All is Well Jun 04 2020 "Whenever there is a problem, repeat over and over: All is well. Everything is working out for my highest good. Out of this situation only good will come. I am safe." In this healing tour de force, best-selling authors Louise L. Hay and Dr. Mona Lisa Schulz have teamed up for an exciting reexamination of the quintessential teachings from Heal Your Body. All Is Well brings together Louise's proven affirmation system with Mona Lisa's knowledge of both medical science and the body's intuition to create an easy-to-follow guide for health and well-being. And, for the first time ever, they present scientific evidence showing the undeniable link between the mind and body that makes these healing methods work. Bringing focus and clarity to the effects of emotions on the body, All Is Well separates the body into seven distinct groups of organs—or emotional centers—that are connected by their relationship to certain emotions. Structured around these emotional centers, the authors outline common imbalances and probable mental causes for physical illness. They also include case studies that show a complete program for healing that draws from all disciplines, including both traditional and alternative medicine, affirmations, nutritional changes, and so much more. Using the self-assessment quiz, the holistic health advice, and an expanded version of Louise's original affirmation chart, you can learn how to heal your mind and body with affirmations and intuition and live a balanced, healthy life.

*Ethics in Energy Medicine* Sep 27 2019 The first guidebook to discuss the full scope of the intuitive process and propose structures to keep practitioners and clients safe Heidi Light, a family counselor and certified hypnotherapist, asserts that we are in desperate need of guidance and standards so that we can approach the world of intuition, energy, and mysticism from a healthy and respectful place. Drawing from her more than forty years as a medical intuitive, empath, and energy tracker—as well as twenty years as a counselor in private, clinical, and institutional settings—Light offers practical, simple solutions to the alarming lack of boundaries in the fields of intuition and energy medicine. From massage therapists who just throw in a little extra energy work, to psychics who read your sister instead of you, or to practitioners who tell you to take off your clothes, Light shares case studies and vignettes of ethical boundaries mistakenly being crossed. This book explains the traditional psychological model of ethics that counselors and psychologists are taught and outlines an ethical energetics model as a framework for moving through the process of accessing intuitive information and working with energy. Experienced energy workers, those new to the field and just opening to their intuition, and those who come to them for services need to know these ethical guidelines of boundaries and consent.
