An Unbroken Educational Apartheid Legacy Aug 20 2019 This is a thought-provoking book on the black-white academic achievement gap in Chicago's predominantly black communities of color and what highly effective school boards can do to change it. In this book, the reader will be powerfully enlightened by a civil and human rights debate that

calls for effective leadership in our schools, beginning with effective school boards. The primary agenda of effective school boards is raising student achievement performance levels and engaging the school district community to attain that goal. These instructive analyses of effective school board leadership builds on the research and wisdom of great leaders. Simultaneously, it develops a breath of fresh air for school reformers who seek to implement a new model and escape the insanity and pathology inherent in school board dysfunctions and violations of our civil and human rights which prevents progress in Chicago's south suburban communities of color. In both highs and lows of awesome moments, as educational reform leaders and school board members, we are in a strategic leadership position to help school boards carry out their essential responsibilities for creating equity and excellence in public education. In doing so, highly effective school leaders can team with our school board leaders to lead our school district communities in preparing all students to succeed in a rapidly changing global society. School board members doing the same things over and over again and then expecting different results in academic outcomes is the definition for insanity. Education is freedom. In an era of mass educational apartheid with its consequent mass incarceration of blacks that has surpassed the enforced chattel bondage of slavery's peak numbers in 1860, this book addresses a subject that is critically essential, timely, and in need of immediate attention for the security, success, and ultimate survival of black America. As the problems of the academic under-achievement gap is addressed in this book, it is also essential that school boards, educators, and community and national leaders accept reality, to view the problem in its true perspective, to contemplate it as it is, in providing essential solutions toward removing limiting and limited school boards' dysfunctions, obstructions, and other barriers to academic achievement in effective school board leadership. Supporting educational excellence will thereby produce more African American scholars in mathematics, science, and in many other disciplines. This book will provide information and focus on some key action areas that successful school boards in America and around the world have focused their attention on: Vision, Standards, Assessment, Resource Alignment, Climate, Collaboration, and Continuous Academic Improvement.

Quarterly Review of Distance Education Jul 11 2021 The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research

briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group.

Success in Practical/Vocational Nursing Nov 03 2020 Using an engaging, interactive, 1-2-3 approach, this text helps you develop problem-solving skills that will be useful throughout your nursing career. Active participation and application of critical thinking are utilized through questions, quizzes, and self-assessments to provide you with practical and efficient aids to learning. You will also discover learning strategies, tips on taking the NCLEX-PN®, guidance on the job search, and an in-depth discussion of supervision, delegation, assignment of tasks, and the distinctions among them. An LPN Threads Series title. UNIQUE! 1-2-3 approach in a clear, simple, engaging writing style instructs you in what you need to do and how to do it. UNIQUE! Learning Exercises challenge you to imagine, visualize, and think outside the box. UNIQUE! Leadership Activities provide exercises to practice and develop leadership skills and Leadership Hints provide helpful pointers to follow and remember when in various leadership situations. UNIQUE! Management Tools and Management Hints provide practical instructions, resources, and tips to use when in a management situation. UNIQUE! Offers time-management tips to help prioritize. Integrates wellness and personal care throughout the text, including information and coping skills for stress management and burnout, nutrition and exercise, the impaired nurse, and co-dependency. Includes separate chapters on "Ethics Apply to Nursing" and "Nursing and the Law" that address pertinent legal and ethical issues that directly and indirectly affect LPN/LVNs. Features information on Medicare and the many changes that affect health care, including health care settings, medication coverage, and the costs of managed care. Includes a separate chapter on learning strategies for the adult student and updated approaches for traditional and returning students. A separate chapter on critical thinking and many critical thinking exercises promotes the development of critical thinking and problem solving skills in both academic and personal situations. Includes updated State Boards of Nursing and Internet Resources Appendixes with the most up-to-date addresses for nursing boards and website addresses for nursing, medical, and health-related information as an all-in-one ready resource for you as you prepare to enter the work world. UNIQUE! Keep In Mind boxes located in each chapter introduce readers to the underlying theme in the chapter. UNIQUE! Evolve Student Resources includes 230 NCLEX Exam-Style Interactive Questions per chapter, with correct response and rationales for both correct and incorrect responses, to encourage self-study and review. UNIQUE! The "Learning During School, for the NCLEX-PN, and Beyond"

chapter includes new content on the role of simulation in nursing education and etiquette for electronic device use, such as cell phones and iPods. UNIQUE! The "Personal Health Promotion" chapter helps you provide a positive role model for patients with new content on MyPyramid, the benefits of exercise, personal steps to help prevent hospital-acquired infections, burnout versus stress, and tips for personal safety. UNIQUE! Culture content has been expanded content addressing the growing needs of patient care for special populations and to help students develop cultural sensitivity. Includes the latest protocols from NAPNES regarding standards of practice and educational competencies that LPN/LVN nursing students need to know.

