[New Trends in Software Methodologies, Tools and Techniques](#) Apr 30 2020 Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers the exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and not yet reliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new trends and theories in the direction in which we believe software science and engineering may develop to transform the role of software and science in tomorrow's information society. This publication is an attempt to capture the essence of a new state of art in software science and its supporting technology. It also aims at identifying the challenges such a technology has to master.

[Sword and Citadel](#) Dec 19 2021 Recently voted the greatest fantasy of all time, after *The Lord of the Rings* and *The Hobbit*, Gene Wolfe's *The Book of the New Sun* is an extraordinary epic, set a million years in the future, on an Earth transformed in mysterious and wondrous ways, in a time when our present culture is no longer even a memory. Severian, the central character, is a torturer, exiled from his guild after falling in love with one of his victims, and journeying to the distant city of Thrax, armed with his ancient executioner's sword, Terminus Est. This edition contains the second two volumes of this four volume novel, *The Sword of the Lictor* and *The Citadel of the Autarch*.

[A New Book of Middle Eastern Food](#) Mar 22 2022 'Meticulously collected, compellingly assembled, lovingly told ... informative, delectable and incredibly useful' Yotam Ottolenghi Claudia Roden's *A Book of Middle Eastern Food* is your ultimate cookbook and guide to the rich and exotic recipes of the Middle East. As heard on BBC Radio 4's new 5-part series. First published in 1968, Claudia Roden's bestselling classic *Book of Middle Eastern Food* revolutionized Western attitudes to the cuisines of The Middle East. Containing over 500 modern and accessible recipes that are brought to life with enchanting stories, memories and culinary wisdom, this book takes readers on a cook's tour of countries including Syria, Lebanon, Egypt, Turkey, Greece and Morocco. Inside there's a delicious array of dishes to try: Hot Stuffed Vine Leaves, Sweet and Sour Aubergine Salad, Courgette Meatballs, Persian Lamb, Moroccan Tagine with Fruit and Honey, Hummus, Tabbouleh, Turkish Delight and Coconut Orange Blossom and Lemon Cake. Now in this beautiful new edition, Roden's timeless work will continue to inform and inspire as the next generation of cooks discovers its riches. 'Roden's great gift is to conjure up not just a cuisine but the culture from which it springs' Nigella Lawson

[The Blockchain and the New Architecture of Trust](#) Jul 26 2022 How the blockchain—a system built on foundations of mutual mistrust—can become trustworthy The blockchain entered the world on January 3, 2009, introducing an innovative new trust architecture: an environment in which users trust a system—for example, a shared ledger of information—without necessarily trusting any of its components. The cryptocurrency Bitcoin is the most famous implementation of the blockchain, but hundreds of other companies have been founded and billions of dollars have been invested in similar applications since Bitcoin's launch. Some see the blockchain as offering more opportunities for criminal behavior than benefits to society. In this book, Kevin Werbach shows how a technology resting on foundations of mutual mistrust can become trustworthy. The blockchain, built on open software and decentralized foundations that allow anyone to participate, seems like a threat to any form of regulation. In fact, Werbach argues, law and the blockchain need each other. Blockchain systems that ignore law and governance are likely to fail, or to become outlaw technologies irrelevant to the mainstream economy. That, Werbach cautions, would be a tragic waste of potential. If, however, we recognize the blockchain as a kind of legal technology that shapes behavior in new ways, it can be harnessed to create tremendous business and social value.

[The New North](#) Aug 23 2019 *The New North* is a book that turns the world literally upside down. Analysing four key 'megatrends' - population growth and migration, natural resource demand, climate change and globalisation - UCLA professor Larry Smith projects a world that by mid-century will have shifted its political and economic axes radically to the north. The beneficiaries of this new order, based on a bonanza of oil, natural gas, minerals and plentiful water will be the Arctic regions of Russia, Alaska and Canada, and Scandinavia. Meanwhile countries closer to the equator will face water shortages, aging populations, crowded megacities and coastal flooding. Smith draws on geography, economics, history, earth and climate science, but what makes his arguments so compelling is that he has spent many months exploring the region, talking to people in once-inaccessible Arctic towns, noting their economies, politics and stories.

