Rugby World Cup 1987 - 2015: Complete Results and Statistics
Feb 20 2022 New Zealand's wonderful victory over close rivals Australia in the Twickenham final brought to close a thrilling 2015 Rugby World Cup which saw southern hemisphere teams dominate and playing a style of rugby which left the northern teams wondering how they can compete in future. This 395 page book concentrates on the 2015 tournament, detailing each pool and knock-out phase match, full information on all the qualifying competitions, each country's squads with changes made, plus a 10 page section filled with records and statistics from both the latest tournament and for the history of the world cup. The book also has match details for every game played in the world cup since 1987.

Applying IFRS Standards Dec 29 2019 Understanding the main concepts of IFRS Standards The fourth edition of Applying IFRS Standards explains the core principles of International Financial Reporting (IFRS) Standards. It also addresses the skills needed to apply the standards in business environments. The book begins with an overview of the International

Accounting Standards Board (IASB) and how it establishes accounting standards. The general book topics are then covered in detail and include: income taxes, financial instruments, fair value measurement, property, inventories, employee benefits and more. Discussion questions, exercises and references are provided throughout the book.

A Monetary Hope for Europe Oct 19 2021 A Monetary Hope for Europe. This book studies the euro in a global perspective and opens a new series edited by the Jean Monnet European Centre of Excellence of the University of Florence, Verso l'unificazione europea. Most of the chapters have been written by economists who met and discussed their diverse views at a multi-disciplinary conference organized by the Centre in May 2013 under the title The euro and the struggle for the creation of a new global currency: Problems and perspectives in the building of the political, financial and economic foundations of the European federal government. The list of contributors also includes historians as well as European and international law academics. Their essays have been revised on the basis and against the backdrop of an ongoing crisis of both the euro and the whole European project in the last years and months. The volume aims to provide useful data and interpretations to improve knowledge on the euro and the European Union in their economic, historical, juridical and political perspectives. --

Does Transnational Mobilization Work for Language Minorities? Jun 14 2021 This study scrutinizes the significance of transnational mobilization for language minorities, both with regard to their ability and their motivation to undertake such action. It is designed as interpretative case study on Romanian minorities in the post-communist countries of Serbia, Bulgaria, Ukraine, and Hungary. The book concentrates on immobile and marginal groups outside the focus of international politics and

research. It contributes to recent research on cosmopolitanism: only an in-depth study of actors' everyday reality can produce qualified claims on the tense relationship between local rootedness on the one hand and possibilities for international mobility on the other. This, in turn, is vital to assess the vigor of international processes such as globalization and European integration. (Series: Region - Nation - Europa - Vol. 75)

Asian American Basketball Mar 31 2020 When Jeremy Lin began to knock down shots for the New York Knicks in 2012, many Americans became aware for the first time that Asian Americans actually play basketball. Indeed, long before Lin shook up the NBA, Asian Americans played the game with passion and skill, and many excelled at high school, college and professional hoops. This comprehensive history of Asian American basketball discusses how these players first found a sense of community in the game, and competed despite an atmosphere of anti-Asian bigotry in historical and contemporary America.

Australia and Latin America Feb 08 2021 This is a good time to reflect on opportunities and challenges for Australia in Latin America. Impressive economic growth and opportunities for trade and investment have made Latin America a dynamic area for Australia and the Asia Pacific region. A growing Latin American population, Australia's attractiveness to Latin American students, a fascination with the cultural vibrancy of the Americas and an awareness of Latin America's increasingly independent stance in politics and economic diplomacy, have all contributed to raising the region's profile. This collection of essays provides the first substantial introduction to Australia's evolving engagement with Latin America, identifying current trends and opportunities, and making suggestions about how

relationships in trade, investment, foreign aid, education, culture and the media could be strengthened.

Science Education Research and Practice in Asia Jul 16 2021

This book discusses the scope of science education research and practice in Asia. It is divided into five sections: the first consists of nine chapters providing overviews of science education in Asia (China, Lebanon, Macau, Malaysia, Mongolia, Oman, Singapore, Taiwan, and Thailand). The second section offers chapters on content analysis of research articles, while the third includes three chapters on assessment and curriculum. The fourth section includes four chapters on innovative technology in science education; and the fifth section consists of four chapters on professional development, and informal learning. Each section also has additional chapters providing specific comments on the content. This collection of works provides readers with a starting point to better understand the current state of science education in Asia.