Neo-Confucianism Nov 22 2019 Solidly grounded in Chinese primary sources, *Neo Confucianism: Metaphysics, Mind, and Morality* engages the latest global scholarship to provide an innovative, rigorous, and clear articulation of neo-Confucianism and its application to Western philosophy. Contextualizes neo-Confucianism for contemporary analytic philosophy by engaging with today's philosophical questions and debates Based on the most recent and influential scholarship on neo-Confucianism, and supported by primary texts in Chinese and cross-cultural secondary literature Presents a cohesive analysis of neo-Confucianism by investigating the metaphysical foundations of neo-Confucian perspectives on the relationship between human nature, human mind, and morality Offers innovative interpretations of neo-Confucian terminology and examines the ideas of eight major philosophers, from Zhou Dunyi and Cheng-Zhu to Zhang Zai and Wang Fuzhi Approaches neo-Confucian concepts in an penetrating yet accessible way

Models for Quantifying Risk, Sixth Edition Jun 29 2020 This book is used in many university courses for SOA Exam MLC preparation. The Fifth Edition is the official reference for CAS Exam LC. The Sixth Edition of this textbook presents a variety of stochastic models for the actuary to use in undertaking the analysis of risk. It is designed to be appropriate for use in a two or three semester university course in basic actuarial science. It was written with the SOA Exam MLC and CAS Exam LC in mind. Models are evaluated in a generic form with life contingencies included as one of many applications of the science. Students will find this book to be a valuable reference due to its easy-to-understand explanations and end-of-chapter exercises. In 2013 the Society of Actuaries announced a change to Exam MLC's format, incorporating 60% written answer questions and new standard notation and terminology to be used for the exam. There are several areas of expanded content in the Sixth Edition due to these changes. Six important changes to the Sixth Edition: WRITTEN-ANSWER EXAMPLES This edition offers additional written-answer examples in order to better prepare the reader for the new SOA exam format. NOTATION AND TERMINOLOGY CONFORMS TO EXAM MLC MQR 6 fully incorporates all standard notation and terminology for exam MLC, as detailed by the SOA in their

document Notation and Terminology Used on Exam MLC. MULTI-STATE MODELS Extension of multi-state model representation to almost all topics covered in the text. FOCUS ON NORTH AMERICAN MARKET AND ACTUARIAL PROFESSION This book is written specifically for the multi-disciplinary needs of the North American Market. This is reflected in both content and terminology. PROFIT TESTING, PARTICIPATING INSURANCE, AND UNIVERSAL LIFE MQR 6 contains an expanded treatment of these topics. THIELE'S EQUATION Additional applications of this important equation are presented, to more fully prepare the reader for exam day. A separate solutions manual with detailed solutions to all of the text exercises is also available. Please see the Related Items Tab for a direct link I selected Models for Quantifying Risk as the text for my class. Given that the syllabus had changed quite dramatically from prior years, I was looking for a text that would cover all the material in the new syllabus in a way that was rigorous, easy to understand, and would prepare students for the May 2012 MLC exam. To me, the text with the accompanying solutions manual does precisely that. --Jay Vadiveloo, Ph.D., FSA, MAAA, CFA, Math Department, University of Connecticut I found that the exposition of the material is thorough while the concepts are readily accessible and well illustrated with examples. The book was an invaluable source of practice problems when I was preparing for the Exam MLC. Studying from it enabled me to pass this exam." -- Dmitry Glotov, Math Department, University of Connecticut "This book is extremely well written and structured." -- Kate Li, Student, University of Connecticut "Overall, the text is thorough, understandable, and well-organized. The clear exposition and excellent use of examples will benefit the student and help her avoid 'missing the forest for the trees'. I was impressed by the quality and quantity of examples and exercises throughout the text; students will find this collection of problems sorted by topic valuable for their exam preparation. Overall, I strongly recommend the book." -- Kristin Moore, Ph.D., ASA, University of Michigan

New Avenues for Electronic Publishing in the Age of Infinite Collections and Citizen Science: Scale, Openness and Trust Aug 12 2021 Research and scholarly communication is increasingly seen in the light of open science, making research processes and results more accessible and collaborative. This brings with it the chance to better connect research and society by introducing new avenues for engagement with citizens. This book presents the proceedings of the 19th International Conference on Electronic Publishing (Elpub), held in Valetta, Malta, in September 2015. This year's conference explores the interplay of two dimensions of electronic publishing - the ever growing volume of digital collections and the improved understanding of the widest user group, citizens. This exciting theme encompasses human, cultural, economic, social, technological, legal, policy-related, commercial, and other relevant aspects. Echoing the conference agenda, the book

covers a wide range of topics, including engagement with citizens and professionals, enhanced publishing and new paradigms, discovery and digital libraries, open access and open science, as well as the use and reuse of data. Addressing the most recent developments in these areas, the book will be of interest to practitioners, researchers and students in information science, as well as users of electronic publishing.

The War against Al-Qaeda and Islamic State Sep 01 2020 Dr.

