Consumer Guide to Home Energy Savings Jul 30 2020 How efficient are front-load washing machines? When is it time to replace your old refrigerator? These questions and many more are answered in *The Consumer Guide to Home Energy Savings*, a one-stop resource for consumers who want to improve their home's energy performance and reduce costs. Zeroing in on the most useful response can be a challenge;

this ninth edition cuts through the confusion. Well-organized and highly readable, *The Consumer Guide to Home Energy Savings* begins with an overview of the interrelationships between energy use, economics, and the environment. Chapters focus on specific areas in the home, such as electronics, lighting, heating, cooling, ventilation, kitchen, and laundry, and provide helpful explanations for each, including: Describing energy use characteristics Drawing comparisons between available technologies Outlining the most cost-effective repair and replacement options Providing step-by-step guidance for finding the right equipment Describing how the equipment operates Summarizing how much energy is used or lost Included are tips on improving existing equipment and guidance for when and why consumers should purchase new energy-efficient equipment, as well as a reminder to check local government and

utility incentives for purchase or retrofit grants. This guide will be an invaluable resource to all consumers concerned about reducing both their energy bills and their environmental impact. Jennifer Thorne Amann is a senior associate in the ACEEE (American Council for an Energy-Efficient Economy) Buildings and Equipment Program. Alex Wilson is president of BuildingGreen, Inc., author of Your Green Home, and executive editor of Environmental Building News.
