persona, Girl Online is written in a plethora of the online styles, from programming language

to the blog/diary, from tweets to lyric prose, taking in selfies, social media, celebrity and Cyberfeminism.

*Interpretable Machine Learning* Sep 01 2022 This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

**Love and Intimacy in Online Cross-Cultural Relationships** Dec 24 2021 This book challenges assumptions about the motivations that drive women from relatively poor, developing countries to use intermarriage dating sites to find partners from relatively wealthy, developed countries. It is generally assumed that economic deprivation or economic opportunities are the main factors, but this book instead focuses on the work of women's imagination in online cross-cultural relationships, including the role of desire, love and intimacy. The experiences of Thai women are used to explore how they initiate, develop and maintain love and intimacy with Western men across distance and time. The book shows that, in the absence of opportunities to search and meet partners from geographically distant parts of the world, the technology of the internet offers new ways of searching for and managing relationships and has significant consequences for local experiences and expectations of love and partnering. The book will be of interest to scholars and students with an interest in family and intimate life, gender and sexualities, Asian and Thai studies, globalization and nationalism, culture and media, sociology and anthropology.

**Assessment Strategies for Online Learning** Feb 23 2022 Assessment has provided educational institutions with information about student learning outcomes and the quality of education for many

decades. But has it informed practice and been fully incorporated into the learning cycle? Conrad and Openo argue that the potential inherent in many of the new learning environments being explored by educators and students has not been fully realized. In this investigation of a variety of assessment methods and learning approaches, the authors aim to discover the tools that engage learners and authentically evaluate education. They insist that moving to new learning environments, specifically those online and at a distance, afford opportunities for educators to adopt only the best practices of traditional face-to-face assessment while exploring evaluation tools made available by a digital learning environment in the hopes of arriving at methods that capture the widest set of learner skills and attributes.