Combating Inequality Oct 07 2020 Economic inequality has recently gained considerable academic attention. However, two important aspects of inequality have not been discussed systematically: its multidimensional nature and the question of what can be done to reverse it. This book offers insights from scholars representing the Global Labour University, which operates in Brazil, Germany, India, South Africa and the US. They analyse the various drivers of inequality, assess policy responses, and discuss counterstrategies. The main findings of this book are that rising levels of inequality cannot be addressed only with the standard policies responses, namely education, redistribution and 'green growth'. In addition, the way markets currently function needs to be corrected. The chapters in this volume focus on specific fields of contemporary capitalism where important drivers of inequality are located, for example,

the labour market; the financial system; the tax system; multinational corporations; and gender relations. Other chapters discuss in detail where political opportunities for change lie. They critically assess existing countermeasures; the idea of a 'green economy' and its implications for inequality; and existing campaigns by trade unions and new social movements against inequality. In line with the global nature of the problem, this book contains case studies on countries both from the north and south with considerable economic and political weight. This book provides academics, political practitioners and civil society activists with a range of ideas on how to drive back inequality. It will be of interest to those who study political economy, development economy and labour economics.

Credit Rating Governance Jun 22 2019 Credit rating agencies play an essential role in the modern financial system and are relied on by creditors and investors on the market. In the recent financial crisis, their power and reliability were often questioned, yet a simple rating downgrade could threaten to bankrupt a whole country. This book examines the governance of credit rating agencies, as expressed by their ability to fairly, ethically and consistently assign higher rates to issuers having lesser default risks. However, factors such as the drive for increased revenue and market share, the inadequate business model, the inadequate methodology of assessing risk, opacity and inadequate internal monitoring have all been identified as critical governance failures for credit agencies. This book explores these issues, and proposes some potential solutions and improvements. This will be of interest to researchers and advanced students of corporate finance, finance, financial economics, risk management, investment management, and banking.

Inequality and Exclusion in Southeast Asia Oct 26 2019

Inequality is a defining global issue of our times. Southeast Asia stands out in some ways; the 2010s have seen most countries in the region reduce income gaps. Nonetheless, inequality levels remain high, especially in the middle-income to high-income countries, and popular disaffection and economic anxiety prevail, even while official statistics may paint more buoyant scenarios. The age-old problem of group-based exclusion in the development process manifests in new ways. This book provides up-to-date overviews of inequality levels and trends, primarily related to income, but also wealth and other socio-economic variables pertaining to education and health. The country chapters also examine salient themes of inequality, especially structural changes and public policies to redress inequality and exclusion, labour market developments, population groups, regional dynamics, and informal economies. We gain an appreciation for the unique conditions and diverse experiences of each country, and draw comparative insights across the region. “This is an impressive collection of papers written by scholars from Southeast Asia and addressing an important set of issues which deserve serious attention from policymakers. Inequality and social exclusion are problems which never seem to go away, even in the high-income countries, and this collection will be valuable for all those seeking to understand how serious the situation is in eight Southeast Asian states. The editors are to be congratulated on bringing together such a timely book.” Anne Booth, Emeritus Professor of Economics, School of Oriental and African Studies “This compilation of recent research on Southeast Asian economic inequalities by Lee and Choong underscores the rapid progress being made. The authors from the region underscore the global shift in research and policy attention in this century. Reflecting data and methodological diversity, the book variedly captures some

‘intersectionality’ of inequalities beyond the old focus on interpersonal and household income distribution.” Jomo KS, Fellow, Academy of Science, Malaysia “In societies across the world, rising inequality has become a critical issue over the past generation. Besides basic issues of justice, inequality between people obstructs the collective decision-making needed for societies to progress. This book is the most comprehensive study of inequality in Southeast Asia. It stresses that each society is different, but the solutions are common—good data, proper understanding, multidimensional approaches, strong institutions and popular agency.” Pasuk Phongpaichit, Emeritus Professor, Chulalongkorn University

The International Crimes Tribunal in Bangladesh Jan 22

2022 "The International Crimes Tribunal in Bangladesh was established in 2010 with the aim of bringing to trial perpetrators of crimes committed during the Liberation War in 1971, through which the country seceded from Pakistan. The International Crimes Tribunal is a domestic tribunal based on the International Crimes Tribunals Act from 1973 and the rules of procedure enacted by the Tribunal itself. The initiation of these trials almost 40 years after the war entails several challenges. The publication examines to what extent the Tribunal's legal framework as well as its jurisprudence comply with international standards as established in international treaties, customary international law and in the jurisprudence of international criminal law. To this end, the substantive law and its interpretation as well as the procedural standards applied at these trials are examined thoroughly. At the same time, the analysis takes into account the political environment surrounding the Tribunal's work and assesses its impact on the country's process of coming to terms with the past."--

Relations. Beyond Anthropocentrism, 1.2 - November 2013 Mar

24 2022 *Relations. Beyond Anthropocentrism* is a peer-refereed journal of trans-anthropocentric ethics and related inquiries. The main aim of the journal is to create a professional interdisciplinary forum in Europe to discuss moral and scientific issues that concern the increasing need of going beyond narrow anthropocentric paradigms in all fields of knowledge. The journal accepts submissions on all topics which promote European research adopting a non-anthropocentric ethical perspective on both interspecific and intraspecific relationships between all life species – humans included – and between these and the abiotic environment.