[Brave New War](#) Apr 11 2021 "For my money, John Robb, a former Air Force officer and tech guru, is the futurists' futurist." —Slate The counterterrorism expert John Robb reveals how the same technology that has enabled globalization also allows terrorists and criminals to join forces against larger adversaries with relative ease and to carry out small, inexpensive actions—like sabotaging an oil pipeline—that generate a huge return. He shows how combating the shutdown of the world's oil, high-tech, and financial markets could cost us the thing we've come to value the most—worldwide economic and cultural integration—and what we must do now to safeguard against this new method of warfare.

[The Book of Why](#) Jan 28 2020 A pioneer of artificial intelligence shows how the study of causality revolutionized science and the world 'Correlation does not imply causation.' This mantra was invoked by scientists for decades in order to avoid taking positions as to whether one thing caused another, such as smoking and cancer and carbon dioxide and global warming. But today, that taboo is dead. The causal revolution, sparked by world-renowned computer scientist Judea Pearl and his colleagues, has cut through a century of confusion and placed cause and effect on a firm scientific basis. Now, Pearl and science journalist Dana Mackenzie explain causal thinking to general readers for the first time, showing how it allows us to explore the world that is and the worlds that could have been. It is the essence of human and artificial intelligence. And just as Pearl's discoveries have enabled machines to think better, *The Book of Why* explains how we can think better.

[Mapping Tourism](#) Jul 22 2019 At first glance, the relationships among tourists, tourism maps, and the spaces of tourism seem straightforward enough: tourists use maps to find their way to and through the sites of history, culture, nature, or recreation represented there. Less apparent is how tourism maps and those using them construct such spaces and identities. As the essays in *Mapping Tourism* clearly demonstrate, the extraordinary interaction of work with leisure and the everyday with the exotic makes tourism maps ideal sites for exploring the contested construction of place and identity. Construction sites in the "New Berlin," Alabama's civil rights trail, Quebec City, a California ghost town, and Bangkok's sex trade are among the spaces the essays examined. Taken together, these essays allow us to see tourist space as it truly is: contested, ever changing, and replete with issues of power.

[The New Heretics of France Oct 17 2021](#) Since the Age of Enlightenment, France has upheld clear constitutional guidelines that protect human rights and religious freedom. Today, however, intolerant attitudes and discriminatory practices towards unconventional faiths have become acceptable and even institutionalized in public life. Susan Palmer offers an insightful examination of France's most stigmatized new religions, or "sectes," and the public management of religious and philosophical minorities by the state. *The New Heretics of France* tracks the mounting government-sponsored anticult movement in the wake of the shocking mass suicides of the Solar Temple in 1994, and the negative impact of this movement on France's most visible religious minorities, whose names appeared on a "blacklist" of 172 sectes commissioned by the National Assembly. Drawing on extensive interviews and field research, Palmer describes the controversial histories of well-known international NRMs (the Church of Scientology, Raelian Movement, and Unificationism) in France, as well as esoteric local groups. Palmer also reveals the partisanship of Catholic priests, journalists, village mayors, and the passive public who support La République's efforts to control minority faiths - all in the name of "Liberty, Equality and Fraternity." Drawing on historical and sociological theory, Palmer analyzes France's war on sects as a strategic response to social pressures arising from globalization and immigration. Her study addresses important issues of religious freedom, public tolerance, and the impact of globalization and immigration on traditional cultures and national character.

