Angle of Attack Nov 05 2022 Real-life Black Ops veteran Leo J. Maloney launches an electrifying new series featuring Alex Morgan, daughter of legendary operative Dan Morgan and a formidable force in her own right. ANGLE OF ATTACK Alex Morgan's new mission for Zeta plunges her into a web of danger threatening Europe's glamorous Formula One racing circuit. It quickly escalates into a race against time to track down a missing supply of weapons-grade plutonium headed for North America. From a secret prison in Iran to the glittering casinos of Monaco, to the jungles of Malaysia, and to the dark side of Montreal, Alex is up against a deadly and far-reaching conspiracy. Each step of the way, she's dogged by a shadowy figure determined to destroy her. Alex has the grit to deal with any external threat, but this is a new kind of peril from a source shockingly close to home—one that will make Alex question everything she once believed... Praise for Leo J. Maloney and His Novels "Fine writing and real insider knowledge." —Lee Child "Rings with authenticity." —John Gilstrap "Everything a thriller reader wants." —Ben Coes "The new master of the modern spy game." —Mark Sullivan "A ripping story!" —Meg Gardiner

Storm Front Mar 29 2022 The second installment in acclaimed Black-Ops thriller author Leo J. Maloney's spin-off series featuring Alex Morgan, daughter of Zeta operative Dan Morgan. STORM FRONT Ares, an insidious challenger to the Zeta group, is sowing conflict around the world, orchestrating an explosive endgame. Identifying the next target as a cruise ship on the Coral Sea, Zeta sends undercover operatives Alex Morgan and Alicia Schmitt to avert catastrophe. Infiltrating the crew and passengers is easy for the skilled agents—but also for the fortified and highly trained extremists, who topple security and gain control of the ship. The attackers' demands: inconceivable. Their threats:

immediate. As a massive storm bears down off the Australian coast, Alex and Alicia are outnumbered, outgunned, and out to sea. In full chaos mode, Alex shores up her last defenses, unaware that someone close to her could shift the odds in her favor—or against her. Ares has every advantage in this operation, but they have overlooked one key thing. Never underestimate a Zeta agent . . . especially one whose last name is Morgan. Praise for Leo J. Maloney and His Novels “Utterly compelling.” —Jeffery Deaver “Fine writing and real insider knowledge.” —Lee Child “Rings with authenticity.” —John Gilstrap “A ripping story!” —Meg Gardiner “The new master of the modern spy game.” —Mark Sullivan

Nam, A Photographic History Jun 07 2020 Both military and press photographers as well as soldiers and civilians recorded on film the harrowing events of the Vietnam War. From French Indochina to the fall of Saigon and on to the war's aftermath, from casualties to prisoners to protestors back home, NAM features the images and stories that document this important era. With 700 fully captioned images supported by an expert historical account of the course of the war, this wide-ranging book provides an unflinching portrait of the longest conflict ever fought by U.S. armed forces. The Vietnam War is without doubt one of the most significant events in the history of the United States. It remains the longest conflict ever fought by the U.S. armed forces and the longest war in modern history. More

than 50,000 U.S. servicemen lost their lives during the struggle in Southeast Asia, but numbers alone cannot convey the impact of the war on the world's most powerful democracy. The tensions it created and the passions it unleashed threatened to tear the fabric of U.S. society asunder. The war shattered one president's dreams of a new society and destroyed the career of another. Carefully researched, minutely detailed, illustrated with hundreds of historical photographs, many in color, and with maps by the celebrated military cartographer Richard Natkiel, *NAM: A Photographic History* is both a fascinating recapitulation of the war, exactly as the world experienced it, and an important work of reference for laymen and scholars alike.

Two Cultures of Policing Feb 13 2021 The emergence and functioning of two competing and sometimes conflicting cultures within police departments demonstrates how competition between street cops and "bosses" is at the heart of the organizational dilemma of modern urban policing. Unlike other works in this field that focus on the monolithic culture or familial quality of policing, this study demonstrates that which might look cohesive from the point of view of outsiders has its own internal dynamics and conflicts. The book shows that police departments are not immune to the conflict inherent in any large-scale bureaucracy, when externally imposed management schemes for increasing efficiency and effectiveness are imposed on an existing social organization. Based upon two years of extensive field work, in which the author covered every major aspect of policing at the precinct level in the New York City police department from manning the complaint desk to riding in squad cars. Ianni shows how the organized structure of the police department is disintegrating. The new "Management Cop Culture" is bureaucratically juxtaposed to the precinct level "Street Cop Culture," and bosses' loyalties to the social and political networks of management cops rather than to the men on

the street causes a sharp division with grave consequences for the departments. The study concentrates on a series of dramatic events, such as the suicide of a police officer charged with corruption, a major riot, and the trial of an officer accused of killing a prisoner while in police custody. Ianni traces how these events affected relationships among fellow officers and between officers and "bosses."

