[The Network Challenge \(Chapter 24\)](#) Mar 16 2021 Telecommunications is a networked business, yet it traditionally has resisted a network-based view in its strategies and business models. In this chapter, Kevin Werbach explores this paradox, contrasting the worldview of Monists such as AT&T, who see the infrastructure as inseparable from the network, and Dualists such as Google, who see the network and its applications as distinct from the underlying infrastructure. Not surprisingly, AT&T is a proponent of "tiered access" whereas Google argues for "network neutrality." Finally, Werbach examines how a more modular future might bridge the gap between those who seek to own and capitalize on the network and those who

seek to expand it through more neutral offerings.

Capitalism Feb 12 2021 In the most complete, accurate and accessible presentation of Karl Marx's theory of capitalism to date, Johan Fornäs presents a guide for anyone who wants to understand how today's crisis-ridden society has emerged and is able to sustain and intensify its own deep inner contradictions. Capitalism clearly explains these contradictions, which are so relevant again today in the wake of the financial crisis. This clear and engaging guide explains capitalism for absolute beginners. Fornäs situates Marx's ideas in context, remaining faithful to the concepts and structure of his work. This complete introduction to Marx's economy critique covers all three volumes of Capital. It explores all the main aspects of Marx's work - including his economic theory, his philosophical sophistication and his political critique - introducing the reader to Marx's typical blend of sharp arguments, ruthless social reportage and utopian visions. This book will be of interest to students throughout the social sciences and humanities, including those studying sociology, social theory, economics, business studies, history, cultural studies, and politics.
