**The Divide** Jan 05 2021 \_\_\_\_\_ As seen on Sky News All Out Politics 'There's no understanding global inequality without understanding its history. In *The Divide*, Jason Hickel brilliantly lays it out, layer upon layer, until you are left reeling with the outrage of it all.' - Kate Raworth, author of *Doughnut Economics* · The richest eight people control more wealth than the poorest half of the world combined. · Today, 60 per cent of the world's population lives on less than \$5 a day. · Though global real GDP has nearly tripled since 1980, 1.1 billion more people are now living in poverty. For decades we have been told a story: that development is working, that poverty is a natural phenomenon and will be eradicated through aid by 2030. But just because it is a comforting tale doesn't make it true. Poor countries are poor because they are integrated into the global economic system on unequal terms, and aid only helps to hide this. Drawing on pioneering research and years of first-hand experience, *The Divide* tracks the evolution of global inequality – from the expeditions of Christopher Columbus to the present day – offering revelatory answers to some of humanity's greatest problems. It is a provocative, urgent and ultimately uplifting account of how the world works, and how it can change for the better.

*Progressive Foreign Policy* Sep 01 2020 In May 1997, the then UK Foreign Secretary, Robin Cook, famously said that foreign policy should have 'an ethical dimension', and that the Labour Government would 'put human rights at the heart of foreign policy'. Although not described in these terms, these assertions were an attempt to articulate a 'progressive' conception of foreign policy for the UK. But how does the foreign policy record of the Labour Government stand when set against these declared principles? What role have ethics really played in Labour's foreign policy? Why has Labour been so interventionist, from Kosovo to Iraq? What does this record tell us about the limits and the possibilities of progressive foreign policy? What does it tell us about the strengths and failures of Labour's foreign policy? This timely book, published in association with the Institute for Public Policy Research and the Centre for Global Governance at the LSE, addresses these questions and provides an appraisal of Labour's record in power. However, the book also looks forward. It provides a novel assessment of the international trends that will shape the global context of UK foreign policy. The contributors set out new perspectives and policy options in respect of international security, democracy, justice, human rights, and sustainability. In addition, the book offers fresh thinking on the UK's relationship with key countries and regions, from the US to Europe, from the Middle East to China. Moreover, it suggests a radical new approach to global governance and to the way in which the UK makes and implements foreign policy. At a time of real flux in UK domestic politics and of rapid change in international politics, this book is an indispensable guide to the UK's foreign policy options and to the prospects and possibilities of a more values-driven and effective UK foreign policy.

**Nonprofit Investment and Development Solutions, + Website** Oct 26 2022 Solid guidance for managers and trustees to better position their nonprofits now and in the future The Great Recession has left a paradigm shift for nonprofit leadership and their board members as fiduciaries. It has changed how boards make, evaluate and document investment decisions, the risks they are willing to take and the way these details are communicated to donors. Nonprofit Investment and Development Solutions + Website will provide solid guidance for nonprofit leadership, staff and volunteers to better position their nonprofits to thrive now and in the future. This guide will provide: Sophisticated investment and development principles that are easily understandable and adaptable Specific steps to take in order to avoid unnecessary investment risk and secure financial stability Solutions and techniques for capitalizing on opportunities created by funding shifts and evolving donor expectations Principles and practices of fiduciary responsibility, behavioral finance, socially responsible investing, strategic development planning and charity efficiency In addition, Nonprofit Investment and Development Solutions + Website offers a web site resource with a variety of online tools and templates to help readers implement key concepts discussed in this book.

**Energy Security in Asia** Nov 15 2021 This book explores the various dimensions of energy security in Asia – which has become an increasingly important geopolitical issue. Reputable international contributors look at the roles played by each of the major energy importers: the United States, China, Japan and India, as well as the main suppliers: the OPEC states, Russia, the Central Asian states and Australia. In each case, the domestic politics of energy security are investigated, and state interests and perspectives on the issue are considered. Analyzing the policy

and security aspects of energy security, the book includes an examination of: the geopolitics of energy competition strategic, economic and environmental dimensions the impacts of energy security on human security. With energy security being one of the central issues facing the world today, this book is a timely and impressive appraisal of the major energy security issues facing Asia.