Secularism on the Edge Jan 28 2020 In this dynamic and wide-ranging collection of essays, prominent scholars examine the condition of church-state relations in the United States, France, and Israel. Their analyses are rooted in a wide variety of disciplines, ranging from ethnography and demography to political science, gender studies, theology, and the law.

The Trans Pacific Partnership, China and India Sep 17 2021

The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans-Pacific Partnership (TPP). The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations. It is expected to eventually mature into a regional trade agreement covering the entire Asia-Pacific. As of now, it does not include China and India, the two largest

emerging markets and regional economies. The TPP has generated controversy for its excessive emphasis on trade issues, which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets. It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo-political strategy of the US for supporting its strategic rebalancing towards Asia. From both economic and geo-political perspectives, the TPP has various significant implications for China and India that are examined in the book. This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward-oriented reforms. The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India. Otherwise, the TPP and China and India might walk divergent paths and trade and regional integration in Asia-Pacific may not ever converge. This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade.

The Classical Gardens of Shanghai (?????) Nov 27 2019 In *The Classical Gardens of Shanghai*, Shelly Bryant looks at five of Shanghai's remaining classical gardens through their origins, changing fortunes, restorations, and links to a wider Chinese aesthetic. Shanghai's classical gardens are as much text as space; they exist in art, poetry, and literature as much as in stone, rock, and earth. But these gardens have not remained static entities. Rather, they have been remodelled constantly since their inception. This book reflects this process within the constancy of traditional Chinese horticulture and reveals

Shanghai's remaining classical gardens as places representing wealth and social status, social and dynastic shifts, through falling family fortunes and political revolutions to search for a recovery of China's ancient culture in the modern day. "Like a classical Chinese garden, this admirable and beautifully balanced book conjures up wider landscapes from within a small compass. It can be savoured on many levels: poetic and aesthetic no less than scholarly and intellectual. It is the next best thing to being guided through such gardens by Shelly Bryant herself."

Strong to Save: Maritime Mission in Hong Kong from Whampoa Reach to the Mariners' Club Jul 24 2019 Tracing its origins back to 1822 in Whampoa, the Mariners' Club in Hong Kong was established to meet a specific need for an Anglo-Chinese society defined by that most dubious of activities, seafaring. Its creation was anything but straightforward, and in this can be seen the mutable and often tortuous relations between the various religious bodies, the local population, the transient sailors, the emerging captains of industry, and the growing regulatory reach of the colonial government. The club evolved through many embodiments and witnessed the growth of Hong Kong from a collection of mat-sheds on the foreshore, through colony to its current status. Throughout its turbulent past it has been occasionally marginalized but has always served as an important base for the key actors in the main commercial activity in Hong Kong: seafarers. This is a history of one of the most enduring institutions of Hong Kong, and the first of its kind. Using the Club's own records as well as a wide range of sources both from within Hong Kong and from the seafaring world at large, this is a comprehensive account of the life of the Missions, the tenancy of the different chaplains, managers, and stewards, the changes

in seafaring practices and shipping, and the transformation of Hong Kong itself.

The Roosevelts and Their Descendants Sep 29 2022 Few families have influenced America like the Roosevelts--two presidents from different parties, including our longest-serving chief executive, and the "First Lady of the World." Born into aristocratic society, Theodore, Franklin and Eleanor (nee) Roosevelt shared a commitment to progress and the common good over class. Their lives have been the focus of numerous books but their legacy and the extended family they left behind warrant a closer look. This book chronicles "the Roosevelts" and "those other Roosevelts"--a family of individuals always striving to measure up but united by an illustrious past.

Saudi Arabia in a Multipolar World Nov 07 2020 The Kingdom of Saudi Arabia has established itself as the twelfth-largest economy in the world, the largest West Asian economic power, world's largest oil producer, and a strong and capable force in international politics, particularly in the Sunni Islamic world. However, at present it is at crossroads. Should it continue as a 'kingdom' or usher in the process of inclusive political representation? This volume answers such questions and explores how the state is coping with domestic, regional and global developments to remain relevant in the changing times. It provides a holistic overview of a slew of economic, political, cultural, military and security policy measures that have been initiated by the government. The work also offers a detailed analysis of Saudi Arabia's relations with three significant powers — USA, China and India — and how they are evolving under new geopolitical and geostrategic dynamics. This book will interest strategists, policymakers, researchers and students of international relations, geopolitics, political science and political economy as well as the informed reader.

