Higher Chemistry for CfE is tailored specifically to the extended requirements, teaching approaches and syllabus outlines detailed in the Higher Chemistry revisions for Curriculum for Excellence, to be examined 2015 onwards. A significant proportion of the text is also appropriate for teaching the Revised Higher syllabus being examined 2012-2015. Each section of the book matches a unit of the CfE syllabus; each chapter corresponds to a content area. End-of-course questions, a chemical dictionary and a full index are also provided, with key learning points summarised throughout to help students revise. The book demonstrates the relevance of the chemistry being studied by offering students examples of how the chemical industry applies basic chemistry principles to its everyday operation. A with answers version of the text is also available (978 1444 16752 8). - The only textbook for the Higher Chemistry for CfE syllabus offered by SQA

the skills for Advanced Higher Physics, as well as the knowledge. Concise summaries and diagrams cover the important points for each topic in the latest specification.

Regular examples with worked solutions help you to see if a topic is secure before you move on. This style of active revision is much more effective than simply reading. Formal questions with mark allocations are provided at the end of each topic, reflecting the types of questions you will face in the exam. Hints on how to achieve top marks and avoid mistakes are based on feedback in the examiners' Course Reports, giving you insight into the marking process. Independent study has never been easier with clear explanations, definitions of technical terms and answers to all questions at the back of the book.

Checklists for each topic enable you to benchmark your progress against the assessment standards and make sure you're on track to get the grades you need
