Vocabulary and Writing in a First and Second Language Aug 22 2021 Listening to the voices of learners as they write an essay or try to cope with unfamiliar words in a text is a luxury often reserved for researchers. This book observes individuals performing similar tasks in their first and their foreign language and invites readers with an interest in foreign language acquisition to follow the same learners in their efforts to cope in both languages.

Writing and Vocabulary in Foreign Language Acquisition Aug 02 2022 This volume features eight articles on writing and vocabulary acquisitiontwo crucial areas of study in foreign language learning and teaching. Five contributions have come from notable research environments in Canada, Ireland, New Zealand, Poland and Wales. The first section is devoted to studies of writing in a second or a foreign language (L2). The second section deals with vocabulary acquisition illustrating the wide scope of the issues open to investigation.

The Rise of Managerial Bureaucracy Feb 13 2021 The book provides detailed analysis of the structure and operation of the British Civil Service along with a historically grounded account of its development in the period from Margaret Thatcher to the Tony Blair premiership. It assesses continuity and change in the civil service during a period of deep transformation using new archive files, government and parliament reports, primary and secondary legislation. The author takes the evolutionary change of the civil service as a central theme and examines the friction between new managerial practices introduced by government in the 80s and 90s and the administrative traditions rooted in the history of this institution. In particular the author assesses the impact of the New Public Management agenda of the Thatcher and Major years its enhanced continuity during the Blair years. Further changes that involved ministerial responsibility, codification, performance management, special advisers and constitutional conventions are analyzed in the conclusions.

Computers, Children, and Classrooms Jan 03 2020 This study examined the creative uses of computers in elementary schools and their impact on student's confidence and self-esteem, student-student interaction, student-teacher interaction, male and female students, classroom management, the role of the teacher, special education, teacher training, teachers not involved in the study, and curricular areas such as computer literacy, learning Logo as a programming language, problem-solving and problem-creation, mathematics, oral communication, reading and writing, the arts, and values and the individual and society. Findings are based on intensive examinations of real classrooms over a 2-year period. A total of 433 students in 18 classrooms that involved 13 different teachers were studied; of these, 5 teachers and 40 students were involved in the study for 2 years. Classrooms had 1 to 5 computers over the entire school year, or students had access to a computer laboratory. Logo and word processing were studied extensively; the use of a graphics tablet and Musicland were explored for short periods. Findings indicate that the creative use of computers fosters the development of independent and original thinking and that an environment that encourages exploration leads to extensive social interaction among students; in addition, students become more willing to express, refine, or revise their ideas. A significantly greater proportion of students experienced an increase in their confidence and self-esteem if their teacher was able to give them autonomy over their learning. The impact on students' attention span and cognitive development in the special education classes was also significant. Appendices and selected references are provided. (Author/JB)

Policy & Management **British Civil Serv** Jan 15 2021 First published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

Graduate Programs in Engineering & Applied Sciences 2011 (Grad 5) May 07 2020 Peterson's Graduate Programs in Engineering & Applied Sciences contains a wealth of information on colleges and universities that offer graduate degrees in the fields of Aerospace/Aeronautical Engineering; Agricultural Engineering & Bioengineering; Architectural Engineering, Biomedical Engineering & Biotechnology; Chemical Engineering; Civil & Environmental Engineering; Computer Science & Information Technology; Electrical & Computer Engineering; Energy & Power engineering; Engineering Design; Engineering Physics; Geological, Mineral/Mining, and Petroleum Engineering; Industrial Engineering; Management of Engineering & Technology; Materials Sciences & Engineering; Mechanical Engineering & Mechanics; Ocean Engineering; Paper & Textile Engineering; and Telecommunications. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program or department, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.

ICTERI 2021 Workshops Mar 29 2022 This book contains the workshops papers presented at the 17th International Conference on Information and Communication Technologies in Education, Research, and Industrial Applications, ICTERI 2021, held in Kherson, Ukraine, in September-October 2021. The 33 revised full papers and 4 short papers included in this volume were carefully reviewed and selected from 105 initial submissions. The papers are organized according to the following workshops: 9th International Workshop on Information Technology in Economic Research (ITER 2021); 5th International Workshop on Methods, Resources and Technologies for Open Learning and Research (MROL 2021); International Workshop RMSEBT 2021: Rigorous Methods in Software Engineering and Blockchain Technologies; 7th International Workshop on Theory of Reliability and Markov Modeling for Information

Technologies (TheRMIT 2021); 1st Ukrainian Natural Language Processing Workshop (UNLP 2021).

Minority and Cross-Cultural Aspects of Neuropsychological Assessment Sep 03 2022 Minority and cross-cultural psychology is more relevant now than ever in our diverse world. Given the dramatic local and global changes occurring daily with regard to demographics, population changes, and immigration issues, minority and cross-cultural psychology is fast becoming a respected and critical area of scientific study. Pair that with the fact that people of all cultures and racial groups are living longer and experiencing age-related diseases and disorders, one can easily see the need for additional work on issues related to neuropsychological assessment. This new edition brings to the forefront recent developments by seasoned experts in the field. They offer up their newest projects in minority and cross-cultural aspects of neuropsychological assessment and are joined by new, up-and-coming professionals across a wide array of disciplines including psychology, medicine, and neuropsychology. Like the first edition, this updated collection sheds light on the ever-growing need for adequate neuropsychological assessment to a wider subset of individuals, crossing many cultural and minority barriers in the process. Continuously pushing the boundaries of neuropsychological assessment, this collection is essential reading for cognitive and clinical psychologists, and neuropsychologists, and a model text for advanced courses dealing with minority and cross-cultural issues.

Science Education and Information Transfer Nov 12 2020 Science Education and Information Transfer reviews developments in the areas of science education and information transfer. Topics covered include the use of games in science and technology education, transfer of information using readily available technology, and networking. The concepts of global learning and distance learning are also discussed, along with the use of video techniques and computer technology to transfer information. This volume is comprised of 10 chapters and begins with an overview of the information society, the usability of information, and the efficiency of information transfer. The discussion then turns to the use of games to teach science and technology; the most readily available technology for transferring information from teachers to students; and networking as a means to transfer information. The following chapters explore the concept and practice of global learning in the perspective of dissemination of scientific and technological knowledge in response to human needs; the use of microcomputers in the teaching of science; and some of the features of distance learning. The final chapter is devoted to teaching information technology in the classroom. This monograph will be of interest to planners, practitioners, researchers, and other professionals in the field of science education and information technology.

Handbook of Corrosion Data Mar 17 2021 "The purpose of this book is to provide those involved with corrosion of metals and alloys a starting point to quickly and easily assess the recent literature on metals in corrosive environments."--Preface.
