Genetics Education Feb 25 2022 This edited volume presents the current state of the art of genetics education and the challenges it holds for teaching as well as for learning. It addresses topics such as how genetics should be taught in order to provide students with a wide and connected view of the field. It gives in-depth aspects that should be considered for teaching genetics and the effect on the student's understanding. This book provides novel ideas for biology teachers, curriculum developers and researchers on how to confront the presented challenges in a way that may enable them to advance genetics education in the 21st century. It reviews the complexity of teaching and learning genetics, largely overlooked by biology textbooks and classroom instruction. It composes a crucial component of scientific literacy.

Problematic Research Practices and Inertia in Scientific Psychology Apr 17 2021 This volume explores the abiding intellectual inertia in scientific psychology in relation to the discipline's engagement with problematic beliefs and assumptions underlying mainstream research practices, despite repeated critical analyses which reveal the weaknesses, and in some cases complete inappropriateness, of these methods. Such paradigmatic inertia is especially troublesome for a scholarly discipline claiming status as a science. The book offers penetrating analyses of many (albeit not all) of the most important areas where mainstream practices require either compelling justifications for their continuation or adjustments – possibly including abandonment – toward more apposite alternatives. Specific areas of concern addressed in this book include the systemic misinterpretation of statistical knowledge; the prevalence of a conception of measurement at odds with yet purporting to mimic the natural sciences; the continuing widespread reliance on null hypothesis testing; and the continuing resistance within psychology to the explicit incorporation of qualitative methods into its methodological toolbox. Broader level chapters examine mainstream psychology's systemic

disregard for critical analysis of its tenets, and the epistemic and ethical problems this has created. This is a vital and engaging resource for researchers across psychology, and those in the wider behavioural and social sciences who have an interest in, or who use, psychological research methods.

Report of Proceedings of the Tax Conference Mar 17 2021

Water and Peace for the People May 19 2021 This book proposes practical and objective solutions to the entrenched water conflicts in the Middle East. The author reveals and clarifies the complexity of the water conflicts, drawing on years of experience facilitating and chairing water negotiations in the region. The bottom line is: Unless the countries involved co-operate, the consequences will be devastating. The lack of plentiful and clean water for the people will not only result in severe human suffering, but could also have grave geopolitical consequences. The book covers four critical areas: the Euphrates and Tigris Rivers, where new documentation reveals alarming trends; the politically sensitive Golan Heights, with its water disputed by Israel and Syria; the Hasbani water dispute between Lebanon and Israel; the longstanding water resource dispute between the Israelis and Palestinians

Computational Ballistics II Oct 31 2019 This book features most of the papers presented at the International Conference on Computational Ballistics 2005. The contents stress the importance and possibilities of numerical simulation on internal, external and terminal ballistics, to describe, analyse, predict and subsequently reduce the experimental requirements in ballistics.

Europe's Legitimacy Crisis Apr 05 2020 Sharp in focus and succinct in analysis, this Pivot examines the latest developments and scholarly debates surrounding the sources of the European Union's crisis of legitimacy and possible solutions. It examines not only the financial and economic dimensions of the current crisis, but also those crises at the heart of the EU integration project.

Drawdown Oct 24 2021 NEW YORK TIMES BESTSELLER

For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

Business Management for Senior Secondary School

Certificate Exam Nov 12 2020 This book is intended to help students develop a business management culture, which is very important in promoting and sustaining economic development. The book will help students understand principles and procedures of business, and help them acquire the skills necessary to succeed in a business career. The book will also help students prepare for WASSCE examinations and lay the foundation of management principles necessary for advanced management courses. The book is designed to help students recognize and appreciate the principles of business management, develop appropriate ethical attitudes, and generate ideas for the creation of new businesses to accelerate economic development.