**Plants in Human Health and Nutrition Policy** Dec 24 2019 The present volume includes a series of studies on edible wild plants and their impact on human health. Today the diet of developed societies is limited to a few cultivated vegetables while the developing countries often lack an adequate supply of micronutrients. Wild plants contain antioxidant, omega-3 fatty acid and micronutrient components that contribute to both a decrease in the risk for chronic diseases as well as the reduction of nutritional deficiencies. Thus they address many diet-related problems at both ends of the socioeconomic spectrum. Results from research provide data on the composition of indigenous plants from various areas of the world and show that consumption of green leafy vegetables corrects deficiencies successfully. The book also deals with nutrition policy integrating indigenous foods against micronutrient deficiency. Implementation of scientific evidence is an essential precondition for improving nutrition policy. Nutritionists, food producers, botanists, agronomists, food technologists, pharmacologists as well as all professionals involved with food policy and human development will find in this book a valuable and updated basis for their work.

**Professional Test Driven Development with C#** Feb 24 2020 Hands-on guidance to creating great test-driven development practice Test-driven development (TDD) practice helps developers recognize a well-designed application, and encourages writing a test before writing the functionality that needs to be implemented. This hands-on guide provides invaluable insight for creating successful test-driven development processes. With source code and examples featured in both C# and .NET, the book walks you through the TDD methodology and shows how it is applied to a real-world application. You'll witness the application built from scratch and details each step that is involved in the development, as well as any problems that were encountered and the solutions that were applied. Clarifies the motivation behind test-driven development (TDD), what it is, and how it works Reviews the various steps involved in developing an application and the testing that is involved prior to implementing the functionality Discusses unit testing and refactoring Professional Test-Driven Development with C# shows you how to create great TDD processes right away.

**Flutter Recipes** Sep 25 2022 Take advantage of this comprehensive reference to solving common problems when developing with Flutter. Along with an introduction to the basic concepts of Flutter development, the recipes in this book cover all important aspects of this emerging technology, including development, testing, debugging, performance tuning, app publishing, and continuous integration. Although Flutter presents a rich, cross-platform mobile development framework, helpful documentation is not easily found. Here you'll review solutions to various scenarios and use creative, tested ways to accomplish everything from simple to complex development tasks. Flutter is developed using Dart and contains a unique technology stack that sets it apart from its competitors. This book takes the mystery out of working with the Dart language and integrating Flutter into your already existing workflows and development projects. With Flutter Recipes, you'll learn how to build and deploy apps freshly started in Flutter, as well as apps already in progress, while side-stepping any potential roadblocks you may face along the way. What You'll Learn Debug with Dart Observatory Program accessibility and localization features Build and release apps for iOS and Android Incorporate reactive programming Who This Book Is For Mobile developers with some experience in other frameworks who would like to work with the growing and popular Flutter.

**The World Bank and Transferring Development** Mar 19 2022 This book analyses the World Bank's provision of technical assistance from 1946 to the present day. It argues that the relational dynamics between technical assistance provider and recipient affects the legitimacy of policy norms travelling from the 'international' to the 'domestic'. Beginning from the constructivist position that 'development' is a social construct, the author contends that successful policy movement via technical assistance depends on the recipient's perception of the validity of policy reforms, with perception being influenced by the way those ideas and practices are presented, packaged, and transferred. In advancing this argument, Bazbauers analyses four pillars of World Bank technical assistance: technical assistance components (advisory services incorporated within lending operations), stand-alone technical assistance projects (projects designed to solely deliver technical assistance), survey missions (activities involved in measuring the development status of developing countries), and training institutes (the courses of the Economic Development Institute and World Bank Institute).

