Friends in Flanders Aug 29 2019 The Friends' Ambulance Unit (FAU) was created shortly after the outbreak of war. The idea of the unit's founder, Philip J. Baker, was that it would provide young Friends (Quakers) with the opportunity to serve their country without sacrificing their pacifist principles. The first volunteers went to Belgium on 31 October 1914, under the auspices of the Joint War Committee of the British Red Cross Society and the Order of St John of Jerusalem. The FAU made a sustained contribution to the military medical services of the Allied nations, establishing military hospitals, running ambulance convoys, and staffing hospital ships and ambulance trains, treating and transporting wounded men. Determined to bring succour to all those in need, the FAU also assisted civilians trapped in the war zone and living in desperate circumstances. Nowhere was this more acute than in the besieged and battered town of Ypres where thousands sheltered in the underground passage-ways of the towns ancient fortifications -- a subterranean population, 'hopeless, often lightless,' wrote Geoffrey Young, the Units young field commander, living on what they might and breeding disease. The Unit provided hospitals for the treatment of civilians, and worked intensively in the containment and treatment of the typhoid epidemic that swept the region, locating sufferers, providing them with medical care, and inoculating people against the disease. It played a major role in the purification of the town's contaminated drinking water, distributed milk for infants and food and clothing to the sick and needy. It helped found orphanages, made provision for schooling and organised gainful employment for refugees until, finally, it became responsible for the definitive evacuations of the civilian population.

Friends in the Bedroom But Strangers in Church Jan 03 2020 This is a true story about a woman who struggled through an adulterous relationship with a man for six years. What began as unexplained teenager attraction and youthful curiosity, carried into her adult life where it resurfaced again, only to consume her and eventually spiral out of control. This candid story exposes an underlying dilemma that exists within the Church. It reveals the life experience of a professed Christian woman who convinced herself that a unique friendship outside of God's marital design was her destined path. Over time, the intrinsic connection became intimate. Both parties acknowledged the relationship was based on curiosity and infatuation; yet, despite her Christian upbringing and foundation, their negotiation and illicit justification spanned beyond two decades. What begins as lust of the eye can lead to negative complex ramifications when we allow ourselves to bargain with the enemy as this couple did. Still, her story is not unique. It is a revelation to readers who identify with her battle. Hers is a testimony of God's forgiveness, yet, a reminder that His transformation rarely comes without struggle. Despite disillusionment, this woman's life had reached rock bottom. Fortunately, she was introduced to therapeutic healing. Through professional intervention, she was guided toward completeness and righteousness according to God's Word.

The Psychology of Friendship Jun 27 2019 In the late 20th and 21st centuries, the meteoric rise of countless social media platforms and mobile applications have illuminated the profound need friendship and connection have in all of our lives; and yet, very few scholarly volumes have focused on this unique and important bond during this new era of relating to one another. Exploring such topics as friendship and social media, friendship with current and past romantic partners, co-workers, mentors, and even pets, editors Mahzad Hojjat and Anne Moyer lead an expert group of global contributors as they each explore how friendship factors within our lives today. What does it mean to be a friend? What roles do friendships play in our own development? How do we befriend those across the race, ethnicity, gender, and orientation spectrums? What happens when a friendship turns sour? What is the effect of friendship - good and bad - on our mental health? Providing a much needed update to the field of interpersonal relations, The Psychology of Friendship serves as a field guide for readers as they shed traditional definitions of friendship in favor of contemporary contexts and connections.

Friends in Poetry Jul 09 2020 A friend in need is a friend indeed, so are Friends in poetry. It was discovered worthy as friends to share our emotions, feelings and a sense of what is beautiful around us through a holistic approach to poetry and a word of motivation. Friends in Poetry, as the title implies, is a poetry book and the poems range from regrettable decisions, heartaches, falling in love and so much more to enjoy. What is most beautiful about it is that an Author goes through every poem to explain it at the end, and draw a word of encouragement around it. Thank you very much for choosing 'Friends In Poetry'. From us, your friends, we wish you nothing, but an abrupt happy read!