Kamolnick's book is a meticulously documented investigation and comparison of the al-Qaeda and the Islamic State across three key strategically relevant dimensions: essential doctrine, beliefs, and worldview; strategic concept, including terrorist modus operandi; and in the final chapter, specific implications, and recommendations for current U.S. Government policy and strategy. Contents: Belief-System, Creed, Worldview, Doctrine The Al-Qaeda Organization Sunni Islamic Orthodoxy Sunni-Salafism/"Fundamentalism" The Muwahhidun/Wahhabism/Salafi-Wahhabism Muslim Brotherhood-Salafi-Wahhabi The "Base of the Jihad"; Al-Qaeda From Qa'idat Al-Jihad to Bin Ladenism From Bin Ladenism Back to Qa'idat Al-Jihad Post-Arab Spring Qa'idat Al-Jihad "What is Qa'idat Al-Jihad?" In a Nutshell: Fazul Abdullah and Adam Gadahn III. Islamic State Organization "Zarqawism" vs. AQO: Abu Musab Al-Zarqawi's Worldview and Doctrine: 1989-June 7, 2006 From Non-Religious Violent Street Tough to Ultra-Sectarian Salafi-Wahhabi Jihadist Prison Tough: 1980-1999 Al-Zarqawi's Private Jihassist Armies of the Levant: 1999-2004 The History, Doctrines, and Worldview of Abu Bakr Al-Baghdadi's "Caliphate": From ISI to the Caliphate: Brief Organizational History Self-Proclaimed Emir Al-Muminin Abu Bakr Al-Hussaini Al-Qurayshi Al-Baghdadi: The Caliphate Now! The "Final Solution" to the "Shia Problem" Terrorist Modus Operandi Terrorist Quadrangle Analysis The Al-Qaeda Organization The "Classical" Base First Bin Ladenist Lone Mujahid" "Far Enemy" Strategy Islamic State Conclusions, Implications, and Recommendations for U.S. Government Key Findings Belief-Systems, Worldviews, Doctrines, Creeds Strategies and Terrorist Modus Operandi Implications for U.S. Government Policy and Strategies Implications for Existing USG Policy and Strategy to Permanently Defeat AQ and its Affiliates Implications for Existing USG Policy and Strategy to Permanently Defeat the IS

Factories of the Future Jun 10 2021 This book is open access under a CC BY 4.0 license. This book presents results relevant in the manufacturing research field, that are mainly aimed at closing the gap between the academic investigation and the industrial application, in collaboration with manufacturing companies. Several hardware and software prototypes represent the key outcome of the scientific contributions that can be grouped into five main areas, representing different perspectives of the factory domain: 1) Evolutionary and reconfigurable factories to cope with dynamic production contexts

characterized by evolving demand and technologies, products and processes.2) Factories for sustainable production, asking for energy efficiency, low environmental impact products and processes, new de-production logics, sustainable logistics.3) Factories for the People who need new kinds of interactions between production processes, machines, and human beings to offer a more comfortable and stimulating working environment.4) Factories for customized products that will be more and more tailored to the final user's needs and sold at cost-effective prices.5) High performance factories to yield the due production while minimizing the inefficiencies caused by failures, management problems, maintenance. This book is primarily targeted to academic researchers and industrial practitioners in the manufacturing domain.

Research in Chemistry Education Sep 13 2021 This volume emphasizes the role of chemical education for development and, in particular, for sustainable development in Africa, by sharing experiences among specialists across the African continent and with specialists from other continents. It considers all areas and levels of chemistry education, gives specific attention to known major challenges and encourages explorations of novel approaches. The chapters in this book describe new teaching approaches, approach-explorations and in-class activities, analyse educational challenges and possible ways of addressing them and explore cross-discipline possibilities and their potential benefits for chemistry education. This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide.

A Companion to the Anthropology of Environmental Health Jan 17 2022 A Companion to the Anthropology of Environmental Health presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world. Features the latest ethnographic research from around the world related to the multiple impacts of the environment on health and of societies on their environments Includes contributions from international medical anthropologists, conservationists, environmental experts, public health professionals, health clinicians, and other social scientists Analyzes the conditions of cultural and social transformation that accompany environmental and ecological impacts in all areas of the world Offers critical perspectives on theoretical and methodological advancements in the anthropology of environmental health, along with future directions in the field

Computer-Assisted Language Learning: Concepts, Methodologies, Tools, and Applications Jan 25 2020 In a diverse society, the ability to cross communication barriers is critical to the success of any individual personally, professionally, and academically. With the constant acceleration of course programs and technology, educators are

continually being challenged to develop and implement creative methods for engaging English-speaking and non-English-speaking learners. **Computer-Assisted Language Learning: Concepts, Methodologies, Tools, and Applications** is a vital reference source that examines the relationship between language education and technology and the potential for curriculum enhancements through the use of mobile technologies, flipped instruction, and language-learning software. This multi-volume book is geared toward educators, researchers, academics, linguists, and upper-level students seeking relevant research on the improvement of language education through the use of technology.

Teaching Macroeconomics with Microsoft Excel® Jul 31 2020 Humberto Barreto shows professors how to teach macroeconomic models and incorporate data using Microsoft Excel® with free files and videos.

Driving Innovation and Business Success in the Digital Economy Oct 14 2021 Advancements in the digital world are bringing about rapid waves of change in organizational management. As such, it is increasingly imperative to discover ways for businesses to adapt to changes in the markets and seize various digital market opportunities. **Driving Innovation and Business Success in the Digital Economy** is an essential reference source for the latest research on the impact of digital computing and emerging technological innovations in the realm of business success. Featuring extensive coverage across a range of relevant perspectives and topics, such as IT outsourcing, sustainable development and online advertising, this publication is ideally designed for researchers, professionals and students seeking current research on the complex scope of the new economy.

Artificial Intelligence and Legal Analytics Sep 25 2022 This book describes how text analytics and computational models of legal reasoning will improve legal IR and let computers help humans solve legal problems.