**Java Deployment** Aug 24 2022 Annotation Sun's Java Network Launch Protocol (JNLP) and Web Start technologies have re-energized the desktop Java market creating a strong need for deployment information. Java Deployment: Deploying Java Applications with JNLP and Web Start is for anyone who needs to solve the deployment problem for professional Java software, in particular for developers of Java software and customer organizations that install and maintain Java software for their users. This book is a practical guide and a reference for the new JNLP technology and its implementations. Overviews of the current state-of-the-art in the deployment-related technologies for Java and their impact on the implementations of a new-generation of network-centric software. Java Deployment: Deploying Java Applications with JNLP and Web Start takes a very practical approach to the topic of deploying Java applications. First, the book presents the major deployment concerns a Java developer faces and addresses the most common deployment scenarios. Next, the book addresses deployment issues the developer faces while coding a project. Finally, the book presents the JNLP technology and shows how to use JNLP in application deployment. Dr. Mauro Marinilli holds a degree in Computer Science Engineering from the University of Rome. His professional activity is divided between theoretical academic research and work as a Java development engineer. Dr. Marinilli has published several academic papers in Conference Proceedings and in specialized reviews, ranging from Information Filtering (IF), applications of Case-Based Reasoning (CBR) and Human-Computer Interaction (HCI) to Adaptive Hypermedia. Dr. Marinilli is the author of the first Information Filtering Applet, implementing an original algorithm and one of the first and pioneering works on Java3D editor tools cited on Sun Microsystems's site.

**The World Bank Legal Review Volume 6 Improving Delivery in Development** Apr 20 2022 Many developing countries have the capacity to develop broad development policy directions and formulate development programs that are logical and consistent, but these do not obtain the desired or targeted results because of challenges in the delivery system. It is increasingly apparent that development efforts must be carefully crafted and targeted in the right way to achieve the most effective results in an efficient manner. Recent literature in development studies evidence the important role of 'delivery' in actualizing positive and efficient development impact. Improving delivery and development impact requires a multidisciplinary approach. Development practitioners devoted to rule of law and justice must conjoin their efforts, concepts, tools and knowledge with experts from various disciplines so as to shape a delivery system that adds economic and social value to ultimate beneficiaries of development. In the foregoing light, the book brings together the diverse perspectives of development experts, international lawyers, academics, researchers, legal practitioners, public and civil servants, and other professionals, in order to explore the values of voice, social contract and accountability, and thereby address the following issue: How can law and justice tools, concepts and knowledge - when anchored in values such as voice, social contract and accountability - shape a delivery system that adds economic and social value to ultimate beneficiaries of development? The book revolves around a discussion of the three values of voice, social contract, and accountability as they relate to the role and function of law, rule of law, justice, judicial systems and other related areas, in delivering development impact. Additionally, the book departs from the legal and includes other multidisciplinary approaches in its discussion of the three values and their impact on delivery in development. The range of issues covered by the book include those relating to human rights, government policy, urban development, resource management, gender, social rights, economic reforms, financial empowerment, opportunity creation, governance, urban law, sustainable development and anti-corruption. *Quarterly Current Affairs Vol. 2 - April to June 2019 for Competitive Exams* Jul 19 2019 *Quarterly Current Affairs Vol. 1 - January to March 2019 for Competitive Exams* is a unique handy magbook as it gives the complete update of the 1st three months of 2019. The book talks of all the recent developments in the field of Polity, Economics, Science & Technology, Sports, Art & Culture etc. The book has been updated with an Exam Special Update - Banking, Railways, Agriculture, Environment, Science & Technology. This book would prove to be an asset for all students aspiring for the different competitive exams. The book uses unique analytical tools like Game Changers, Causes & Effects, Quote & Unquote, At a Glance, Emerging Trends, SWOT, MindMaps, Essays, Essay Ideas etc.

*Environmental Performance Reviews* Sep 20 2019 The focus of the ECE review programme is to help countries in transition to improve their individual and collective performance in environmental management. The ultimate goal is the promotion of sustainable development and the convergence of environmental conditions and policies throughout Europe. These reviews present a detailed study of countries' environmental position and examines: the framework for environmental policy and management; the management of pollution and natural resources; economic and sectoral integration featuring environmental concerns in agriculture and food processing, the transport of oil products and human health.

**Crafting Trade and Investment Accords for Sustainable Development** Jul 23 2022 International economic law guides and shapes globalization and the future of the world economy, our human societies, and the Earth. The rules which facilitate trade and investment could defend the interests of Hermes, Greek god of commerce and thieves, or learn to draw inspiration from Athena, goddess of justice, wisdom, and crafts. This volume explores how trade and investment agreements could promote more sustainable development, rather than increasing the negative social and environmental impacts of economic growth. States and other actors are attempting to integrate social and environmental considerations into trade and investment policies, towards more sustainable development. Analysing their efforts, this volume offers insights into the ways that commitments to sustainability are being operationalized in the texts of economic treaties themselves. Written by a renowned expert jurist and professor of law, this book examines the measures being debated in the WTO and adopted by States in a selection of innovative and flexible regional and bilateral trade and investment accords. With legal examples spanning decades of experimentation and experience, the book illuminates how States and stakeholders are seeking innovative ways to integrate environmental and social considerations into trade and investment agreements. Introducing a ground-breaking systematic approach, the volume considers how, through this integration, international trade and investment law can contribute to the achievement of the world's Sustainable Development Goals.