[Giambattista Vico and the New Psychological Science Feb 09 2021](#) Giambattista Vico (1668-1744) was an Italian philosopher, rhetorician, and historian. As one of the great thinkers of the Enlightenment, he exerted tremendous influence on the social sciences. He was the first to stress cultural and linguistic dimensions in the development of both the human mind and social institutions. Although his ideas on the relationship between mind and culture and his epistemology have inspired the work of many scholars in psychology, his sizeable influence has been scarcely acknowledged. The volume is organized in two sections. The first locates Vico in his historical context and in the landscape of contemporary human and social sciences. The second part presents those of Vico's concepts that seem promising for the development of a new way of looking at psychological phenomena. In the book's conclusion, Luca Tateo gathers the ideas of the volume's contributors to suggest future development of the psychological sciences. This book aims to show how Vico's insights can inspire future research in the psychological sciences. It collects multidisciplinary contributions of leading international scholars that draw upon the thought of this original thinker. Collectively, the contributors remind us of the legacy and continuing influence of this inspiring historical figure.

[Pegasus and the New Olympians Sep 23 2019](#) Just as Emily is getting used to life as the Flame of Olympus, news from the human world disrupts the peace . . . There's been a Pegasus spotting on Earth. Tornado Warning is as beautiful and mysterious as the mythological winged-stallion, but has been born and bred on Earth. Emily and her friends are determined to find out the truth before Jupiter of Olympus gets involved and fly back to the human world to investigate. Their new mission takes them through the Nevada desert from Area 51 to Las Vegas where they discover a sinister conspiracy. Emily is convinced that they will trace it back to their old enemies - the corrupt governmental agency, the CRU. But what they find is bigger and more dangerous than they ever expected and will pit Olympian against Human in a war of epic proportions. With the fate of two worlds in her hands, Emily must make an impossible choice, otherwise everything she has ever known and loved will be destroyed. Join Emily astride the magnificent winged-stallion, Pegasus, as she embarks on a new flight of adventure through worlds both old and new. '

[The New Cycle and New Finance in China May 24 2022](#) This book is a selection of research by a Chinese economist who explains China's financial system, as well as predicting the future. The selected 45 articles focus on six topics covering diverse levels: China's macroeconomic and financial system, financial institutions, payment and clearing industry, inclusive finance, urbanization and financial supervision. The book builds a brand overview on China's financial development trend in the past recent years and long term.--

[The New Book of Middle Eastern Food Oct 29 2022](#) The definitive volume on Middle Eastern cooking, a modern classic from the award-winning, bestselling author of *The Book of Jewish Food* and Claudia Roden's *Mediterranean* Originally published in 1972 and hailed by James Beard as "a landmark in the field of cookery," this new version represents the accumulation of the author's years of extensive travel throughout the ever-changing landscape of the Middle East, gathering recipes and stories. Now featuring more than 800 recipes, including the aromatic variations that accent a dish and define the country of origin: fried garlic and cumin and coriander from Egypt, cinnamon and allspice from Turkey, sumac and tamarind from Syria and Lebanon, pomegranate syrup from Iran, preserved lemon and harissa from North Africa. Claudia Roden has worked out simpler approaches to traditional dishes, using healthier ingredients and time-saving methods without ever sacrificing any of the extraordinary flavor, freshness, and texture that distinguish the cooking of this part of the world.

Throughout these pages she draws on all four of the region's major cooking styles: • The refined haute cuisine of Iran, based on rice exquisitely prepared and embellished with a range of meats, vegetables, fruits, and nuts • Arab cooking from Syria, Lebanon, and Jordan—at its finest today, and a good source for vegetable and bulgur wheat dishes • The legendary Turkish cuisine, with its kebabs, wheat and rice dishes, yogurt salads, savory pies, and syrupy pastries • North African cooking, particularly the splendid fare of Morocco, with its heady mix of hot and sweet, orchestrated to perfection in its couscous dishes and tagines From the tantalizing mezze—succulent bites of filled fillo crescents and cigars, chopped salads, and stuffed morsels, as well as tahina, chickpeas, and eggplant in their many guises—to the skewered meats and savory stews and hearty grain and vegetable dishes, here is a rich array of Middle Eastern cooking.