ICICKM2014-Proceedings of the 11th International Conference on Intellectual Capital, Knowledge Management and Organisational Learning Jan 05 2021 These proceedings represent the work of researchers participating in the 11th International Conference on Intellectual Capital, Knowledge Management & Organisational Learning - ICICKM 2014, which this year is being held at The University of Sydney Business School, The University of Sydney, Australia. The Conference Co-Chairs are Dr John Dumay from Macquarie University, Sydney, Australia and Dr Gary Oliver from the University of Sydney, Australia. The conference will be opened with a keynote by Goran Roos, Advanced Manufacturing Council, Adelaide, Australia who will address the topic of "Intellectual capital in Australia: Economic development in a high cost economy." The second day will be opened with a from James Guthrie, University of Sydney, Australia on the topic of "Intellectual Capital and the Public Sector Research: Past, Present, and Future."

Does Higher Education Teach Students to Think Critically? Apr 08 2021

There is a discernible and growing gap between the qualifications that a university degree certifies and the actual generic, 21st-century skills with which students graduate from higher education. By generic skills, it is meant literacy and critical thinking skills encompassing problem solving, analytic reasoning and communications competency.

Landscape Theory in Design Jun 17 2019 Phenomenology, Materiality, Cybernetics, Palimpsest, Cyborgs, Landscape Urbanism, Typology, Semiotics, Deconstruction - the minefield of theoretical ideas that students must navigate today can be utterly confusing, and how do these theories translate to the design studio? Landscape Theory in Design introduces theoretical ideas to students without the use of jargon or an assumption of extensive knowledge in other fields, and in doing so, links these ideas to the processes of design. In five thematic chapters Susan Herrington explains: the theoretic groundings of the theory of philosophy, why it matters to design, an example of the theory in a work of landscape architecture from the twentieth and twenty-first centuries, debates surrounding the theory (particularly as they elaborate modern and postmodern thought) and primary readings that can be read as companions to her text. An extensive glossary of theoretical terms also adds a vital contribution to students' comprehension of theories relevant to the design of landscapes and gardens. Covering the design of over 40 landscape architects, architects, and designers in 111 distinct projects from 20 different countries, Landscape Theory in Design is essential reading for any student of the landscape.

Sequence Analysis and Related Approaches Dec 24 2019 This open access book provides innovative methods and original applications of sequence analysis (SA) and related methods for analysing longitudinal data describing life trajectories such as professional careers, family paths, the succession of health statuses, or the time use. The applications as well as the methodological contributions proposed in this book pay special attention to the combined use of SA and other methods for longitudinal data such as event history analysis, Markov modelling, and sequence network. The methodological contributions in this book include among others original propositions for measuring the precarity of work trajectories, Markov-based methods for clustering sequences, fuzzy and monothetic clustering of sequences, network-based SA, joint use of SA and hidden Markov models, and of SA and survival models. The applications cover the comparison of gendered occupational trajectories in Germany, the study of the changes in women market participation in Denmark, the study of typical day of dual-earner couples in Italy, of mobility patterns in Togo, of internet addiction in Switzerland, and of the quality of employment career after a first unemployment spell. As such this book provides a wealth of information for social scientists interested in quantitative life course analysis,

and all those working in sociology, demography, economics, health, psychology, social policy, and statistics.

Blended Learning: Concepts, Methodologies, Tools, and Applications

May 29 2020 Traditional classroom learning environments are quickly becoming a thing of the past as research continues to support the integration of learning outside of a structured school environment. Blended learning, in particular, offers the best of both worlds, combining classroom learning with mobile and web-based learning environments. *Blended Learning: Concepts, Methodologies, Tools, and Applications* explores emerging trends, case studies, and digital tools for hybrid learning in modern educational settings. Focusing on the latest technological innovations as well as effective pedagogical practice, this critical multi-volume set is a comprehensive resource for instructional designers, educators, administrators, and graduate-level students in the field of education.

Sudden Justice Jun 22 2022 Explores the secretive history of the United States' use of armed drones and their key role not only on today's battlefields, but also in a covert targeted killing project that has led to the deaths of thousands. There is a covert war, one in which drones scour the skies of Yemen, Pakistan and Somalia in search of militant and terrorist targets

Advanced Statistical Methods in Data Science Jul 23 2022 This book gathers invited presentations from the 2nd Symposium of the ICSCA-CANADA Chapter held at the University of Calgary from August 4-6, 2015. The aim of this Symposium was to promote advanced statistical methods in big-data sciences and to allow researchers to exchange ideas on statistics and data science and to embrace the challenges and opportunities of statistics and data science in the modern world. It addresses diverse themes in advanced statistical analysis in big-data sciences, including methods for administrative data analysis, survival data analysis, missing data analysis, high-dimensional and genetic data analysis, longitudinal and functional data analysis, the design and analysis of studies with response-dependent and multi-phase designs, time series and robust statistics, statistical inference based on likelihood, empirical likelihood and estimating functions. The editorial group selected 14 high-quality presentations from this successful symposium and invited the presenters to prepare a full chapter for this book in order to disseminate the findings and promote further research collaborations in this area. This timely book offers new methods that impact advanced statistical model development in big-data sciences.