**New Labour in Power** Jul 11 2021 This systematic study considers the early performance of New Labour in power. Each chapter examines New Labour's initial comments, charts opening policy moves, and traces policy trajectories in each major department of state.

**Designing Indicators for a Plural Legal World** Nov 22 2019 *Designing Indicators for a Plural Legal World* engages with the role of quantification in law, and its impact on law and development and judicial reform. It seeks to examine how different institutions shape and influence the making and use of legal indicators globally. This book sheds light on the limitations of existing quantification tools, which measure rule of law due to their lack of engagement with contexts and countries in the Global South. It offers an alternative framework for measurement, which moves away from an institutional look at rule of law, to a bottom up, user centered approach that places importance on the lives that people lead, and the challenges that they face. In doing so, it offers a way of thinking about access to justice in terms of human capabilities.

**Scenario Studies for the Rural Environment** Apr 08 2021 Rural areas need to fulfil a large variety of functions and to accommodate many activities. The complexity of the problems, limited funds, and the almost irreversible character of some interventions result in a compelling need to evaluate ex ante the effects of alternative solutions for designation of land, for measures to develop infrastructure, and for soil and water management. Scenario studies are undertaken to help manage the complexity, to place bounds on uncertainties, and to create new visions. After an overview of the nature, variety and scope of scenario studies, the book illuminates various European examples and reviews, under the following headings: regional soil and water management; nature development and landscape quality; rural planning and the future of regions.

**How Clients Buy** Aug 20 2019 The real-world guide to selling your services and bringing in business *How Clients Buy* is the much-needed guide to selling your services. If you're one of the millions of people whose skills are the 'product,' you know that you cannot be successful unless you bring in clients. The problem is, you're trained to do your job—not sell it. No matter how great you may be at your actual role, you likely feel a bit lost, hesitant, or 'behind' when it comes to courting clients, an unfamiliar territory where you're never quite sure of the line between under- and

over-selling. This book comes to the rescue with real, practical advice for selling what you do. You'll have to unlearn everything you know about sales, but then you'll learn new skills that will help you make connections, develop rapport, create interest, earn trust, and turn prospects into clients. Business development is critical to your personal success, and your skills in this area will dictate the course of your career. This invaluable guide gives you a set of real-world best practices that can help you become the rainmaker you want to be. Get the word out and make productive connections Drop the fear of self-promotion and advertise your accomplishments Earn potential clients' trust to build a lasting relationship Scrap the sales pitch in favor of honesty, positivity, and value Working in the consulting and professional services fields comes with difficulties not encountered by those who sell tangible products. Services are often under-valued, and become among the first things to go when budgets get tight. It is now harder than ever to sell professional services, so your game must be on-point if you hope to out-compete the field. How Clients Buy shows you how to level up and start winning the client list of your dreams.

**Water-Energy-Food Nexus and Climate Change in Cities** May 29 2020 This book aims to contribute to the transdisciplinary study of the water-energy-food (WEF) nexus in cities and to help policy makers adopt a more integrated approach to natural resources management in urban environments to face the challenges and threats of climate change. This approach is based on a multidimensional scientific framework that seeks to understand the complex and non-linear interrelationships and interdependencies between water-energy-food under climate change and to generate solutions to reduce trade-offs among development goals and generate co-benefits that help encourage sustainable development and contribute to the achievement of SDGs, mainly SDG 11 (make cities and human settlements inclusive, safe, resilient and sustainable) and SDG 13 (take urgent action to combat climate change and its impacts). Governing the WEF nexus in cities is one of the greatest resource challenges of our time, as cities consume large amounts of WEF, but one that can also generate relevant alternatives with which to tackle climate change. To help fostering these alternatives, this book analyzes the governance, institutional and political economy factors that determine the effectiveness of the nexus approach and reviews the potential, the benefits and the policy implications of the adoption of the WEF nexus approach at the urban level. Through a series of hands-on cases, chapters in this book present the opportunities of the WEF nexus approach to achieve innovation and transformative change and discuss concrete areas of synergy and policy initiative to raise urban resilience. Water-Energy-Food Nexus and Climate Change in Cities will serve both as a guide for policy makers as well as a useful resource for students and researchers in fields such as urban studies, public health, environmental sciences, energy studies and public policy interested in learning how cities can represent possibilities to navigate and manage sustainability from local to global.

