Now he's trying to make a better life for himself. He's trying to stay out of trouble. However, trouble finds him, because someone has summoned a demon in a local park, and he is called in to assist the police in figuring out who did it — that is, if he didn't do it himself. At the same time, he is attempting to make inroads with a handsome young man in the city, the owner of a New Age store in downtown. Mike also assists his cousin who is being stalked by someone — or a group — while fighting off his new boyfriend's ex. And when you think it's over, someone has summoned Lucifer. Santro Aug 08 2020 'There's no business like the car business!' Within months of its launch in late 1998, with every well-known global automobile brand jockeying for a foothold in a small-car market almost monopolized by Maruti Udyog Limited, Hyundai Motor India's debut production, the Santro, emerged as a force to reckon with. The first car to be conceptualized and designed for – and then developed and manufactured in – India, the 'Sunshine Car' has, over a period of sixteen years, set the record for the quickest small car brand to go from zero to one million units sold. It achieved profitability for Hyundai at an unprecedented speed and made an impressive global impact as a made-in-India automobile in markets as diverse as Algeria and Zimbabwe, Western Europe and North America. In *Santro: The Car That Built a Company*, BVR Subbu, who spearheaded much of the Santro's success, reveals the hitherto untold story of how this small car made such a big impact. Vivid anecdotes detail the challenges of introducing a new product in a new market, the canny business strategies that were employed to get the better of rival brands, the unforgettable marketing campaigns that made all the difference – and the thrills of the high-stakes power battles and everyday drama that characterize corporate India. By turns revelatory, insightful and delightfully engaging, this is a business story with a difference about a car like no other.

Lemon-Aid New Cars and Trucks 2012 Jul 07 2020 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki

Professional Communication and Network Interaction Dec 24 2021 Digital technologies and social media have changed the processes, products, and interactions of professional communication, reshaping how, when, with whom, and where business professionals communicate. This book examines these changes by asking: How does rhetorical theory need to adapt and develop to address the changing practices of professional communication? Drawing from classical and contemporary rhetorical theory and from in-depth interviews with business professionals, the authors present a case-based approach for exploring the changing landscape of professional communication. The book develops a rhetorical theory based on networked interaction and rhetorical ethics: seeing professional communication as involving new kinds of networked interactions that require an integrated view of rhetoric and ethics. The book applies this frame to a variety of communication cases involving, for example, employee missteps on social media, corporate-consumer interactions, and the developing use of artificial intelligence agents (AI bots) to handle online communication.