Understanding Business Management requires sound knowledge in English Language, Mathematics, Accounting, Management information Systems, Economics, and Environmental Studies, as well as Citizenship Education and Social Studies (at the Basic Education level). A basic knowledge in these related areas of study is very helpful. The book differentiates itself from other Management textbooks in the following respects: First, the book is well organized and structured according to the syllables of WASSCE. Second, the book introduces business ethics that have not received much attention in Management textbooks. Integrating ethics with functional areas of management to analyze business issues enhance the decision-making process. Third, the book assigns standard questions at the end of each chapter with suggested solutions at the end of the book. Finally, each chapter begins with learning outcomes. Students should read the learning outcomes to know what is required for each chapter, and then read the chapter paying particular attention

to the key ideas. After reading the chapters make sure you provide your own solutions to the problems before you check your solutions with the suggested solutions.

Online Student Ratings of Instruction Jul 21 2021 This volume examines the development and growing use of online student ratings and the potential impact online rating systems will have on the future of students' evaluations of teaching. The contributors demonstrate how the preference for online evaluation is growing, even amidst challenges and doubt. Sharing their first-hand experience as researchers and administrators of online systems, they explore major concerns regarding online student ratings and suggest possible solutions. D. Lynn Sorenson and Christian M. Reiner review existing online-rating systems that have been developed independently across the globe. Kevin Hoffman presents the results of a national survey that tracks the increased use of the Internet for student ratings of instruction. At Northwestern University, Nedra Hardy demonstrates how ongoing research about online student evaluations is helping to dispel common misperceptions. Application of online rating systems can present institutions with new challenges and obligations. Trav D. Johnson details a case study based on five years of research in the response rates for one university's online evaluation system and suggests strategies to increase student participation. Reviewing online reporting of results of online student ratings, Donna C. Llewellyn explores the emerging issues of security, logistics, and confidentiality. Other chapters explore existing online systems, highlighting their potential benefits for institution and instructor alike. Beatrice Tucker, Sue Jones, Lean Straker, and Joan Cole

analyze Course Evaluation on the Web (CEW), a comprehensive online system for instructional feedback and improvement. Cheryl Davis Bullock reviews the Evaluation Online (EON) system and its successful role in facilitating midcourse student feedback. The fate of online rating may rest in the unique advantages it may – or may not – have over traditional ratings systems. Debbie E. McGhee and Nana Lowell compare online and paper-based methods through mean ratings, inter-rater reliabilities and factor structure of items. Comparing systems from another angle, Timothy W. Bothell and Tom Henderson examine the fiscal costs and benefits of implementing an online evaluation system over paper-based systems. Finally, Christina Ballantyne considers the prominent issues and thought-provoking ideas for the future of online student ratings raised in this volume. Together, the contributors bring insight and understanding to the processes involved in researching and initiating innovations in online-rating systems. This is the 96th issues of the quarterly journal *New Directions for Teaching and Learning*.

Teaching: Professionalisation, Development and Leadership Aug 29 2019 This book addresses central issues in the professionalisation and deprofessionalisation of teachers. It tackles these issues from different perspectives and in relation to different contexts. The book analyses new managerialism. It also considers possible solutions to two problems in particular: how to achieve accountability without intensification, and how to ensure that school management

and leadership functions to support and enhance teachers as professionals.

The Cloud Traffic Tribulations- Dangers and Suggested Solutions Apr 29 2022 We Know that today's scenario more and more people are opting for cloud computing for their computing needs. One of the benefits is that it will eliminate the risks involved with purchase of a new application. To deliver such high performance computing cloud data centers are equipped with tens to hundreds of thousands of servers delivering applications to millions of users. In such situation network performance must be uninterrupted, highly reliable and faultless with minimum predictable latency for all traffic types. Moreover the cloud network should be aware of flows of various applications. This Book discusses the upcoming traffic dangers arising from cloud computing delivered over public cloud. Along with that the book provides comprehensive solution traffic problems. The Salient Features of the Book are Discussing the currently growing Cloud traffic Requirements to meet the growing traffic needs Current Solutions to traffic Problems Suggested solution Using Technologies like DS field Marking; Use of QoS Protocols; Use of High speed edge Routers; Traffic flow Measurement; Pre Congestion Notification;"

