**First Steps in Random Walks** Sep 08 2020 The name "random walk" for a problem of a displacement of a point in a sequence of independent random steps was coined by Karl Pearson in 1905 in a question posed to readers of "Nature". The same year, a similar problem was formulated by Albert Einstein in one of his Annus Mirabilis works. Even earlier such a problem was posed by Louis Bachelier in his thesis devoted to the theory of financial speculations in 1900. Nowadays the theory of random walks has proved useful in physics and chemistry (diffusion, reactions, mixing flows), economics, biology (from animal spread to motion of subcellular structures) and in many other disciplines. The random walk approach serves not only as a model of simple diffusion but of many complex sub- and super-diffusive transport processes as well. This book discusses the main variants of random walks and gives the most important mathematical tools for their theoretical description.

Handbook of Stress and Academic Anxiety Jun 25 2019 This handbook presents an overview of research on test anxiety and related forms of students' stress and anxiety at schools and other academic environments, and also brings together a series of psychological interventions to prevent and treat anxiety disorders related to academic assessments. Its aim is to inform about strategies that help promote more adaptive behaviors towards academic assessment, as well as discuss other variables (e.g., bullying) that influence test anxiety, a typical stressor at the school and academic environment. These stressors can impair the students' socio-cognitive development, impairing their ability to study and posing a risk to their mental health. The volume is organized in three parts. The first part brings together chapters discussing different variables and processes associated with academic anxiety, such as test anxiety

and social influence, academic motivation, bullying, and procrastination. The second part is completely dedicated to psychological interventions with students designed to promote adaptive coping strategies to deal with academic anxiety and to prevent the development of psychopathologies associated with it. These interventions are based on different approaches, such as cognitive behavioral therapy, acceptance and commitment therapy, analytic behavioral therapy, dialectical behavioral therapy, and mindfulness, among others. Finally, the third part presents strategies that teachers can adopt to manage academic anxiety. The Handbook of Stress and Academic Anxiety: Psychological Processes and Interventions with Students and Teachers will be a valuable resource for school and clinical psychologists, teachers, school managers and policy makers by providing information based on the best scientific evidences to help students cope with academic anxiety, prevent the development of psychopathologies associated with it and promote mental health at schools and other academic environments.

*Academic Writing* Oct 10 2020 This book helps students and researchers write better assignments, better dissertations, and better papers for publication. Characterizing academic writing as an integral part of the knowledge generation and dissemination process, it focuses on three main aspects: understanding research, documenting and sharing the process and results of research, and acknowledging the use of other people's ideas in the documentation. The authors use various samples of good as well as defective writing to illustrate the features of academic writing. They describe in detail the structure and contents of academic papers, especially conceptual and empirical research papers for journals. This lucidly written book will be a rich resource for MBA students and researchers working for MPhil and PhD degrees, especially in the fields of management, behavioural sciences and communications.

**Turning Access Into Success** Dec 12 2020 Teaching is crucial for supporting students' chances of success in higher education, yet often makes limited use of theory to foster contextualized, systemic understandings of access and success. Theorized yet practical ways of empowering university educators are needed to develop their practices and turn access into success for their students. This book harnesses Legitimation Code Theory 'LCT' to inspire university educators to understand, reimagine and create socially just teaching and learning practices. Chapters bring this powerful theory to bear on real-world examples of curriculum design, inclusive practices, cumulative learning, assessment practices, and reflection. Each chapter guides the reader through these cutting-edge ideas, illustrates how they can make real differences in practice, and sets out ways of thinking that educators integrate those ideas into practice. The outcomes will help students access the powerful knowledge and ways of knowing they need for success in higher education.

launch a start-up company • Has a light-hearted and accessible style of a step-by-step guide to help graduate students, post-docs, and faculty learn how to go about spinning out their research from the lab • Includes interviews by faculty in the disciplines of materials science, pharmaceuticals, medical devices, information technology, energy, and mechanical devices – offering tips and discussing potential pitfalls to be avoided

The Art of Academic Advising - The Five-Step Process of Purposeful Advising Mar 03 2020

*Academic English* Jun 05 2020 This book features five theme-based units on cross-disciplinary academic English skills, focusing on the needs of first-year undergraduate students. Each unit covers academic writing, reading and speaking skills. The units progressively take students through the steps needed to complete three common academic assignments: the essay, report and tutorial discussion. These steps include searching for sources, note-taking, establishing personal stance, synthesizing information from multiple sources and structuring academic texts. Each unit also includes opportunities for students to analyze texts, apply their critical thinking skills, try out what they have learnt in productive tasks, as well as reflect upon their progress. It is aimed at first-time university students. Many of the readings in the book are related to China and the broader Asian context. As such, this textbook might appeal to first-year university students in Hong Kong, Mainland China and Taiwan.

