euler s laws of motion wikipedia Oct 26 2022 web overview
euler s first law euler s first law states that the rate of change of
linear momentum p of a rigid body is equal to the resultant of all
the external forces f_{ext} acting on the body internal forces
between the particles that make up a body do not contribute to
changing the momentum of the body as there is an equal and
opposite force resulting in no net effect