[The New Deal and American Society, 1933-1941 Jun 20 2019](#) The New Deal and American Society, 1933-1941 explores what some have labeled the third American revolution, in one concise and accessible volume. This book examines the emergence of modern America, beginning with the 100 Days legislation in 1933 through to the second New Deal era that began in 1935. This revolutionary period introduced sweeping social and economic legislation designed to provide the American people with a sense of hope while at the same time creating regulations designed to safeguard against future depressions. It was not without critics or failures, but even these proved significant in the ongoing discussions concerning the idea of federal power, social inclusion, and civil rights. Uncertainties concerning aggressive, nationalistic states like Italy, Germany, and Japan shifted the focus of FDR's administration, but the events of World War II solidified the ideas and policies begun during the 1930s, especially as they related to the welfare state. The legacy of the New Deal would resonate well into the current century through programs like Social Security, unemployment compensation, workers' rights, and the belief that the federal government is responsible for the economic well-being of its citizenry. The volume includes many primary documents to help situate students and bring this era to life. The text will be of interest to students of American history, economic and social history, and, more broadly, courses that engage social change and economic upheaval.

[New Dark Age Nov 25 2019](#) "New Dark Age is among the most unsettling and illuminating books I've read about the Internet, which is to say that it is among the most unsettling and illuminating books I've read about contemporary life." - New Yorker As the world around us increases in technological complexity, our understanding of it diminishes. Underlying this trend is a single idea: the belief that our existence is understandable through computation, and more data is enough to help us build a better world. In reality, we are lost in a sea of information, increasingly divided by fundamentalism, simplistic narratives, conspiracy theories, and post-factual politics. Meanwhile, those in power use our lack of understanding to further their own interests. Despite the apparent accessibility of information, we're living in a new Dark Age. From rogue financial systems to shopping algorithms, from artificial intelligence to state secrecy, we no longer understand how our world is governed or presented to us. The media is filled with unverifiable speculation, much of it generated by anonymous software, while companies dominate their employees through surveillance and the threat of automation. In his brilliant new work, leading artist and writer James Bridle surveys the history of art, technology, and information systems, and reveals the dark clouds that gather over our dreams of the digital sublime.

throwing light on many of the questions formerly posed by religion

The New Temple and the Second Coming Jun 13 2021 An array of new archaeological finds and revealing discoveries in the ancient city hidden beneath Jerusalem lead to a stunning conclusion: The generation alive today will witness the return of Christ. The evidence—uncovered by prophecy expert Grant R. Jeffrey—is breathtaking: Jewish authorities are preparing to rebuild the Temple in Jerusalem. Quietly they have recovered lost artifacts from the ancient Temple and have recreated sacred worship vessels. The new Sanhedrin, now reconvened in Israel, is training Levite priests to reinstitute animal sacrifice. These remarkable developments have far-reaching prophetic significance. In this book you will examine the biblical prophecies and research data that together solve end-times mysteries, including: ·The search for lost Temple treasures ·Revealing discoveries in underground Jerusalem ·The process of recreating sacred Temple vessels ·Unexpected clues revealed in the Copper Scroll and the Ezekiel Tablets ·The latest plans for rebuilding the Temple Join Dr. Jeffrey as he uncovers answers to questions that have perplexed students of prophecy for centuries. Answers that point to the unmistakable conclusion that this is truly the last generation.

Revelation Oct 05 2020 The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self.