Academic Writing Step by Step Aug 20 2021 *Academic Writing Step by Step* offers a new methodology for teaching academic writing informed by discourse analysis and genre theory and by recent research in text analysis. The book draws on accessible articles presenting popular science topics of current interest to illustrate and practice the processes involved in developing and writing an academic essay or research paper step by step. Each unit in *Academic Writing Step by Step* involves the user in guided "hands-on" practical analysis of an exemplar text. This analysis forms the basis for a sequence of learning activities directing students to engage with the text, moving from analysis (reading for intent) to composition (writing with intent). In this structured process, students acquire a critical understanding of the components of research and essay writing to underpin their own writing. Support for students' analysis and writing of texts includes pre-reading, while-reading, and post-reading activities. These activities are linked to practice in the recognition and use of words in context, grammar in context, and distinctive features of text types. Each unit contains many interactive tasks and closes with a substantive writing assignment reinforcing at least one component of academic writing highlighted in the unit. The book is designed as a textbook for academic or research writing courses, and its step-by-step approach makes it usable by university undergraduates or senior secondary students, including those for whom English is a second or foreign language. In addition, its authentic readings and focus on academic and research writing makes it also suitable for graduate level writing courses in English-speaking and English as a second or foreign language contexts.

**Next Steps with Academic Conversations** May 29 2022 "This title examines the benefits and practices of academic conversations and social discourse in grades 3-12. Builds on activities and why academic conversations are important"--

Academic Conversations Jan 25 2022 Where would we be without conversation? Throughout history, conversations have allowed us to see different perspectives, build ideas, and solve problems. Conversations, particularly those referred to in this book as academic conversations, push students to think and learn in lasting ways. Academic conversations are back-and-forth dialogues in which students focus on a topic and explore it by building, challenging, and negotiating relevant ideas. Unfortunately, academic conversations are rare in many classrooms. Talk is often dominated by the teacher and a few students, or it does not advance beyond short responses to the teacher's questions. Even certain teaching approaches and curriculum programs neglect to train students how to maintain a focused, respectful, and thoughtful conversation. To address these challenges, authors Jeff Zwiers and Marie Crawford have identified five core communication skills to help students hold productive academic conversations across content areas. These skills include: elaborating and clarifying, supporting ideas with evidence, building on and/or challenging ideas, paraphrasing, and synthesizing. This book shows teachers how to weave the cultivation of academic conversation skills and conversations into current teaching approaches. More specifically, it describes how to use conversations to build the following: Academic vocabulary and grammar Critical thinking skills such as persuasion, interpretation, consideration of multiple perspectives, evaluation, and application Literacy skills such as questioning, predicting, connecting to prior knowledge, and summarizing Complex and abstract essential understandings in content areas such as adaptation, human nature, bias, conservation of mass, energy, gravity, irony, democracy, greed, and more An academic classroom environment brimming with respect for others' ideas, equity of voice, engagement, and mutual support The ideas in this book stem from many hours of classroom practice, research, and video analysis across grade levels and content areas. Readers will find numerous practical activities for working on each conversation skill, crafting conversation-worthy tasks, and using conversations to teach and assess. Academic Conversations offers an in-depth approach to helping students develop into the future parents, teachers, and leaders who will collaborate to build a better world.

*Academic Leadership Day by Day* May 05 2020 It can seem at times as though all of academic administration today is focused only on the need for continual change and the endless pursuit of "the big idea." But most academic leaders, from department chairs and program directors through university presidents and chancellors, are far too busy helping their institutions flourish for them to divert critical energy and resources to yet another untried theory or management principle. *Academic Leadership Day by Day* takes an entirely different approach to developing your proven academic leadership: It introduces one practical and field-tested idea each day for an entire academic year. Rather than requiring you to devote days or even weeks to administrative training (which may prove to be of little use in the end), this manual gives you no-nonsense suggestions that you can consider on even your busiest days. Experiment with the suggestions made each day, discover what works for you, and then build on your successes for the benefit of your institution and its programs. Significant improvements often result from small, gradual, and consistent efforts, and *Academic Leadership Day by Day* is your guide to becoming a more accomplished, confident academic leader a few minutes at a time.