Childhood Obesity Prevention May 07 2020 Childhood obesity is an international public health concern, with a high profile in both the media and government policy. Controversial issues in the prevention of childhood obesity need to be considered early in the development of school, clinical or community prevention programs, as these issues are often the ones that promote the success or failure of attempts to ameliorate the problem at hand. This book combines health education theory, research, and practice to guide researchers, students, educators, community health workers and practitioners in the

prevention of childhood obesity and the promotion of child and adolescent health and well-being. It examines controversy in childhood obesity, including the link with poverty and the difficulty of addressing obesity whilst also tackling the issue of eating disorders. The prevalence of childhood obesity is covered, with international chapters examining the importance of factors such as social class and ethnic differences, and global and local trends are identified. Approaches to prevention are presented, and the book concludes with the successful outcome of various interventions, demonstrating how the whole school community can collaborate to promote health among young people.

Psychological Science Under Scrutiny Sep 10 2020

Psychological Science Under Scrutiny explores a range of contemporary challenges to the assumptions and methodologies of psychology, in order to encourage debate and ground the discipline in solid science. Discusses the pointed challenges posed by critics to the field of psychological research, which have given pause to psychological researchers across a broad spectrum of sub-fields Argues that those conducting psychological research need to fundamentally change the way they think about data and results, in order to ensure that psychology has a firm basis in empirical science Places the recent challenges discussed into a broad historical and conceptual perspective, and considers their implications for the future of psychological methodology and research Challenges discussed include confirmation bias, the effects of grant pressure, false-positive findings, overestimating the efficacy of medications, and high correlations in functional brain imaging Chapters are authored by internationally recognized experts in their fields, and are written with a minimum of specialized terminology to ensure accessibility to students and lay readers

International Journal of Radiation Biology Mar 05 2020

Prison Overcrowding Jul 01 2022

Some Possible Solutions Jul 09 2020 In a spine-tingling new collection, the unique and wickedly funny Helen Phillips offers an idiosyncratic series of "what-ifs" about our fragile human condition. What if you knew the exact date of your death? What if your perfect hermaphrodite match existed on another planet? What if your city was filled with doppelgangers of you? In these remarkably inventive stories Helen Phillips' characters search for solutions to the problem of survival in an irrational, infinitely strange world. We meet a wealthy woman who purchases a high-tech sex toy in the shape of a man, a mother convinced that her children are from another planet, and orphaned twin sisters who work as futuristic strippers. As they strive for intimacy and struggle to resolve their fraught relationships with each other, and with themselves, we realise these dystopias are uncannily close to our own world. By turns surreal, witty, and perplexing, these bewitching stories are ultimately a reflection of our own reality and of the biggest existential questions we all face. Helen Phillips is the recipient of a Rona Jaffe Foundation Writer's Award, the Italo Calvino Prize and more. She is the author of the widely acclaimed novel *The Beautiful Bureaucrat*, also published by Pushkin Press. Her debut collection *And Yet They Were Happy* was named a notable book by The Story Prize. Her work has appeared in *Tin House*, *Electric Literature*, and *The New York Times*. An assistant professor of creative writing at Brooklyn College, she lives in Brooklyn with her husband and children.

Global Solutions Aug 10 2020 This new book, after two years' discussion among 70 members in many countries, including the United States, Canada, Mexico, United Kingdom,

Netherlands, Poland, Sweden, India, Pakistan, Bangladesh, Mali, Australia, and New Zealand, looks at the root causes of global problems and points the way to solutions. It explains the growing gap between rich and poor, offers routes to greater democracy, exposes the global corporate oligarchy, addresses the tyranny of the banking structure, details the concentrated control of media, explores spiritual approaches to sustainable living, and suggests solutions through civil society, alternative life styles, education, and useful information sources. "Global Solutions is an impressive, well-researched and honest summary of our sorry global predicament which provides vehicles for achieving practical solutions ." -John Bunzl of London, England, founder, International Simultaneous Policy Organisation "I think that humane and concerned world citizens, of all faiths or none, can welcome this book's commitment to our common quest for sensitive celebration of humanity and our world with justice and mature tolerance." -Doug Everingham, former Australian Minister for Health "I have to say WOW! What a wonderful job you all did with it and what a treasure of resources listed at the end." -Lugene Trefsgger, Rowan University, New Jersey
