Aesthetic Science Mar 29 2020 What do we do when we view a work of art? What does it mean to have an 'aesthetic' experience? Are such experiences purely in the eye of the beholder? This book addresses the nature of aesthetic experience from the perspectives of philosophy psychology and neuroscience.

*Human Capital Management Aug 22 2019 Human Capital Management (HCM) has been described as a high-level strategic issue that seeks to analyse, measure and evaluate how people policies and practices create value. Put simply, HCM is about creating and demonstrating the value that great people and great people management add to an organization. This unique book describes how HCM provides a bridge between human resource management and business strategy. It also demonstrates how organizations can use the concepts of human resource management and the processes involved to enhance the value they obtain from people while continuing to meet their aspirations and needs. Armstrong and Baron explain how to achieve these objectives using various approaches including: Describing the concepts of HCM and how the process works; Examining the practice of HCM with regard to measurement and reporting; Discussing the various applications of HCM with regard to HR strategy formulation, learning and development, knowledge management, performance management, reward management and talent management; and examining the role of HR in HCM and the future of the concept. It also contains an appendix a toolkit which organizations can use to develop their own HCM policies and practices.*

*Neurosurgery Board Review May 31 2020 Designed to evaluate candidates' expertise and provide direction for continued learning, the American Board of Neurological Surgery (ABNS) primary (written) examination is a required step to attaining board certification in the U.S. The rigorous exam requires substantial preparation. Each author brings unique qualifications to this publication – from writing previous editions, to achieving the second highest exam score in the U.S. – to the insights of a current chief resident. Their mission is to help readers comprehend the material and retain this knowledge, rather than solely striving for the highest score. This essential board prep review mirrors the exam's multiple-choice format and seven sections: neurosurgery, clinical neurology, neuroanatomy, neurobiology, neuropathology, neuroradiology, and clinical skills/critical care. Presented in a new and improved layout, the third edition encompasses the numerous advances in neurosurgery since the 2004 edition was published. New Key Features: Expanded coverage of endovascular techniques for the treatment of cerebral aneurysms, the latest advanced imaging technologies, and treatment paradigm updates for acute ischemic stroke. More than 1,000 questions with answers that include detailed, insightful explanations. High-quality illustrations and superb anatomical dissections by Albert L. Rhoton Jr., MD, and other masters. This invaluable board review will help neurosurgical residents prepare thoroughly for the primary ABNS exam. It is also beneficial for neuroscience residents specializing in neurology and neuropathology.*

*Elusive Equality Nov 05 2020 All men may be created equal in the United States - but more than 30 years after Congress proposed the Equal Rights Amendment, can the same be said for women? Elusive Equality offers a clear understanding of how government institutions - the executive branch, Congress, and state legislatures, as well as the federal courts - affect the legal status of women. Surveying the judicial and public policy issues central to the identification - and protection - of women's rights, Susan Mezey traces the developing legal parameters of gender equality. From early court rulings that prohibited employment discrimination and sexual harassment through today's decisions on reproductive rights and same-sex relationships, Mezey analyzes the broader political context within which critical judicial decisions have been made.*

*BIOMEDICAL INSTRUMENTATION AND MEASUREMENTS, 2nd Ed.* Oct 16 2021 Designed as a text for the undergraduate students of instrumentation, electrical, electronics and biomedical engineering, the second edition of the book covers the entire range of instruments and their measurement methods used in the medical field. The functions of the biomedical instruments and measurement methods are presented keeping in mind those students who have minimum required knowledge of human physiology. The purpose of this book is to review the principles of biomedical instrumentation and measurements employed in the hospital industry. Primary emphasis is laid on the method rather than micro level mechanism. This book serves two purposes: One is to explain the mechanism and functional details of human body, and the other is to explain how the biological signals of human body can be acquired and used in a successful manner. New to the second edition • The chapters of the book have been reorganized so that the students can understand the concepts in a systematic manner. • The chapter on Bioelectric Potentials and Transducers has been divided into three new chapters on Transducers for Biomedical Applications, Bioelectric Potential and Electrodes and some new sections are also included in these chapters. • A few sections have also been added to the chapter titled *Electrical Safety of Medical Equipment and Patients*.