Al-Qaeda & Islamic State: History, Doctrine, Modus Operandi and U.S. Strategy to Degrade and Defeat Terrorism Conducted in the Name of

Sunni Islam Feb 06 2021 Dr. Kamolnick's book is a meticulously documented investigation and comparison of the al-Qaeda and the Islamic State across three key strategically relevant dimensions:

essential doctrine, beliefs, and worldview; strategic concept, including terrorist modus operandi; and in the final chapter, specific implications, and recommendations for current U.S. Government policy and strategy. Contents: Belief-System, Creed, Worldview, Doctrine The Al-Qaeda Organization Sunni Islamic Orthodoxy Sunni-Salafism/"Fundamentalism" The Muwahhidun/Wahhabism/Salafi-Wahhabism Muslim Brotherhood-Salafi-Wahhabi The "Base of the Jihad"; Al-Qaeda From Qa'idat Al-Jihad to Bin Ladenism From Bin Ladenism Back to Qa'idat Al-Jihad Post-Arab Spring Qa'idat Al-Jihad "What is Qa'idat Al-Jihad?" In a Nutshell: Fazul Abdullah and Adam Gadahn III. Islamic State Organization "Zarqawism" vs. AQO: Abu Musab Al-Zarqawi's Worldview and Doctrine: 1989-June 7, 2006 From Non-Religious Violent Street Tough to Ultra-Sectarian Salafi-Wahhabi Jihadist Prison Tough: 1980-1999 Al-Zarqawi's Private Jihassist Armies of the Levant: 1999-2004 The History, Doctrines, and Worldview of Abu Bakr Al-Baghdadi's "Caliphate": From ISI to the Caliphate: Brief Organizational History Self-Proclaimed Emir Al-Muminin Abu Bakr Al-Hussaini Al-Qurayshi Al-Baghdadi: The Caliphate Now! Scientific Approach Principle for New Resilient Coastal Landscape Design Oct 22 2019 Due to recent climate change, the character of environmental regional planning has shifted to address the anticipated extreme increases in sea level rise. As such, this project, based on existing scientific research/data, proposes a spatial, habitable landscape architectural solution as a model for flood mitigation for the East coastal edge. This proposal tests the potential for resilient coastal landscapes through a particular site located on Revere Beach, along with the New England coast in Massachusetts. The study demonstrates how through new public spaces designed to renew and protect the beach and the broader offshores, residents and visitors will be able to engage with this 21st Century, resilient beachfront. Also, residents and visitors will experience sophisticated efficient flood alleviation strategies during natural successive storm events. The inherent goal of this proposal is to create an innovative design intervention, which applies new principles of resiliency to the coastal landscape through a technical and cultural solution, and which can be a replicable model for global coastal edges elsewhere. Revitalizing Revere Beach, Ma is a case study to mitigate floods based

on Bernoulli 's principle. This proposal projects an idea of connecting puddles with fissures a set of "Flute Channels", which is my innovation design approach to transfer water from coast to wetland behind it. It helps to lower down the sea level in high tides and sudden tides. Retrofitting Revere Beach as a case study for flood Mitigate with a New Resilient Coastal Landscape approach started to study the watershed of the East Coast that includes three parts of North, Mid-Atlantic, and South Atlantic. Each has a flow that moves up and then inward to the east, in a concave pattern precipitated scale toward the north caused by the velocity of currents. In compare to the Pacific coast, this figuration came to appears as the convex pattern as the currents also are affected differently based on the climate and the land used materials. The project focused on how to manipulate waves and the currents to preserve the land figuration and creates the natural coastal landscape. Geo Technical research and scientific data is the fundamental study that I got the benefit of understanding the exact waves motion, density, velocity of water and how the different type of currents affect the land shape. My project is translating the science into landscape architecture. Earth and ocean are not sustainable- they're dynamic, they're shifting, they're changing the landscape and coast components; land-used material as such salty sand beaches and ripple effects of waves affect the land in different ways. My hypothesis idea of retrofitting coastal landscape backs to its natural creation, which will be a combination of four components of barrier islands, bay or lagoon, thumb-lands or forelands and wetlands. These four figurations are shaped based on different wave motions and currents. I discovered two scales of the solution. Short and long term phasing. For the long term, I suggested floating island, which I examined it by the different objects adding to the coral reef at the Revere Beach. Objective, found a missing part of coastal components, the floating islands. And, Flute Channel was innovative design approached by science data of Bernoulli's principle. In this term, water transferred from coast to the wetlands behind it. The connected containers science data was a combination solution to this creation. Due to recent climate change, the character of environmental regional planning has shifted to address the anticipated extreme increases in sea level rise. As such, this project, based on existing scientific research/data, proposes a spatial, habitable landscape architectural solution as a model for flood mitigation for the East coastal edge. This proposal tests the potential for resilient coastal landscapes through a particular site located on Revere Beach, along with the New England coast in Massachusetts. The study demonstrates how through new public spaces designed to renew and protect the beach and the broader offshores, residents and visitors will be able to engage with this 21st Century, resilient beachfront. In compare to the Pacific coast, this figuration came to appears as the convex pattern as the currents also are affected differently based on the climate and the land used materials. The project focused on how to manipulate waves and the currents to preserve the land figuration and creates the natural coastal landscape. Geo Technical research and scientific data is the fundamental study that I got the benefit of understanding the exact waves motion, density, velocity of water and how the different type of currents affect the land shape. My project is translating the science into landscape architecture. Earth and ocean are not sustainable- they're dynamic, they're shifting, they're changing the landscape and coast components; land-used material as such salty sand beaches and ripple effects of waves affect the land in different ways. My hypothesis idea of retrofitting coastal landscape backs to its natural creation, which will be a combination of four components of barrier islands, bay or lagoon, thumb-lands or forelands and wetlands. These four figurations are shaped based on different wave motions and currents. I discovered two scales of the solution. Short and long term phasing. For the long term, I suggested floating island, which I examined it by the different objects adding to the coral reef at the Revere Beach. Objective, found a missing part of coastal components, the floating islands. And, Flute Channel was innovative design approached by science data of Bernoulli's principle. In this term, water transferred from coast to the wetlands behind it. The connected containers science data was a combination solution to this

