[Advanced Language Arts for High School Students - Viking Vocabulary Building](#) Nov 23 2021 Homeschooling Grammar, Vocabulary and SAT prep.

[Advanced Language Arts for High School Students](#) A complete English curriculum, ideal for 10th, 11th or 12th grade. This book is designed to teach practical writing skills on a "college-prep" level. Students preparing for college placement tests will benefit from the unforgettable learning experiences that they will discover in this workbook. Though this book is excellent in terms of preparing your student for high level learning, it is also very practical for teens who want to become writers. This course covers: Historical Fiction Advanced English Language Arts Creative Writing Rhetoric Writing Techniques Grammar PROLOGUE "Life, Liberty, and the Pursuit of... Rhetoric!" Enhancing your language efficiency through the art of rhetoric is an achievable task. It is not exclusive to the elect of a society, nor is it a trait known only by the wise or seemingly infallible. In fact, to smarten yourself in this area is not at all problematic. Rhetoric by nature is manifold, containing within itself a numerous and diverse assortment of constituents. The component we will be most often exploring is that which pertains to prose. Our focus will be on learning to edify the listener or reader with a beautiful and stylistic word set. The art of language has been modeled for us throughout the ages by countless Greek and Latin speaking philosophers and even by the bishops of the early Catholic Church. However, not every example is what we would call "shining". Many have sought for an occasion to use it as a means to peacock their affluent wellspring of education upon the neophytes of their day and age, as well as to impress colleagues. Its purpose, I'm sure, was to put on display an alluring outward aesthetic even if the content of their ideology was considered, by certain others to be, in reality, purely detrimental balderdash. Hopefully, this brief study in language will spur you on to greater degrees of thought. It is my wish that you might feel inspired enough to continue educating yourself long after your time with this book is finished. Vocabulary and grammar are some of the fundamental pillars of our everyday lives. Quite truthfully, if you desire to obtain understanding, you will. We are, after all, living in the day of knowledge, where all the information necessary for our daily lives can easily be accumulated in mere moments. Therefore, you don't need me to tell you anything! But perhaps, you just need a nudge in the right direction. IMPORTANT: Things you will need for this course! 1. A pack or two of index cards - You will be writing vocabulary words on them to make flashcards. (There are 150+ words.) 2. Dictionary 3. Lined paper or a digital writing program - In case you run out of space in this book or want to type your work. 4. Pencils and pens 5. Thesaurus Help your high school student to learn how to write historical fiction while expanding his or her vocabulary. Simple Science for Homeschooling High School Aug 21 2021 Teaching High School Science isn't Rocket Science! You don't have to work at NASA to teach your teens effectively! "Houston, we have a problem!" Homeschool parents often approach teaching high school science as if being asked to build the space shuttle. But teaching your kids science doesn't require a PhD. All it requires is a willing heart, an organized approach, and some simple facilitation skills. There is no reason for science to be scary. Let Lee Binz, The HomeScholar, show you the way! Lee's fearless approach and easy to follow guidance will make any parent a science success, no matter how science-phobic! Just keep in mind the first principle of homeschooling high school: "You don't have to learn it. Your kids have to learn it." In this book, you will learn the keys to science success, including: what to teach, why to teach it, and how to teach it. You will discover science curriculum options, and learn how to choose the one that will be best for your family (and save you money)! You will learn how to keep great science records to demonstrate your kids' learning effectively. Learn essential strategies to motivate your kids to succeed in science! Here's Why You Need This Book: Understanding science is a requirement for every homeschool graduate. It isn't just essential for college, but for functioning in the world. The good news is, there have never been such great tools available to help you impart this critical knowledge to your teens. "Simple Science for Homeschooling High School" will reveal these tools and provide you the insights you need to put them to work in your family. "Simple Science for Homeschooling High School" is part of The HomeScholar's Coffee Break Book series. Designed especially for parents who don't want to spend hours and hours reading a 400-page book on homeschooling high school, each book combines Lee's practical and friendly approach with detailed, but easy-to-digest information, perfect to read over a cup of coffee at your favorite coffee shop! Never overwhelming, always accessible and manageable, each book in the series will give parents the tools they need to tackle the tasks of homeschooling high school, one warm sip at a time. Who is Lee Binz and Why Should You Listen to Her? Lee Binz, The HomeScholar, understands what it takes to graduate homeschool students who are fully prepared for college and for life. Lee's practical advice and organized presentations have helped thousands of homeschool parents muster the courage to complete their homeschooling journey. She is both reassuring and empowering, and will give you the knowledge you need to successfully graduate your high school student, and have confidence that they are ready to take on the world. A firm believer that homeschooling provides the best possible learning environment, and that parents are capable of providing a superior education for their children, Lee's mission is to encourage and equip parents to homeschool through high school.
