An alien race struggles to survive on an uninhabitable planet in this "impeccably detailed and beautifully thought out" novel from a Hugo Award winner (Kirkus Reviews, starred review). On a planet besieged with cosmic dust, where meteors of all sizes frequently hit, wiping out entire civilizations, a strange alien species struggles against extinction over the course of millennia. As their star grows hotter, melting ice caps and causing more earthquakes and

volcanic eruptions, higher levels of radiation lead to higher rates of mutation. Plants that had been edible become poisonous or die off altogether.

Watching their dire situation only get worse, the planet's scientists finally acknowledge that to survive long-term, the inhabitants will have to abandon their fraught home world and become a space-faring species. In a story that spans millennia, Hugo Award-winning author and British science fiction master John Brunner introduces us to an alien race that takes control of their own evolution and builds the technological

The Crucible Nov
01 2022 "The
Crucible" is a 1952
play by the
American
playwright Arthur
Miller. It is a
dramatization of
the Salem witch
trials that took
place in the
Province of
Massachusetts Bay
during 1692 and
1693. Miller wrote
the play as an
allegory of
McCarthyism, when

in 1956 and
convicted of
"contempt of
Congress" for
refusing to identify
others present at
meetings he had
attended. It was
first performed at
the Martin Beck
Theater on
Broadway on
January 22, 1953.
Miller felt that this
production was too
stylized and cold
and the reviews for
it were largely
hostile (although
The New York
Times noted "a
powerful play in a

performance").
Nonetheless, the
production won the
1953 "Best Play"
Tony Award. A year
later a new

succeeded and the
play became a
classic. It is a

central work in the
canon of American
drama. Fuji Books'

Excerpts from
Nathaniel
