Computers and the Teaching of Writing in American Higher Education, 1979-1994 Jun 07 2020
This book is a history composed of histories. Its particular focus is the way in which computers entered and changed the field of composition studies, a field that defines itself both as a research community and as a community of teachers. This may have a somewhat sinister suggestion that technology alone has agency, but this history (made of histories) is not principally about computers. It is about people--the teachers and scholars who have adapted the computer to their personal and professional purposes. From the authors' perspectives, change in technology drives changes in the ways we live and work, and we, agents to a degree in control of our own lives, use technology to achieve our human purposes. REVIEW: . . . This book reminds those of us now using computers to teach writing where we have been, and it brings those who are just entering the field up to date. More important, it will inform administrators, curriculum specialists, and others responsible for implementing the future uses of technology in writing instruction. - Computers and Composition

Strong Girl, Brave Girl Jul 21 2021 When life-changing pain is coupled with the welcoming of a new story for yourself, the word bittersweet just doesn't do it justice. You are quite literally in the middle - anchored between where you thought you were headed and where you're going now. In that uncertain middle space is where this story takes place, and maybe where you find yourself, too. The life Kelsey Baldwin had imagined for herself, the one she was right in the middle of, quickly crumbled around her on a single day as she was faced with a looming divorce while staring at a positive pregnancy test. It wasn't the way it was supposed to go. With each uncertain transition she went through - divorce, pregnancy, giving birth, moving cities, dating, raising a child without a partner - she clung to what she knew for sure: she was a strong girl and a brave girl, and the middle was not the ending. (Spoiler: that's why it's called the middle.) My story might look really different than yours, but I'm willing to bet you find threads from my messy middle that are also woven into yours.

Handbook of Creativity Jun 27 2019 The motivation underlying our development of a "handbook" of creativity was different from what usually is described by editors of other such volumes. Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization, nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference. Instead, this handbook was conceptualized as an attempt to provide structure and organization for a field of study that, from our perspective, had come to be a large-scale example of a "degenerating" research program (see Brown, Chapter 1). The handbook grew out of a series of discussions that spanned several years. At the heart of most of our interactions was a profound unhappiness with the state of research on creativity. Our consensus was that the number of "good" works published on creativity each year was small and growing smaller. Further, we could not point to a journal, text, or professional organization that was providing leadership for the field in shaping a scientifically sound framework

for the development of research programs in creativity. At the same time, we were casting about for a means of honoring a dear friend, E. Paul Torrance. Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views.

The goal of this book is to fill this void by reflecting on the phenomenon of writing from a developmental perspective. Specifically, the book addresses typologies of writing; pathways of the development of writing skills; stages of the development of writing; individual differences in the acquisition of writing skills; writing ability and disability; teaching writing; and the development and demonstration of expertise in writing.
