Geography, History, and the American Political Economy Nov 28 2019 This collection takes on the call issued by reviewers of The American Way for a critical application of Carville Earle's framework to more geographical examples of political and economic shifts in America's past. The essays illustrate changes in U.S. settlement, development, and political structure through the lens of the restructuring of the American economy and society over approximately fifty year cycles of crisis and recovery. They demonstrate the extension of American's sphere of influence outside of the United States as a larger scalar shift, and they underscore the utility of geography in answering very local questions concerning questions of poorly documented settlement histories. Focusing on the geographic responses to periodic cycles of crisis and recovery and the more general underlying intertwining of geography and history, Geography, History, and the American Political Economy is an incisive demonstration of how the constant restructuring of American politics and economy occurs within spatial and historical constructs.

The Handy Geography Answer Book Nov 08 2020 Geography is more than just maps and finding your destination. It is about the land, the people on that land, the delicate balance of nature, and our very interdependence upon it, despite the miracles of technology and grocery stores. It's about the effects of nature on places and people, as well as how politics, borders, cities, and towns affect our lives. The Handy Geography Answer Book traces the history of geography from Eratosthenes and Alexander von Humboldt to latitude and longitude, and the latest advances in the Global Positioning System (GPS). It provides insights into economic, social, historic, culture, religious, political, and climate geography, plus oceanography, demographics, and more. Completely revised and updated, it tours the world, its natural features, and the ever-changing mark humans make on our planet, answering 1,200 questions from the trivia (longest, hottest, tallest) to how geography has influenced history, religion, architecture, and the location of cities, including Who first had the idea that there is a magnetic North Pole? What is interesting about Google's "Streetview"? How many people are projected to live on the planet in 2050? Which state has the highest annual divorce rate? What are the largest and smallest counties in the U.S.?

Answers to Questions You've Never Asked Aug 30 2022 The #1 bestselling trivia collection with bizarre facts to entertain you for hours, from the creator of YouTube's RealLifeLore. Where can I move to so that I'm never tempted by McDonald's again? How far into the Pacific does Trump's wall stretch? If Plato came back to life, what would he think of modern democracy? Why do all empires fail? Who decides what countries are allowed to participate in the Olympics? What makes Finland so great? When you take the most absurd parts of history, science, economics, and geography, you end up with a pretty confusing picture of humanity. Why do we have borders, what's the furthest you can get from the ocean, how do you qualify as a country, and why did Vikings wear those silly helmets? These are just a few of the strange questions that bounce around the head of YouTube sensation Joseph Piseni, aka RealLifeLore. In his debut book, Piseni explores the nonsensical humor of the universe with in-depth analysis of empires, economies, and ecosystems as he helps answer the ridiculous. Why, you ask? Because someone has to. Using line drawings, graphs, and charts, Piseni not only details the absurd—he also provides explanations on why things are . . . and why they aren't.