Classification and Regression Trees Feb 25 2022 The methodology used to construct tree structured rules is the focus of this monograph. Unlike many other statistical procedures, which moved from pencil and paper to calculators, this text's use of trees was unthinkable before computers. Both the practical and theoretical sides have been developed in the authors' study of tree methods. *Classification and Regression Trees* reflects these two sides, covering the use of trees as a data analysis method, and in a more mathematical framework, proving some of their fundamental properties.

Black Skies Jan 15 2021 The Black Ops veteran and "master of the modern spy game" takes readers inside a global conspiracy to destroy the United States in this military thriller (Mark Sullivan). First, a team of Navy SEALs wiped out in a surprise attack. Then, a motorcade of dignitaries is

ambushed—and the US Secretary of State is abducted. Coordinated and flawlessly executed, this is no random act of terror. A vision of evil unprecedented in scope has been triggered . . . The enemy will not stop until the skies over America are black with death and destruction. CIA veterans Dan Morgan and Peter Conley—code names Cobra and Cougar—are America's last chance at averting an unthinkable scenario of bloodshed . . . "A ripping story—rough, tough, and entertaining." —Meg Gardiner

Secondary Analysis of Electronic Health Records Apr 05 2020 This book trains the next generation of scientists representing different disciplines to leverage the data generated during routine patient care. It formulates a more complete lexicon of evidence-based recommendations and support shared, ethical decision making by doctors with their patients. Diagnostic and therapeutic technologies continue to evolve rapidly, and both individual practitioners and clinical teams face increasingly complex ethical decisions. Unfortunately, the current state of medical knowledge does not provide the guidance to make the majority of clinical decisions on the basis of evidence. The present research infrastructure is inefficient and frequently produces unreliable results that cannot be replicated. Even randomized controlled trials (RCTs), the traditional gold standards of the research reliability hierarchy, are not without limitations. They can be costly, labor intensive, and slow, and can return results that are seldom generalizable to every patient population. Furthermore, many pertinent but unresolved clinical and medical systems issues do not seem to have attracted the interest of the research enterprise, which has come to focus instead on cellular and molecular investigations and single-agent (e.g., a drug or device) effects. For clinicians, the end result is a bit of a “data desert” when it comes to making decisions. The new research infrastructure proposed in this book will help the medical profession to make ethically sound and well informed decisions for their patients.

Termination Orders Aug 10 2020 *Termination Orders* is based on the author's missions in *Black Ops*. Hero Dan Morgan is simultaneously hunted by a double-crossing CIA and Congress, vengeful foreign agents, a corporate drug ring, the Taliban, and narco-terrorists ... a you-are-there action thriller of torture, assassination, betrayals, and revenge, where nothing is as it seems.

War and Peace Dec 14 2020 Hailed as one of the greatest novels of all time and a classic of world literature, *War and Peace* is a tale of strivers in a world fraught with conflict, social and political change, and spiritual confusion, Tolstoy's magnificent work continues to entertain, enlighten, and inspire readers around the world. Both an intimate study of individual passions and an epic history of Russia and its people, 'War and Peace' is nothing more or less than a complete portrait of human existence. Among its many unforgettable characters is Prince Andrey Bolkonsky, a proud, dashing man who, despising the artifice of high society, joins the army to achieve glory. Badly wounded at Austerlitz, he begins to discover the emptiness of everything to which he has devoted himself. His death scene is considered one of the greatest passages in Russian literature. Terror swiftly engulfs the country as Napoleon's army marches on Russia, and the lives of three young people are changed forever. The stories of quixotic Pierre, cynical Andrey and impetuous Natasha interweave with a huge cast, from aristocrats and peasants, to soldiers and Napoleon himself. In *War and Peace* (1868-9), Tolstoy entwines grand themes—conflict and love, birth and death, free will and fate.