Building Services Engineering Oct 02 2020 Includes a chapter on automatic control.

**Golden State Floodlight** Jun 17 2019

*Logic, Mathematics, Philosophy, Vintage Enthusiasms* Apr 27 2020 The volume includes twenty-five research papers presented as gifts to John L. Bell to celebrate his 60th birthday by colleagues, former students, friends and admirers. Like Bell's own work, the contributions cross boundaries into several inter-related fields. The contributions are new work by highly respected figures, several of whom are among the key figures in their fields. Some examples: in foundations of maths and logic (William Lawvere, Peter Aczel, Graham Priest, Giovanni Sambin); analytical philosophy (Michael Dummett, William Demopoulos), philosophy of science (Michael Redhead, Frank Arntzenius), philosophy of mathematics (Michael Hallett, John Mayberry, Daniel Isaacson) and decision theory and foundations of economics (Ken Bimore). Most articles are contributions to current philosophical debates, but contributions also include some new mathematical results, important historical surveys, and a translation by Wilfrid Hodges of a key work of arabic logic.

Challenges of Constructing Legitimacy in Peacebuilding Jun 22 2022 Peacebuilding is a critical issue in world politics. Surprisingly, however, there has not been a full examination of concrete policies and implementation strategies to generate legitimacy in "host states" by either international relations (IR) theorists or practitioners. The objective of this book is to develop an understanding of the mechanisms for constructing—or eroding—the legitimacy of newly created governments in post-conflict peacebuilding environments. The book argues that although existing accounts in the literature contend that compliance with key political programs, and constructing legitimacy in peacebuilding, largely depend on the levels of force (guns) and resource distribution (money) aimed at people who are governed, there are other significant factors, such as inclusive governments reconciling with old enemies, and the substantial role of international organizations (IOs) as credible third parties to establish fairness and impartiality within the political process. Hashemi focuses on an in-depth analysis of the challenges involved in creating a legitimate government in Afghanistan, focusing on disarmament programs with powerful warlords, and the reconciliation efforts with the insurgency, especially the Taliban. In the conclusion the book also examines three complimentary cases—Iraq, East Timor, and Sierra Leone—which consistently support the argument presented earlier This work will be of interest to students and scholars of peacebuilding and conflict resolution as well as international relations more broadly.

Critical Environmental Politics Jan 25 2020 The aim of this book is to review central concepts in the study of environmental politics and to open up new questions, problems, and research agendas in the field. The volume does so by drawing on a wide range of approaches from critical theory to poststructuralism, and spanning disciplines including international relations, geography, sociology, history, philosophy, anthropology, and political science. The 28 chapters cover a range of global and local studies, illustrations and cases. These range from the Cochabamba conference in Bolivia to climate camps in the UK; UN summits in Rio de Janeiro and Johannesburg to climate migrants from Pacific islands; forests in Indonesia to Dutch energy governance reform; indigenous communities in Namibia to oil extraction in the Niger Delta; survivalist militias in the USA to Maasai tribesmen in Kenya. Rather than following a regional or issue-based (e.g. water, forests, pollution, etc) structure, the volume is organised in terms of key concepts in the field, including those which have been central to the social sciences for a long time (such as citizenship, commodification, consumption, feminism, justice, movements, science, security, the state, summits, and technology); those which have been at the heart of environmental politics for many years (including biodiversity, climate change, conservation, eco-centrism, limits, localism, resources, sacrifice, and sustainability); and many which have been introduced to these literatures and debates more recently (biopolitics, governance, governmentality, hybridity, posthumanism, risk, and vulnerability). Features and benefits of the book: Explains the most important concepts and theories in environmental politics. Reviews the core ideas behind crucial debates in environmental politics. Highlights the key thinkers – both classic and contemporary – for studying environmental politics. Provides original perspectives on the critical potential of the concepts for future research agendas as well as for the practice of environmental politics. Each chapter is written by leading international authors in their field. This exciting new volume will be essential textbook reading for all students of environmental politics, as well as provocatively presenting the

field in a different light for more established researchers.

