Noninferiority Testing in Clinical Trials Jan 06 2021 Take Your NI Trial to the Next Level Reflecting the vast research on noninferiority (NI) designs from the past 15 years, Noninferiority Testing in Clinical Trials: Issues and Challenges explains how to choose the NI margin as a small fraction of the therapeutic effect of the active control in a clinical trial. Requiring no prior knowledge of NI testing, the book is easily accessible to both statisticians and nonstatisticians involved in drug development. With over 20 years of experience in this area, the author introduces the basic elements of the NI trials one at a time in a logical order. He discusses issues with estimating the effect size based on historical placebo control trials of the active control. The book covers fundamental concepts related to NI trials, such as assay sensitivity, constancy assumption, discounting, and preservation. It also describes patient populations, three-arm trials, and the equivalence of three or more groups.

New Beginning in US-Muslim Relations Dec 05 2020 This book carries out a comparative study of the US response to popular uprisings in the Middle East as an evaluation of President Barack Obama's foreign policy commitments. In 2009, Obama publicly pledged "a new beginning in US-Muslim relations," causing eager expectation of a clear shift in US foreign policy after the election of the 44th president of the United States. However, the achievement of such a shift was made particularly difficult by the existence of multiple, and sometimes conflicting, US interests in the region which influenced the Obama administration's response to the popular uprisings in five Muslim-majority countries: Egypt, Bahrain, Yemen, Libya, and Syria. After providing a detailed analysis of the traditional features of both US foreign policy rhetoric and practice, this book turns its focus to the Obama administration's response to the 2011 Arab Awakening to determine whether Obama's foreign policy has indeed brought about a new beginning in US-Muslim relations.

General Extenders Nov 04 2020 General extenders are phrases like 'or something', 'and everything', 'and things (like that)', 'and stuff (like that)', and 'and so on'. Although they are an everyday feature of spoken language, are crucial in successful interpersonal communication, and have multiple functions in discourse, they have so far gone virtually unnoticed in linguistics. This pioneering work provides a comprehensive description of this new linguistic category. It offers new insights into ongoing changes in contemporary English, the effect of grammaticalization, novel uses as associative plural markers and indicators of intertextuality, and the metapragmatic role of extenders in interaction. The forms and functions of general extenders are presented clearly and accessibly, enabling students to understand a number of different frameworks of analysis in discourse-pragmatic studies. From an applied perspective, the book presents a description of translation equivalents, an analysis of second language variation, and practical exercises for teaching second language learners of English.

Fk It Is the Answer** Apr 09 2021 This fun, interactive book takes the liberating F**k It philosophy - of not worrying so much, letting go more, caring less about what others think and doing your own thing - into a magic 8-ball format that will answer any question you ask. We all have questions. And the bestselling F**k It books have provided hundreds of thousands of people around the world with answers that work in real life. In F**k It is the Answer, John C. Parkin adds another element to the mix, and recruits the magical powers of your own unconscious ... or 'fate' ... or 'spirit' ... or whatever it is that seems to guide us to the correct answer when we allow it. When we relax, trust, and go with the flow, we allow to unfold whatever worldly or unworldly magic it is that makes this work. So ... ask your question, and turn to any page in the book for an instant dose of F**k It wisdom!

Reading **Graham Swift** Dec 25 2019 This collection of essays on Graham Swift's fiction brings together the perspectives of renowned Swift scholars from around the world. Authors look at the swift's oeuvre from different interpretative angles, combining a variety of critical and theoretical approaches. This book covers all of Swift's fiction, including his novels and short stories; special emphasis, however, is on his most recent books. By approaching Swift's work from a number of perspectives, the volume offers a synthetic overview of his literary output. In particular, it searches for thematic and formal continuities between his early and more recent fiction, and attempts to emphasize its new developments and interests.

Evidence Based Physical Therapy Jul 20 2019 Improve outcomes through evidence-based therapy. This practical, easy-to-use guide uses a five-step process to show you how to find, appraise, and apply the research in the literature to meet your patient's goals. You'll learn how to develop evidence-based questions specific to your clinical decisions and conduct efficient and effective searches of print and online sources to identify the most relevant and highest quality evidence. Then, you'll undertake a careful appraisal of the information; interpret the research; and synthesize the results to generate valid answers to your questions. And, finally, you'll use the Critically Appraised Topic (CAT) tool to communicate your findings.

A Robust Grid for 21st Century Scotland Nov 23 2019 In December 2011 and January 2012, Scotland was subject to numerous storms that caused damage to homes, road and rail infrastructure, as well as leaving tens of thousands of residents without a power supply. In some cases it took more than three days before power was restored. Although all of Scotland was affected, it appears that the most severe damage occurred in the Highlands and Islands. The

Committee's inquiry focussed on: the frequency and severity of weather-related power cuts in Scotland; the consequences of such power cuts to individuals, businesses and public sector services; the current condition and technological state of Scotland's electricity transmission network, and what conditions it is built to withstand; the advantages and disadvantages of using an alternative electricity transmission infrastructure, particularly regarding its vulnerability to weather-related damage; whether the response provided by the energy companies was satisfactory; and how the regulation of transmission network operators and distribution network Operators impacts upon investment in Scotland's electricity transmission network. The Committee concludes that while blackouts following severe weather incidents can never be completely eliminated, one way that they can be minimised is by ensuring that the grid is in a robust and well maintained state before any such incidents occur. The increase in renewable energy generation also offers opportunities for networks to be less reliant on single vulnerable electricity lines to serve remote communities. The value of compensation for loss of power currently offered and the conditions under which it applies should be improved.