creation. Due to recent climate change, the character of environmental regional planning has shifted to address the anticipated extreme increases in sea level rise. As such, this project, based on existing scientific research/data, proposes a spatial, habitable landscape architectural solution as a model for flood mitigation for the East coastal edge. This proposal tests the potential for resilient coastal landscapes through a particular site located on Revere Beach, along with the New England coast in Massachusetts. The study demonstrates how through new public spaces designed to renew and protect the beach and the broader offshores, residents and visitors will be able to engage with this 21st Century, resilient beachfront. Also, residents and visitors will experience sophisticated efficient flood alleviation strategies during natural successive storm events. The inherent goal of this proposal is to create an innovative design intervention, which applies new principles of resiliency to the coastal landscape through a technical and cultural solution, and which can be a replicable model for global coastal edges elsewhere. Revitalizing Revere Beach, Ma is a case study to mitigate floods based on Bernoulli 's principle. This proposal projects an idea of connecting puddles with fissures a set of "Flute Channels", which is my innovation design approach to transfer water from coast to wetland behind it. It helps to lower down the sea level in high tides and sudden tides. Retrofitting Revere Beach as a case study for flood Mitigate with a New Resilient Coastal Landscape approach started to study the watershed of the East Coast that includes three parts of North, Mid-Atlantic, and South Atlantic. Each has a flow that moves up and then inward to the east, in a concave pattern precipitated scale toward the north caused by the velocity of currents. In compare to the Pacific coast, this figuration came to appears as the convex pattern as the currents also are affected differently based on the climate and the land used materials. The project focused on how to manipulate waves and the currents to preserve the land figuration and creates the natural coastal landscape. Geo Technical research and scientific data is the fundamental study that I got the benefit of understanding the exact waves motion, density, velocity of water and how the different type of currents affect the land shape. My project is translating the science into landscape architecture. Earth and ocean are not sustainable- they're dynamic, they're shifting, they're changing the landscape and coast components; land-used material as such salty sand beaches and ripple effects of waves affect the land in different ways. My hypothesis idea of retrofitting coastal landscape backs to its natural creation, which will be a combination of four components of barrier islands, bay or lagoon, thumb-lands or forelands and wetlands. These four figurations are shaped based on different wave motions and currents. I discovered two scales of the solution. Short and long term phasing. For the long term, I suggested floating island, which I

examined it by the different objects adding to the coral reef at the Revere Beach. Objective, found a missing part of coastal components, the floating islands. And, Flute Channel was innovative design approached by science data of Bernoulli's principle. In this term, water transferred from coast to the wetlands behind it. The connected containers science data was a combination solution to this creation.

Recent Trends and Future Technology in Applied Intelligence Apr 20 2022 This book constitutes the thoroughly refereed proceedings of the 31st International Conference on Industrial, Engineering and Other Applications of Applied Intelligent Systems, IEA/AIE 2018, held in Montreal, QC, Canada, in June 2018. The 53 full papers and 33 short papers presented were carefully reviewed and selected from 146 submissions. They are organized in the following topical sections: constraint solving and optimization; data mining and knowledge discovery; evolutionary computation; expert systems and robotics; knowledge representation, machine learning; meta-heuristics; multi-agent systems; natural language processing; neural networks; planning, scheduling and spatial reasoning; rough sets, Internet of Things (IoT), ubiquitous computing and big data; data science, privacy, and security; intelligent systems approaches in information extraction; and artificial intelligence, law and justice.

Unresolved Border, Land and Maritime Disputes in Southeast Asia Oct 02 2020 In Unresolved Border, Land and Maritime Disputes in Southeast Asia the authors shed light on unresolved and lingering territorial disputes in Southeast Asia and their reflection in current inter-state relations in the region, applying a wider regional and comparative perspective.

Normativity Jul 19 2019 What should I do? What should I think? Traditionally, ethicists tackle the first question, while epistemologists tackle the second. Philosophers have tended to investigate the issue of what to do independently of the issue of what to think, that is, to do ethics independently of epistemology, and vice versa. This collection of new essays by leading philosophers focuses on a central concern of both epistemology and ethics: normativity. Normativity is a matter of what one should or may do or think, what one has reason or justification to do or to think, what it is right or wrong to do or to think, and so on. The volume is innovative in drawing together issues from epistemology and ethics and in exploring neglected connections between epistemic and practical normativity. It represents a burgeoning research programme in which epistemic and practical normativity are seen as two aspects of a single topic, deeply interdependent and raising parallel questions.

The Flipped College Classroom Mar 27 2020 This book provides a descriptive, progressive narrative on the flipped classroom including

its history, connection to theory, structure, and strategies for implementation. Important questions to consider when evaluating the purpose and effectiveness of flipping are answered. The book also highlights case studies of flipped higher education classrooms within five different subject areas. Each case study is similarly structured to highlight the reasons behind flipping, principles guiding flipped instructions, strategies used, and lessons learned. An appendix that contains lesson plans, course schedules, and descriptions of specific activities is also included.

