Web-Age Information Management Jan 11 2021 Lecture Notes in Computer Science The LNCS series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available. The scope of LNCS, including its subseries LNAI and LNBI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes proceedings (published in time for the respective conference) post-proceedings (consisting of thoroughly revised final full papers) research monographs (which may be based on outstanding Phi) work, research projects, technical reports, etc.) More recently, several color-cover sublines have been added featuring, beyond a collection of papers, various added-value components; these sublines include tutorials (textbook-like monographs or collections of lectures given at advanced courses) state-of-the-art surveys (offering complete and mediated coverage of a topic) hot topics (introducing emergent topics to the broader community)

Safety-I and Safety-II Aug 06 2020 Safety has traditionally been defined as a condition where the number of adverse outcomes was as low as possible (Safety-I). From a Safety-I perspective, the purpose of safety management is to make sure that the number of accidents and incidents is kept as low as possible, or as low as is reasonably practicable. This means that safety management must start from the manifestations of the absence of safety and that - paradoxically - safety is measured by counting the number of cases where it fails rather than by the number of cases where it succeeds. This unavoidably leads to a reactive approach based on responding to what goes wrong or what is identified as a risk - as something that could go wrong. Focusing on what goes right, rather than on what goes wrong, changes the definition of safety from 'avoiding that something goes wrong' to 'ensuring that everything goes right'. More precisely, Safety-II is the ability to succeed under varying conditions, so that the number of intended and acceptable outcomes is as high as possible. From a Safety-II perspective, the purpose of safety management is to ensure that as much as possible goes right, in the sense that everyday work achieves its objectives. This means that safety is managed by what it achieves (successes, things that go right), and that likewise it is measured by counting the number of cases where things go right. In order to do this, safety management cannot only be reactive, it must also be proactive. But it must be proactive with regard to how actions succeed, to everyday acceptable performance, rather than with regard to how they can fail, as traditional risk analysis does. This book analyses and explains the principles behind both approaches and uses this to consider the past and future of safety management practices. The analysis makes use of common examples and cases from domains such as aviation, nuclear power production, process management and health care. The final chapters explain the theoretical and practical consequences of the new perspective on the level of day-to-day operations as well as on the level of strategic management (safety culture). Safety-I and Safety-II is written for all professionals responsible for their organisation's safety, from strategic planning on the executive level to day-to-day operations in the field. It presents the detailed and tested arguments for a transformation from protective to productive safety management.

Taxmann's CRACKER for Strategic Financial Management (Paper 2 | SFM) - Covering past exam questions (arranged sub-topic-wise) & answers along with RTPs/MTPs of ICAI for CA Final | Nov 2022 Exam Jan 23 2022 This book is prepared exclusively for the Final Level of Chartered Accountancy Examination requirement. Fuzzy Information & Engineering and Operations Research & Management Nov 28 2019 Fuzzy Information & Engineering and Operations Research & Management is the monograph from submissions by the 6th International Conference on Fuzzy Information and Engineering (ICFIE2012, Iran) and by the 6th academic conference from Fuzzy Information Engineering Branch of Operation Research Society of China (FIEBORSC2012, Shenzhen, China). It is published by Advances in Intelligent and Soft Computing (AISC). We have received more than 300 submissions. Each paper of it has undergone a rigorous review process. Only high-quality papers are included in it containing papers as follows: I Programming and Optimization. II Lattice and Measures. III Algebras and Equation. IV Forecasting, Clustering and Recognition. V Systems and Algorithm. VI Graph and Network. VII Others.

Electronic Document Preparation and Management for CSEC® Examinations Coursebook with CD-ROM May 15 2021 This book

covers the new EDM CSEC syllabus to be taught from September 2011. It introduces computing fundamentals, electronic communication and keyboarding techniques before teaching the Microsoft Office (2003 - 2010) skills required by the course. Next, students are shown several aspects of document preparation, complete with sample documents. After covering document management and ethics, it gives SBA tips and exam papers (with answers included on the CD). Exercises and summaries are found at the end of each chapter. The accompanying CD-ROM is packed with material including interactive revision questions, PowerPoint presentations, tutorial videos, exercise files and a comprehensive glossary.

The Medium-Term Debt Management Strategy Dec 10 2020 This medium-term debt management strategy paper discusses the assessment of recent capacity building. The effective debt management and hence the design and implementation of a debt management strategy depend on the macroeconomic and institutional context, but the connection is two-way: sound debt management is critical to macro and financial stability, and financial and overall development. Within the constraints of the macroeconomic framework, the debt manager has the delicate task of balancing domestic and external sources of financing of various tenors to meet the government funding needs at low over-all cost and contained risk. Sound debt management contributes to reduced macro-financial risks, complementing prudent fiscal management and monetary policy implementation. Debt management contributes to market and institutional development. The debt manager's ability to cover external public financing requirements through external debt issuance and avoid undue bunching of debt service obligations helps reduce crowding out, exchange rate pressures, or large swings in international reserves.

Challenges and Issues facing the Education System in South Africa Dec 30 2019 The quality of education is pivotal for the production of human capital and this cannot be compromised by failing to refocus on the quality of education offered in schools. The inputs in the system such as trained and motivated teachers, buildings and classrooms including sanitation, clean water, instructional material such as textbooks, as well as strong leadership with vision to steer the winds of change are important in providing the desired outcomes. The chapters in this volume are broadly divided into three subsections as follows: learner related issues, (farm and rural schools, poverty and schooling, school violence, and students rights); teacher related issues, (teacher morale and motivation, teachers for all schools, management needs of school principals); and administrative/policy related issues (inclusive education, and school community relations). The social demand for better schools, effective principals, qualified and committed teachers and better opportunities for all place a huge challenge to provinces and the state to protect the rights of all citizens. This volume sets out the challenges facing the education system in South Africa, such as poor school infrastructure, poor learning conditions, and a lack of learning materials and provides recommendations on how some of these can be overcome.