The New International Telecommunication Regulations and the Internet Apr 24 2022 This book provides a clear and thorough account of the process leading up to the revision of the International Telecommunication Regulations (ITRs) one of the four treaties administered by the ITU. The author's inside view of the events and his legal analysis of the new ITRs, are different from that what has been aired in most other accounts to date. His systematic approach shows how much of the criticism of the WCIT-12 process and of the ITRs themselves, is unjustified. This book provides the most accurate view to date of what the ITRs really mean and of what really happened at WCIT-12, which was undoubtedly a key event in the history of telecommunication policy and which is likely to have significant long-term effects. The book covers in some detail the events leading to the non-signature of the treaty by a significant number of states, outlines possible consequences of that split between states, and offers possible ways forward. The book includes a detailed article-by-article analysis of the new ITRs, explaining their implications and concludes with recommendations for national authorities. It concludes with an analysis of events from the point of view of dispute resolution theory, offering suggestions for how to avoid divisive outcomes in the future. "This is an excellent book, and quite rich and comprehensive. The topic is important and the book will surely be of interest to regulators, diplomats, policy experts, and all those who participated in WCIT. The author is uniquely qualified to write an analysis of the new ITRs and an account of the Conference. This book will be a good reference for the next Plenipotentiary Conference to be held in 2014 which is going to discuss follow-

up to WCIT-12." Naser al-Rashedi, United Arab Emirates. "This is an authoritative expert account of a moment of high significance for vital issues with respect to international networks." Professor Dan Schiller, University of Illinois. "This is an excellent and timely work." Professor Ian Walden, Queen Mary, University of London. "Interested persons, businesses and governments can draw their policies from the assessments of a telecommunications insider as presented in this book. The manifold arguments enlightening the interpretation of the provisions of the ITRs might become an invaluable guidance for those who apply the ITRs in the future." Professor Dr. Rolf H. Weber, University of Zurich.

Women and Politics in Contemporary Japan Sep 05 2020

This book looks at the gendering of the political system in Japan and the effects of that system on gender equality in national-level politics specifically and wider society more generally. It examines the approach taken by the long-ruling Liberal Democratic Party (LDP) to issues of gender equality in Japan, and the repercussions of that approach on women's political experiences and representation. This book covers a range of themes including the role of the LDP and other major political parties in constructing the modern Japanese political system, the under-representation of women in Japanese politics, women's experiences in party politics and the gendering of government policies. Using in-depth interviews with women members of the national Diet, the book sheds light on how political women negotiate the male-dominated world of Japanese politics.

Rebel Politics Nov 19 2021 Rebel Politics analyzes the changing dynamics of the civil war in Myanmar, one of the most entrenched armed conflicts in the world. Since 2011, a national peace process has gone hand-in-hand with escalating ethnic conflict. The Karen National Union (KNU), previously known for its uncompromising stance against the central government of Myanmar, became a leader in the peace process after it signed a ceasefire in 2012. Meanwhile, the Kachin Independence Organization (KIO) returned to the trenches in 2011 after its own seventeen-year-long ceasefire broke down. To understand these puzzling changes, Brenner conducted ethnographic fieldwork among the KNU and KIO, analyzing the relations between rebel leaders, their rank-and-file, and local communities in the context of wider political and geopolitical transformations. Drawing on Political Sociology, Rebel Politics explains how revolutionary elites capture and lose legitimacy within their own movements and how these internal contestations drive the strategies of rebellion in unforeseen ways. Brenner presents a

novel perspective that contributes to our understanding of contemporary politics in Southeast Asia, and to the study of conflict, peace and security, by highlighting the hidden social dynamics and everyday practices of political violence, ethnic conflict, rebel governance and borderland politics.

India's National Security Mar 12 2021 This fourteenth volume of India's National Security Annual Review intensively analyses India's national security with respect to the changing internal and external dynamics. In the global environment, the situation is characterised by rising tensions between United States and Russia, intensified rivalry between United States (US) and China, and increasing cooperation between China and Russia. For India which seeks peaceful growth to emerge as a major power, this poses severe diplomatic challenges. This volume discusses the complexity of these challenges and the deftness with which India gets the best out of its strategic partnerships with the US and Russia while warding off the transgressions of a mighty adversary like China. It also studies the impact of internal convulsions and external intrusions on India's security from South Asian nations such as Afghanistan, Bangladesh, Nepal and Sri Lanka. Examining the field of internal security, the essays carry rare insights into the causes of expansion of Naxalite violence in tribal areas and the dynamics of conflict resolution in the Northeast, as well as India's deep concern as a growing power with its economic slowdown in the recent past,

and energy and cyber security. Bringing together contributions from eminent scholars and diplomats, the volume will be indispensable for policymakers, government think tanks, defence and strategic studies experts, as well as students and researchers of international relations, foreign policy and political science.