What is this Thing Called Metaethics? Sep 20 2019 Are moral standards relative? Are there moral facts? What is goodness? If there moral facts are how do we learn about them? These are all questions about metaethics, the branch of ethics that studies ethical properties, statements, attitudes and judgements. To the uninitiated it can appear abstract and far removed from its two more brash cousins, ethical theory and applied ethics, yet it is one of the fastest-growing and most exciting areas of ethics. What is this thing called Metaethics? demystifies this important subject and is ideal for students coming to it for the first time. Beginning with a brief historical overview of metaethics Matthew Chrisman introduces and assesses the following key topics: moral reality: including questions about naturalism and non-naturalism, moral facts, and the distinction between realism and antirealism; moral language: does language represent reality? What mental states are expressed by moral statements? moral psychology: Hume's theory of motivation and the connection between moral judgement and motivation; moral knowledge: including moral disagreement, the distinction between internalist and externalist theories of knowledge, and theories of objectivity and relativism in metaethics; nonnaturalism; expressivism; error-theory; naturalism; contemporary theories and arguments in metaethics, including Derek Parfit, Simon Blackburn, John McDowell, Christine Korsgaard and Alan Gibbard; new directions in metaethics, such as 'metaepistemology' and 'metanormative theory'.

Strengthening Teaching and Learning in Research Universities Dec 16 2021 This book offers a range of approaches and specific examples of how a sample of internationally leading research-intensive universities, from a variety of regions around the world, work to improve teaching and learning. It describes and analyzes broad university initiatives and approaches that have the potential of driving institution-wide change processes in teaching and learning, thus providing a link between strategic ambitions and cultural transformation in the universities. Globally, research-intensive universities are increasingly pressured to increase their performance in both research and education. However, while much focus internationally has been devoted to how universities are working to boost their research performance, less is known about how

internationally leading universities are working to improve teaching and learning. Through comparative cases drawn from universities in Europe, Asia and the US, key practices and lessons are identified and showcased providing a unique insight into the ways internationally leading research universities work to support and enhance staff engagement in teaching and learning. It will be essential reading for researchers and advanced students working in Higher Education and Sociology, particularly those with an interest in comparative studies.

Psychiatry Review for Canadian Doctors May 21 2022 Reinforce the knowledge, skills and confidence you need to excel in your certification exams. Ensure you're ready for the psychiatry certification exams, both written and oral, offered by the Royal College of Physicians and Surgeons of Canada. Psychiatry Review for Canadian Doctors is the only guide written specifically for the needs of residents studying for the RCPSC psychiatry exams. Psychiatry Review for Canadian Doctors also offers robust extra preparation for other exams, including the psychiatry-resident-in-training exam and certification exams in the United States, the United Kingdom, Australia and New Zealand. Features four practice multiple-choice exams (200 questions total) and 20 OSCE scenarios. Covers all the main topics and question formats you'll find on the exams. Provides answer keys with detailed explanations and list of references for follow-up.

Implementation and Critical Assessment of the Flipped Classroom Experience Apr 27 2020 In the past decade, traditional classroom teaching models have been transformed in order to better promote active learning and learner engagement. Implementation and Critical Assessment of the Flipped Classroom Experience seeks to capture the momentum of non-traditional teaching methods and provide a necessary resource for individuals who are interested in taking advantage of this pedagogical endeavor. Using narrative explanations and foundation materials provided by experienced instructors, this premier reference work presents the benefits and challenges of flipped methodology implementation in today's classroom to educators and educational administrators across all disciplines and levels.

Innovative Solutions for Building Community in Academic Libraries Nov 15 2021 The library has always been an essential part of the collegiate experience, providing students with access to knowledge and literature. However, as virtual services and online learning become more prominent within collegiate environments, the ways students conduct research and access resources has been altered. Innovative Solutions for Building Community in Academic Libraries examines new methods librarians use to engage both on-campus and online users in library services, taking into account the significant impacts of online learning on students' interaction with library resources. Focusing on various outreach practices, techniques of literacy instruction, and the utilization of library spaces, this research-

supported book is a pivotal reference source for distance educators, program planners, academics, and library professionals interested in new ways to attract users to library services.

Mathematical Recreations from the Tournament of the Towns May 09 2021
Mathematical Recreations from the Tournament of the Towns contains the complete list of problems and solutions to the International Mathematics Tournament of the Towns from Fall 2007 to Spring 2021. The primary audience for this book is the army of recreational mathematicians united under the banner of Martin Gardner. It should also have great value to students preparing for mathematics competitions and trainers of such students. This book also provides an entry point for students in upper elementary schools. Features Huge recreational value to mathematics enthusiasts Accessible to upper-level high school students Problems classified by topics such as two-player games, weighing problems, mathematical tasks etc.

The Limits of EUrope Dec 04 2020 Over recent years, a series of challenges including Brexit and the rise of Euroscepticism, have manifested in landmark moments for European integration. First published as a special issue of *Global Discourse*, this edited collection investigates whether these crises are isolated phenomena or symptoms of a deeper malaise across the EU.