The Wife Desired Sep 22 2021 The role of the girl in life is the most glamorous and fascinating in all the world. To the nomads of the East she is the "little gazelle" and to the Japanese the "plum blossom." In the Book of Proverbs she is the "dearest hind and most agreeable fawn." Jewels, sapphires and rubies, are her eyes and lips. The softness of a spring morning are in her words. Her smile is as the splendor of the rising sun. Of all the creatures in the world she is made by God the most beautiful. She is the incarnation and summation of all the flowers of nature. No man ever spoke more truth than when he whispered into the ear of his beloved that she was divine. She is an image, a spark of divinity given to us in life as a preview of things to come. She is yielding, helpless, yet divine. To whom God has

given much, from her much is expected. Of no other creature is so much demanded. She is to be the helpmate of man the mother of his children. She is to keep his home to comfort him in loneliness and weariness, and to bring him back to health when sick. This appraisal of the part a girl plays in life may seem to some flattering. Yet, it is sincerely made. Actually this judgment of the ladies is more challenging than flattering, for what girl could fail to desire to measure up to this appraisal in the eyes of her husband? Countless young wives have merited from their husbands the esteem that they were the most glamorous and fascinating creatures in all the world. Unfortunately too many girls have failed to do so, and thus experience the misery of an unhappy, if not broken, marriage. The purpose of this book is to show the girl, the young wife how she may easily have success and happiness in marriage, being in the eyes of her husband “the dearest hind and most agreeable fawn.” This classic includes the following chapters: 1. The Wife Desired Is an Inspiration to Her Husband 2. The Wife Desired Has Personality 3. The Wife Desired Is Patient 4. The Wife Desired Is a Physical Being 5. The Wife Desired Has a Sense of Humor 6. The Wife Desired Is a Companion to Her Husband 7. The Wife Desired Is Religious

The Three Questions Sep 10 2020 With his stunning watercolors -- and text that resounds with universal truths, award-winning artist Jon J Muth has transformed a story by Tolstoy into a timeless fable for young readers. What is the best time to do things? Who is the most important one? What is the right thing to do? Nikolai knows that he wants to be the best person he can be, but often he is unsure if he is doing the right thing. So he goes to ask Leo, the wise turtle. But it is Nikolai's own response to a stranger's cry for help that leads him directly to the answers he is looking for. Jon J Muth combined his studies of Zen with his love for Tolstoy to create this profound, yet simple book about compassion and living in the moment.

The Allied Resupply Effort in the China-Burma-India Theater During World War II Jul 09 2020 Japan's attack on Pearl Harbor in 1941 secured for Chiang Kai-shek's Chinese Nationalist forces what no amount of pleading had been able to produce: an influx of U.S. supplies. This volume explores the strategies of the Allies in China, Burma and India in World War II and the politically charged campaign waged in that theater. After an overview of the Allied situation in early 1942, the work presents the personal accounts of six individuals who served as part of the resupply effort in the CBI theater: Captain Edward Goodman, Captain David C. Hall, Staff Sergeant Robert Boehm, Corporal Anthony R. Silva, Corporal Alexander McVean and Tech Sergeant Kenneth R. Quigley. The service of African Americans in the CBI theatre is also discussed in detail. Appendices contain information on the organization of a motor transport truck regiment in Persia during World War II and an extract from

a December 1944 log of an Air Jungle Rescue Unit in Burma.

Rational Empires Nov 24 2021 The nineteenth century marked the high point of imperialism, when tsarist Russia expanded to the Pacific and the sun was said never to set on the British Empire. Imperialism remains a perennial issue in international relations today, and nowhere is this more evident than in the intensifying competition for global resources. Leo J. Blanken explains imperialism through an analysis of the institutions of both the expanding state and its targets of conquest. While democratic states favoring free trade generally resort to imperialism only to preempt aggressive rivals—or when they have reason to believe another state’s political institutions will not hold up when making bargains—authoritarian states tend toward imperialism because they don’t stand to benefit from free trade. The result is three distinct strategies toward imperialism: actors fighting over territory, actors peaceably dividing territory among themselves, and actors refraining from seizing territory altogether. Blanken examines these dynamics through three case studies: the scramble for Africa, the unequal treaties imposed on Qing Dynasty China, and the evolution of Britain’s imperial policy in India. By separating out the different types of imperialism, Blanken provides insight into its sources, as well as the potential implications of increased competition in the current international arena.
