Policy, Management and Finance of Public-Private Partnerships Jul 06 2020 This book examines some of the key policy, financial and managerial aspects of public-private partnerships within the context of the global spread of this form of procurement. The chapters investigate political and institutional issues surrounding PPPs, together with the financial and managerial strategies employed by the private sector. Adopting a cross-disciplinary perspective, the book highlights the often politically sensitive nature of these projects and identifies a need for the private sector to investigate a broad set of parameters which relate to the particular political economy of individual partnerships. Policy, Finance & Management for Public-Private Partnerships covers a range of specific issues, including: partnerships in developing countries; innovation in partnership-based procurement; government and business interaction; institutional and organisational approaches to facilitating partnership; project and corporate financing; risk and value management; market analysis, modelling and forecasting; capital structure decisions and management; investment theory and practice; pricing and cost evaluation; statutory regulations and their financial implications; option pricing; financial monitoring; syndicate funding; new roles for the financial and insurance sectors; institutional and multilateral funding; payment mechanisms; concession period determination; risk analysis and management; whole life value methodology; cost comparators and best value; team building, teamwork and skill development. Contributions from Australia, Europe, the Far East, South Africa and the United States together present the current thinking and state-of-the-art approaches to public-private partnerships.

The Business Plan Reference Manual for IT Businesses Jan 30 2020 There is a great worldwide desire to launch new technology-based business. In this sense, and increasingly, entrepreneurship courses have arisen in several universities and many of the courses in the management, administration and engineering areas already offer entrepreneurship curricular units. Throughout those programs, the teams develop key integrated competencies in innovation, entrepreneurship and technology that will ultimately enable the students to create and develop new technology-based businesses. The Business Plan Reference Manual for IT Businesses provides a reference manual for undergraduate and graduate students that intend to launch their start-up business in the IT field. It helps them to create and model the business plan of their business. Therefore, this manual is mainly aimed at instructors who want to offer a practical view of the process of modeling, designing and developing an IT start-up. Additionally, it can be individually used by entrepreneurs who wish to launch their start-up businesses in IT field. The structure of the book was defined taking into account different

approaches to the construction of the business plan, which basically consider a disaggregation of some of these chapters in others smaller (e.g., marketing plan into products/services and market, financial plan into investment plan and economic-financial projections). We chose to aggregate these dimensions into a single chapter, which in our view facilitates the process of analyzing a business plan. It is also relevant to mention the inclusion of "Chapter V - Prototype description" which is innovative and intends to take into account the application of this business plan template to the information technology sector.

Marketing Briefs: A Revision and Study Guide Mar 14 2021 Complementing Dibb and Simkin's established reputation in their field, this text presents a punchy overview of the leading 50 themes of marketing, each concisely summarized for revision purposes or quick-learning. While appealing primarily to students undertaking marketing exams, many practitioners will also find this 'glossary of current marketing' hard to resist. The title builds on the earlier works of Dibb and Simkin, whose Houghton Mifflin text, 'Marketing: Concepts and Strategies', is the current business school market leading text in the United Kingdom, while their Thomson Learning text, 'The Marketing Casebook: Cases and Concepts', has just been revised and is the most widely used marketing casebook. From understanding customers, branding and positioning, relationship marketing, social responsibility through to value-based marketing and one-to-one marketing, this book covers all the issues the modern marketer must address. The text itself is organized into short structured chapters, the Briefs, each including: * Core definitions * A bulleted key point overview * Thorough yet concise explanation of the concept and primary issues * Illustrative examples * A selection of examination style case, essay and applied questions * Recommended further reading and sources. Together these offer a rounded, concise and topical appreciation of each theme within a clear and accessible framework designed to aid revision. Also included are revision tips and 'golden rules' for tackling examinations, specimen examination papers with answer schemes, and a full glossary of key marketing terms.