Mainstreaming passive houses Feb 24 2020 The passive house concept has become increasingly popular in the building sector in the last twenty years and is deemed to play an important role in aligning the housing sector with climate and environmental policy objectives. However, for such buildings to play this part they need to be more widespread, more common and more accepted by mainstream actors and institutions. The deployment of passive houses involves changes and adaptations in different parts of society. It involves changes in institutional and organisational set-ups, and it involves market and regulatory changes. Previous research on passive houses has focused on demonstration projects or has taken for granted that a dissemination will lead to a full-scale transition of the building sector. This puts undue focus on emerging actors and technologies emerging in isolation. This thesis investigates the wider deployment of passive houses with a focus on mainstreaming. This means that focus is on different social arenas where the deployment of passive houses is negotiated between multiple actors. This thesis contributes to a comprehensive picture of how passive house deployment is shaped through a study of attempts to mainstream these buildings in Sweden. It shows how such attempts have been partially successful in specific companies and regions, but it also shows how a normalization of these buildings has been limited due to market, regulatory, and political developments Possivhuskonceptet har blivit allt populärare under de senaste tjugo åren och bedöms spela en viktig roll för att anpassa bostadssektorn till klimat- och miljöpolitiska mål. För att sådana byggnader ska kunna göra skillnad

måste de dock få en större utbredning och bli accepterade av etablerade aktörer och institutioner. Utbyggnaden av passivhus innebär förändringar och anpassningar i olika delar av samhället. Dessa innefattar institutionella och organisatoriska förändringar, samt marknadsförändringar och en anpassad lagstiftning. Tidigare forskning har framförallt studerat demonstrationsprojekt eller hur tagit för givet att en spridning av passivhus kommer att leda till en fullskalig omställning av byggsektorn. Detta lägger otillbörligt fokus på nya aktörer och tekniker som utvecklats utan bredare social förankring. Denna avhandling studerar utbyggnaden av passivhus med fokus på "mainstreaming". Det innebär att fokus ligger på olika sociala arenor där spridningen av passivhus förhandlas mellan nya och etablerade aktörer. Avhandlingen bidrar till att presentera en övergripande bild av hur passivhusutbyggnad tar form genom en studie av försök att sprida dessa byggnader i Sverige. Avhandlingen visar hur sådana försök delvis har lyckats i specifika företag och regioner, men den visar också hur en normalisering av dessa byggnader har varit begränsad på grund av marknads-, lagstiftnings- och politiska aspekter.

Wiley CPAexcel Exam Review Spring 2014 Study Guide Feb 18 2022 The world's most effective CPA exam prep system - Regulation module Wiley CPAexcel Exam Review is the world's most trusted study guide for the Certified Public Accountant's exam - complete, comprehensive, and updated to align with the latest exam content. With 2,800 practice questions and solutions across four volumes, the unique modular format helps you organize your study program, zeroing in on areas that need work. This volume, Regulation, contains all current AICPA content requirements, providing total coverage of this section of the exam. You get the detailed outlines and study tips, simulation and multiple choice questions, and skill-building problems that have made this guide the most effective CPA prep system for over thirty years. The uniform CPA exam is updated annually to include new laws, regulations, and guidelines, so it's important that your study guide be up to date as well. Wiley CPAexcel Exam Review is updated annually to reflect the latest version of the exam, and is the number-one bestselling CPA study guide in the world because it provides full, comprehensive coverage of all exam content, and more practice questions than any other guide - many of which are taken directly from past exams. The unique format allows you to: Identify, target, and master problem areas section by section Learn how to logically build your knowledge stores for better recall Practice with thousands of sample questions taken from past exams Review all exam content, including the newest guidelines and regulations No one wants surprises on exam day, and thorough preparation is the key to successful performance. Whether you're embarking on a new study program, or just need a quick refresher before the exam, Wiley CPAexcel Exam Review is proven to be the most current, complete, comprehensive prep you can get.

Public Opinion towards the EU Oct 26 2022 This volume investigates the public opinion of the EU in the context of the present economic crisis and other significant challenges currently faced by the Union, the latest being the refugee crisis. Scholarly knowledge in the field of EU attitudes in general and Euroscepticism in particular is thoroughly documented here, and is followed by an analysis of public perceptions of the EU's crisis management capabilities, proving that the EU's legitimacy and effectiveness are currently being challenged to the highest degree. The research-based contribution of this book is two-fold, focusing on EU attitudes at a macro-level on one hand, and the opinions of Romanian experts on the other. It provides insights into attitudes towards the EU in Central and Eastern Europe, a region which is still somewhat underexplored by social sciences scholars, and in Romania in particular. On a larger scale, significant differences between clusters of states are identified, suggesting that not even increasing Euroscepticism manages to create a common frame of reference for all Europeans regarding EU-related issues. In terms of Romanian expert opinion, the book provides evidence for a gradual evolution from highly symbolic and sometimes even triumphalist representations of the EU towards mildly critical positions, based on instrumental perceptions. Such changes mark a new stage of Europeanization, in which the EU's presence has become ordinary. For the Eastern European elite, increased familiarity with the EU accommodates demitization and criticism without denouncing European integration as a doomed project.

Voices of pedagogical development - Expanding, enhancing and exploring higher education language learning Aug 24 2022 *Voices of Pedagogical Development* is a collection of articles written by teacher-researchers at the University of Jyväskylä Language Centre. It shares the fruits of their ideas and development work in the areas of academic literacies, new forms of teaching and learning, and internationalisation. Part one aims at establishing and expanding perspectives on the multilayered and multivoiced reality of pedagogical development in higher education. Part two looks at how practices can be enhanced by engaging teachers, students and other cooperating partners in reflection and development. Part three focuses on exploring perceptions of language, language learning, and literature. As a whole, the collection represents a spectrum of approaches and shows the various stages of pedagogical thinking and perception. It provides insights into pedagogical development in higher education language teaching through an examination of policies, perceptions, and practices.
