The 21st Century Mercenary Operations Manual Nov 19 2021 Being a profession as old as mankind itself, the mere word "mercenary" often triggers images of danger, toughness, adventure, deadly skills, sex and money in a life as exotic and unreal as a classic action movie. Often said to no longer exist, rendered obsolete by the multi-million dollar private military companies that reshaped private warfare since 2001, mercenaries in the classic way continued their existence and work without any real change except for a rise in both overall demand and sorts of opportunities to work since the 80s and 90s, when their existence was well documented in photos in the famous publications like "Soldier of Fortune", "Gung Ho" and some of the best of the trade took the time and even write manuals on how to get into that dangerous, demanding and often outright crazy occupation. Seasoned and experienced mercenaries like Paul Balor in his "Manual of the Mercenary soldier" or Frank J. Camper, running his "Mercenary School" and published several books including the original "Mercenary Operations Manual" in 1986 and "Live to spend it" opened that hidden world, together with an opportunity to become a part of it, to anybody dedicated enough to pay the price in sweat, blood, hunger and deprivation. Yet, the changes of our world and its wars together with all the naysayers in the big world claiming the old-school mercenary type to be long vanished, made an update necessary. Here it is. No matter if you're eager to start a full-time career with a gun, want more information about this trade to decide if it's for you or you're only curious, you'll get your answers. Or, maybe you simply want to acquire the skills and know-how of a professional mercenary to improve your chances of protecting those you care about in a world of wars lacking frontlines; wars that don't end on borders in lands far away but instead are fought by enemy forces that might carry out their next attack in a church, a shopping mall or cinema in your hometown! This book's goal is to make sure that you are prepared for participating in any modern war as an independent, single operator - increasing to the maximum your chances to "live to spend it".