Pharmacovigilance for Herbal and Traditional Medicines May 30 2020 This remarkable new book is the first text dedicated to the topic of pharmacovigilance for herbal and traditional medicines. Taking a truly global perspective, this volume draws together contributions from a diverse group of experts, writing on current knowledge and practices in pharmacovigilance for herbal and traditional medicines, and on advances and innovation in monitoring the safety of this unique and complex category of products and preparations. In part one, the book discusses the current status of pharmacovigilance for herbal and traditional medicines, including the importance of natural products chemistry to harms, and its relevance in considering how pharmacovigilance for these products could be undertaken. Several other chapters discuss methodological approaches and ongoing challenges in pharmacovigilance for herbal and traditional medicines, including issues relating to nomenclature, coding and classification, and the nuances involved in causality assessment. Part two of the book focusses on pharmacovigilance for herbal and traditional medicines around the world, with chapters from authors in several different countries representing diverse historical, ethnic, cultural, social and political contexts. These chapters provide deeper insights and perspectives into spontaneous reporting for herbal and traditional medicines in those countries, and in the context of the local use, practice and regulatory landscape for these products. Part two also provides an overview and new analysis of international case safety reports for herbal medicines held in VigiBase (the World Health Organization's global database of individual case safety reports, maintained by the Uppsala Monitoring Centre). This book is aimed at pharmacists, doctors, nurses and other health professionals, herbal-medicine practitioners and organisations, herbal medicine and pharmaceutical industry personnel, pharmacovigilance specialists, medicines' regulators, health and social science researchers and academics, pharmacovigilance and health professional students, and students of herbal and traditional medicine, throughout the world. It is an extremely valuable resource for all individuals whose work touches the intersection between herbal medicines and pharmacovigilance, and it provides both an introduction to the topic and a deeper, comprehensive, contemporary account of the topic.

Storytelling the Bible at the Creation Museum, Ark Encounter, and Museum of the Bible Oct 23 2019 Paul Thomas chronicles a multi-level reception study of the Bible at both the Creation Museum and the Ark Encounter in Kentucky, USA. Thomas explores the commercial presentation of biblical narratives and the reception of those narratives by the patrons of each attraction, focusing upon three topics; what do young Creationists believe, how they interpret their beliefs from the Bible, and what is the user experience at the museums? The volume begins by explaining how Answers in Genesis (AiG) use Bible passages to support young-Earth creationist arguments, allowing for the chance to consider the Bible via physical means. Thomas then examines how the Creation Museum and the Ark Encounter visitors receive the Bible (as presented by AiG) and how this presentation informs visitors' understanding of the text, exploring concepts such as the most prominent displays of the two attractions, the larger context of museums and theme parks and the case studies of the Methuselah display and The Noah Interview. He concludes with the summary of the user experience generated by the attractions, analyzing the degree to which patrons accept, negotiate, or resist the interpretation of the Bible offered by AiG.

Meathooked Jun 18 2019 One of the great science and health revelations of our time is the danger posed by meat-eating. Every day, it seems, we are warned about the harm producing and consuming meat can do to the environment and our bodies. Many of us have tried to limit how much meat we consume, and many of us have tried to give it up altogether. But it is not easy to resist the smoky, cured, barbecued, and fried delights that tempt us. What makes us crave animal protein, and what makes it so hard to give up? And if consuming meat is truly unhealthy for human beings, why didn't evolution turn us all into vegetarians in the first place? In *Meathooked*, science writer Marta Zaraska explores what she calls the "meat puzzle": our love of meat, despite its harmful effects. Zaraska takes us on a witty tour of meat cultures around the world, stopping in India's unusual steakhouses, animal sacrifices at temples in Benin, and labs in the Netherlands that grow meat in petri dishes. From the power of evolution to the influence of the meat lobby, and from our genetic makeup to the traditions of our foremothers, she reveals the interplay of forces that keep us hooked on animal protein. A book for everyone from the diehard carnivore to the committed vegan, *Meathooked* illuminates one of the most enduring features of human civilization, ultimately shedding light on why meat-eating will continue to shape our bodies -- and our world -- into the foreseeable future.

Immunisation against infectious diseases Apr 28 2020 This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Method and Madness Mar 20 2022 In the past five years Israel has mounted three major assaults on the 1.8 million Palestinians trapped behind its blockade of the Gaza Strip. Taken together, Operation Cast Lead (2008-9), Operation Pillar of Defense (2012), and Operation Protective Edge (2014), have resulted in the deaths of some 3,700 Palestinians. Meanwhile, a total of 90 Israelis were killed in the invasions. On the face of it, this succession of vastly disproportionate attacks has often seemed frenzied and pathological. Senior Israeli politicians have not discouraged such perceptions, indeed they have actively encouraged them. After the 2008-9 assault Israel's then-foreign minister, Tzipi Livni, boasted, "Israel demonstrated real hooliganism during the course of the recent operation, which I demanded." However, as Norman G. Finkelstein sets out in this concise, paradigm-shifting new book, a closer examination of Israel's motives reveals a state whose repeated recourse to savage war is far from irrational. Rather, Israel's attacks have been designed to sabotage the possibility of a compromise peace with the Palestinians, even on terms that are favorable to it. Looking also at machinations around the 2009 UN sponsored Goldstone report and Turkey's forlorn attempt to seek redress in the UN for the killing of its citizens in the 2010 attack on the Gaza freedom flotilla, Finkelstein documents how Israel has repeatedly eluded accountability for what are now widely recognized as war crimes. Further, he shows that, though neither side can claim clear victory in these conflicts, the ensuing stalemate remains much more tolerable for Israelis than for the beleaguered citizens of Gaza. A strategy of mass non-violent protest might, he contends, hold more promise for a Palestinian victory than military resistance, however brave.
