modern fundamentals of the theory of finance, Corporate Finance, Eighth Canadian Edition, presents corporate finance as the collaboration of a small number of integrated and powerful institutions. Ross develops the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and uses them to explain corporate finance with a balance of theory and application. The Eighth Canadian Edition has been thoroughly updated to include current examples, mini-cases and problem material that will help students understand and apply the material.

Finance: Core was developed for the graduate (MBA) level as a concise, up-to-date, and to-the-point product, the majority of which can be realistically covered in a single term or course.

To achieve the objective of reaching out to the many different types of students and the varying course settings, corporate finance is distilled down to its core, while maintaining a decidedly modern approach. Purely theoretical issues are downplayed, and the use of extensive and elaborate calculations is minimized to illustrate points that are either intuitively obvious or of limited practical use. The goal was to focus on what students really need to carry away from a principles course. A balance is struck by introducing and covering the essentials, while leaving more specialized topics to follow-up courses. Net present value is treated as the underlying and unifying concept in corporate
