[The Impact of Globalisation on Employment Relations:A Comparison of the Automobile and Banking Industries](#) Sep 17 2021 Although no one disputes that employment relations worldwide have been greatly affected by globalisation, no clear consensus has emerged on the nature and significance of this impact. The seven contributions to this symposium pursue a comparative approach, suggesting that direct analysis of employment relations in distinct industries in two comparably-sized economies since the advent of globalisation leads to a more precise understanding of the interaction of globalisation and employment relations, and sets a pattern for other studies to follow. The economies studied in the symposium are Australia and Korea, and the industries are automobile (and auto parts) manufacturing and retail banking. In both countries, labour unions play a key role in the way in which employers and governments react to political and economic pressures. Among the particular topics discussed by the contributors are the following: effects of the 1997 financial crisis in Korea; the extent to which the automobile industry in one country (Korea) depends on parts and raw material from another country (Australia); cross-border cooperation between unions; the growing trend toward enterprise bargaining; conciliation and arbitration of industrial disputes; and the role of government-sponsored industrial relations commissions. The contributing authors are all industrial relations authorities in Australia or Korea. The in-depth analysis they offer in these very specific areas will be of value to labour lawyers and industrial relations scholars everywhere for the light it sheds on this crucial aspect of contemporary social and economic development.

Car-tastrophes Oct 26 2019 Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

Sandworm Jul 24 2019 "With the nuance of a reporter and the pace of a thriller writer, Andy Greenberg gives us a glimpse of the cyberwars of the future while at the same time placing his story in the long arc of Russian and Ukrainian history." —Anne Applebaum, bestselling author of *Twilight of Democracy* The true story of the most devastating act of cyberwarfare in history and the desperate hunt to identify and track the elite Russian agents behind it: "[A] chilling account of a Kremlin-led cyberattack, a new front in global conflict" (Financial Times). In 2014, the world witnessed the start of a mysterious series of cyberattacks. Targeting American utility companies, NATO, and electric grids in Eastern Europe, the strikes grew ever more brazen. They culminated in the summer of 2017, when the malware known as NotPetya was unleashed, penetrating, disrupting, and paralyzing some of the world's largest businesses—from drug manufacturers to software developers to shipping companies. At the attack's epicenter in Ukraine, ATMs froze. The railway and postal systems shut down. Hospitals went dark. NotPetya spread around the world, inflicting an unprecedented ten billion dollars in damage—the largest, most destructive cyberattack the world had ever seen. The hackers behind these attacks are quickly gaining a reputation as the most dangerous team of cyberwarriors in history: a group known as Sandworm. Working in the service of Russia's military intelligence agency, they represent a persistent, highly skilled force, one whose talents are matched by their willingness to launch broad, unrestrained attacks on the most critical infrastructure of their adversaries. They target government and private sector, military and civilians alike. A chilling, globe-spanning detective story, Sandworm considers the danger this force poses to our national security and stability. As the Kremlin's role in foreign government manipulation comes into greater focus, Sandworm exposes the realities not just of Russia's global digital offensive, but of an era where warfare ceases to be waged on the battlefield. It reveals how the lines between digital and physical conflict, between wartime and peacetime, have begun to blur—with world-shaking implications.

Citizenship in Question Feb 29 2020 Citizenship is often assumed to be a clear-cut issue—either one has it or one does not. However, as the contributors to *Citizenship in Question* demonstrate, citizenship is not self-evident; it emerges from often obscure written records and is interpreted through ambiguous and dynamic laws. In case studies that analyze the legal barriers to citizenship rights in over twenty countries, the contributors explore how states use evidentiary requirements to create and police citizenship, often based on fictions of racial, ethnic, class, and religious differences. Whether examining the United States ' deportation of its own citizens, the selective use of DNA tests and secret results in Thailand, or laws that have stripped entire populations of citizenship, the contributors emphasize the political, psychological, and personal impact of citizenship policies. *Citizenship in Question* invites scholars to revisit long-standing political theories and debates about nationality, free movement, and immigration premised on the assumption of clear demarcations between citizens and noncitizens. Contributors: Alfred Babo, Jacqueline Bhabha, Jacqueline Field, Amanda Flaim, Sara L. Friedman, Daniel Kanstroom, Benjamin N. Lawrance, Beatrice McKenzie, Polly J. Price, Rachel E. From Under the Wheel Jan 10 2021 From Under the Wheel is an introspective look at loss and devastation and helps find a way to reach far beyond the events in our lives that leave scars. It challenges the Why Me? in all of us and exposes the path our choices ultimately create. It encourages a way to move past losses and difficulties by assigning a meaning to individual experiences. And finally, it helps excavate the true intent of your inner self to give purpose to living every day. Lynn Gawronski's view From Under the Wheel is both reality and metaphorical. The picture of the wheel of the single axle flat bed trailer sitting on her chest as it ran her over is forever imprinted in her memory. But even a miraculous recovery wouldn't stop trauma from

happening again. Two years later, she was a passenger in a car hit broadside by another and was left partially paralyzed with facial injuries and emotional scars. The next twenty years would prove to challenge every bit of her faith with more tragedy and loss and at times, just life; each time stimulating another wheel and presenting another effort for recovery and healing whether physical or emotional. The end result is the emergence of a life with purpose and renewed spirit, but the book doesn't stop there. She also provides a planning tool and the steps that she is using to help her carry out her purpose in life so that the reader may do the same. With each new challenge and successful outcome, Lynn Gawronski considers herself out From Under the Wheel.

The Maruti Story Sep 05 2020 An extraordinary and rare insight into how a few determined entrepreneurs created an icon... - C. K. Prahalad The targets were stupendous and considered unachievable by almost everyone. Slightly over two years to find a suitable partner, finalize all legal documentation, get governmental approval to these agreements as well as to the investment proposals, build a factory, develop a supplier base to meet localization regulations, create a sales and service network, and develop and launch a peoples car that would sell 100,000 a year, in a sector where Indian expertise was limited. And to do this as a public sector company, having to follow all governmental systems and procedures, and having to please both its masters in the government and Suzuki Motor Corporation. However, the Maruti project succeeded, and in ways that were unimaginable in 1983. The car revolutionized the industry and put a country on wheels. Suddenly, ordinary middle-class men and women could aspire to own a reliable, economical and modern car, and the steep sales targets were easily met. Twenty-six years later, the company, now free of government controls and facing competition from the worlds major manufacturers who have entered the Indian market, still leads the way. Not only that, cars made by Maruti can be seen in all continents. By any yardstick, it is an incredible story, involving grit, management skill and entrepreneurship of a high order. R.C. Bhargava, who was at the helm of the company, and is currently its chairman, co-writing with senior journalist and author Seetha, shows how it was done in this riveting account of a landmark achievement.