Civil Society-based Governance in Africa Jun 29 2020 This book examines the liberal conception of civil society and its applicability to the context of Africa. Although it acknowledges the reality of civil society as a paradigmatic way of thinking about democracy and good governance, it questions the conception of civil society and its use for development in Africa. The book argues that if the concept of civil society is to be successful, it has to capture fully and correctly most aspects of Africa's associational life without leaving out major portions of the socio-political mosaic. Only then, can the concept of civil society be a legitimate tool for recognizing groups and associations and organizing their problems and claims for a sustainable democracy. The African experience is different from the liberal context of civil society. The liberal argument of civil society springs from the Western conception of state-society relationships. In this convention, power, authoritarianism and exploitation are the exclusive property of the state, while society belongs to the realm of freedom, rights, and liberty To examine this argument, this study uses Senegal as a case study to explore how the idiosyncrasy of societal development in this country has constructed and produced different types of associational life and how they fit within the liberal conception of civil society. Senegal was selected as an ideal case because it is widely regarded as a vibrant model of civil society and democracy. In essence, the question is whether the civil society that exists in Senegal conforms to the liberal argument of civil. The findings reveal that, in Senegal, civil society differs in many forms from the liberal propositions.

**Social Networking Communities and E-Dating Services: Concepts and Implications** Dec 04 2020 "This book provides an overview of the major questions that researchers and practitioners in this area are addressing at this time and by outlining the possible future directions for theory development and empirical research on social networking and eDating"--Provided by publisher.

**The Future of Leadership Development** Oct 22 2019 First Published in 2003. Routledge is an imprint of Taylor & Francis, an informa company.

Public Administration in Post-Communist Countries Nov 03 2020 Although it has been more than 20 years since Communism crumbled in Central and Eastern Europe and the Soviet Union, many scholars and politicians still wonder what the lifting of the Iron Curtain has really meant for these former Communist countries. And, because these countries were largely closed off to the world for so long, there has yet to be an all-inclusive study on their administrative systems—until now. In Public Administration in Post-Communist Countries: Former Soviet Union, Central and Eastern Europe, and Mongolia, expert contributors supply a comprehensive overview and analysis of public administration in their respective post-Communist countries. They illustrate each country's transformation from an authoritarian system of governance into a modern, market-based, and in some cases, democratic government. The book covers the countries that were officially part of the Soviet Union (Russia, Ukraine, Moldova, Estonia, Lithuania, Georgia, Kazakhstan, and Kyrgyzstan); those that were theoretically independent but were subject to Soviet-dominated Communist rule (Bulgaria, Hungary, Romania, and Poland); as well as a satellite republic that was under significant Soviet influence (Mongolia). Each chapter includes a brief introduction to the specific country, an overview of politics and administration, and discussions on key aspects of public management and administration—including human resource management, public budgeting, financial management, corruption, accountability, political and economic reform, civil society, and prospects for future development in the region. The book concludes by identifying common themes and trends and pinpointing similarities and differences to supply you with a broad comparative perspective.

**Monthly Labor Review** Feb 18 2022 Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews.

**International Organization** May 09 2021 The newly revised and updated edition of International Organization is an introduction to the study of international organizations in the field of International Relations intended for students in the discipline. It looks at the different ways in which IOs are studied and then applies these different modes to a variety of specific case studies.

Getting to Know Apple Swift Dec 16 2021 Readers today live in a digital age where various types of code power their world. From iPhones and iPads to the Apple Watch and Apple TV, code is the language that some of their favorite devices speak. Readers will get to know Apple Swift, the beginner-friendly programming language behind these devices and more. In this lively and informative book, readers will learn that with Swift, anyone can create cool apps. Not only will readers discover the fun they can have with Swift, they also learn why Swift is important and how learning more about it will benefit them.

International Drug Control Into the 21st Century Feb 06 2021 Providing a comprehensive analysis of drug misuse, dependence and the ways in which different parts of the world have responded to these problems, this volume examines aspects of the contemporary drug problem, the related debate and the way in which society is responding to it.