Friends in Need Jul 01 2022 Who contributes to alliances and why? Is a state's aggregate relative capabilities the major factor in determining participation? How do perceived threats, dependence on other alliance members, domestic politics, and learned experience from analogous situations matter? Alliances will be looser and more ad hoc in the post-Cold War international system than they were between 1947 and 1991. Andrew Bennett, Joseph Leggold, and Danny Unger recognize this situation and the key policy issues it raises with regard to multilateral conflict management. In Friends in Need, the assembled authors study alliances in a more general sense, using the coalition that was established to deal with the Gulf War as their example. Looking individually at all of the countries that took part in the coalition, the authors provide a richly detailed study of alliances and the way they work now.

The No Need To Diet Book Feb 13 2021 Our obsession with being healthy and living forever has driven us to push our bodies to the absolute limits, but still every year we're being told how unhealthy we are as a population. Despite a wealth of information at our fingertips, there are still so many things we get wrong about food and health. The No Need To Diet Book explains the reasons why diets and over exercising don't work; the problems with eating for aesthetic goals; the science behind orthorexia, food anxieties and emotional eating, and other unhealthy habits formed by misinformation. This book will challenge our misconceptions about what is healthy, and get to the heart of it using evidence-based science.

Aristotle's "Nicomachean Ethics" Jul 29 2019 Anyone interested in theories of moral or human practice will find in Aristotle's Nicomachean Ethics one of the few basic models relevant through to today. At the centre of his analysis, both sober and cautious, are such concepts as happiness, virtue, choice, prudence, incontinence, pleasure and friendship. Aristotle's arguments are by no means of merely historical interest, but continue to exert a key influence on present-day ethical debate.

Men and Women Making Friends in Early Modern France Oct 31 2019 Today the friendships that grab people's imaginations are those that reach across inequalities of class and race. The friendships that seem to have exerted an analogous level of fascination in early modern France were those that defied the assumption, inherited from Aristotle and patristic sources, that friendships between men and women were impossible. Together, the essays in Men and Women Making Friends in Early Modern France tell the story of the declining intelligibility of classical models of (male) friendship and of the rising prominence of women as potential friends. The revival of Plato's friendship texts in the sixteenth century challenged Aristotle's rigid ideal of perfect friendship between men. In the seventeenth century, a new imperative of heterosociality opened a space for the cultivation of cross-gender friendships, while the spiritual friendships of the Catholic Reformation modeled relationships that transcended the gendered dynamics of galanterie. Men and Women Making Friends in Early Modern France argues that the imaginative experimentation in friendships between men and women was a distinctive feature of early modern French culture. The ten essays in this volume address friend-making as a process that is creative

of self and responsive to changing social and political circumstances. Contributors reveal how men and women fashioned gendered selves, and also circumvented gender norms through concrete friendship practices. By showing that the benefits and the risks of friendship are magnified when gender roles and relations are unsettled, the essays in this volume highlight the relevance of early modern friend-making to friendship in the contemporary world.

How Many Friends Does One Person Need? Apr 05 2020 Why do men talk and women gossip, and which is better for you? Why is monogamy a drain on the brain? And why should you be suspicious of someone who has more than 150 friends on Facebook? We are the product of our evolutionary history, and this history colors our everyday lives—from why we joke to the depth of our religious beliefs. In *How Many Friends Does One Person Need?* Robin Dunbar uses groundbreaking experiments that have forever changed the way evolutionary biologists explain how the distant past underpins our current behavior. We know so much more now than Darwin ever did, but the core of modern evolutionary theory lies firmly in Darwin's elegantly simple idea: organisms behave in ways that enhance the frequency with which genes are passed on to future generations. This idea is at the heart of Dunbar's book, which seeks to explain why humans behave as they do. Stimulating, provocative, and immensely enjoyable, his book invites you to explore the number of friends you have, whether you have your father's brain or your mother's, whether morning sickness might actually be good for you, why Barack Obama's 2008 victory was a foregone conclusion, what Gaelic has to do with frankincense, and why we laugh. In the process, Dunbar examines the role of religion in human evolution, the fact that most of us have unexpectedly famous ancestors, and why men and women never seem able to see eye to eye on color.