The New Despotism Mar 10 2021 A disturbing in-depth exposé of the antidemocratic practices of despotic governments now sweeping the world. One day they'll be like us. That was once the West's complacent and self-regarding assumption about countries emerging from poverty, imperial rule, or communism. But many have hardened into something very different from liberal democracy: what the eminent political thinker John Keane describes as a new form of despotism. And one day, he warns, we may be more like them. Drawing on extensive travels, interviews, and a lifetime of thinking about democracy and its enemies, Keane shows how governments from Russia and China through Central Asia to the Middle East and Europe have mastered a formidable combination of political tools that threaten the established ideals and practices of power-sharing democracy. They mobilize the rhetoric of democracy and win public support for workable forms of government based on patronage, dark money, steady economic growth, sophisticated media controls, strangled judiciaries, dragnet surveillance, and selective violence against their opponents. Casting doubt on such fashionable terms as dictatorship, autocracy, fascism, and authoritarianism, Keane makes a case for retrieving and refurbishing the old term "despotism" to make sense of how these regimes function and endure. He shows how they cooperate regionally and globally and draw strength from each other's resources while breeding global anxieties and threatening the values and institutions of democracy. Like Montesquieu in the eighteenth century, Keane stresses the willing complicity of comfortable citizens in all these trends. And, like Montesquieu, he worries that the practices of despotism are closer to home than we care to admit.

The New Deal and the Problem of Monopoly Sep 28 2022 The massive depression of the 1930's detonated the crisis between harsh reality and the vision of material abundance and economic security created by the American industrial order. Amid widespread poverty there was increasing concentration of economic power and loss of individual initiative. Professor Hawley traces the pattern of this conflict. He analyzes the National Recovery Administration, the sources and nature of the antitrust ideology, the rise of Keynesianism, the confusion within the Roosevelt Administration during the recession of 1937-38, and the government career of Thurman Arnold. Attention is given to the administrators of the New Deal and to the beliefs, pressures, and symbols that affected their policy decisions. How and why these ideas and pressures produced policies that were economically inconsistent yet politically workable is also explained. Originally published in 1966. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Born to Buy Aug 27 2022 Examines advertising strategies that promote consumerism from the earliest ages, offering advice to parents and teachers on how to reverse the damaging effects of commercialism on developing children.

The New York Times Book of the Dead Jun 25 2022 The obituary page of The New York Times is a celebration of extraordinary lives. This groundbreaking package includes 300 obits in the book with exclusive online access to 10,000 more of the most important and fascinating obituaries the Times has ever published. The obituary page is the section many readers first turn to not only see who died, but to read some of the most inspiring, insightful, often funny, and elegantly written stories celebrating the lives of the men and women who have influenced our world. William McDonald, The Times' obituary editor who was recently featured in the award-winning documentary *Obit*, selected 320 of the most important and influential obits from the newspaper's archives. In chapters like "Stage and Screen," "Titans of Business," "The Notorious," "Scientists and Healers," "Athletes," and "American Leaders," the entries include a wide variety of newsmakers from the last century and a half, including Annie Oakley, Theodore Roosevelt, Joseph Stalin, Marilyn Monroe, Coco Chanel, Malcolm X, Jackie Robinson and Prince. Also included is a web-key which allows instant access to an exclusive website featuring 10,000 selected obituaries which are easily searchable by name, theme, dates, and more. Designed with more than 150 black-and-white photographs, this tomb-sized book plus website package is the perfect gift.

The New Woman in Print and Pictures Feb 21 2022 Although feminist women have existed throughout history, the term "New Woman" wasn't officially coined until 1894, when British novelists began to address the concept of the New Woman through discussions of female suffrage, dress reform, women's advances toward more legal rights, birth control, sexual freedom, and women working outside the home. This annotated bibliography includes original novels and articles printed from 1894 to 1944, the era most closely associated with the New Woman. It includes all period novels with a New Woman protagonist and all period articles with the New Woman as primary subject, along with several poems, cartoons, advertisements, and artworks. The bibliography also includes critical literature published worldwide from the 1960s to 2008 that examines the primary material included in the first section. Because the New Woman was the target of many derisive articles, poems, and visual works, these critical response pieces are included.
