Thinking Kids' Math, Grade 1 Jan 24 2022 Thinking Kids'(R) Math is a fun and hands-on approach to learning math! Increase your first grader's critical thinking and problem solving skills with the colorful, interactive activities. Each activity supports early learning standards and uses a variety of manipulatives to encourage your child to connect with the math skills he or she is learning. In Thinking Kids'(R) Math, your child will learn about counting, place value, ordinal numbers, addition and subtraction, patterns, geometric shapes, graphing and measurement, and time. Thinking Kids'(R) Math is a series of hands-on, manipulative math activities aligned to the Common Core State Standards. Each 192-page book consists of different types of grade-appropriate hands-on activities. This series was built on the idea that children learn math concepts best through hands-on experiences. These activities will provide hours of fun while encouraging Common Core Standards through active learning.

Mathematics Tomorrow Mar 02 2020 Mathematics today is approaching a state of crisis. As the demands of science and society for mathematical literacy increase, the percentage of American college students intending to major in mathematics plummets and achievement scores of entering college students continue their unremitting decline. As research in core mathematics reaches unprecedented heights of power and sophistication, the growth of diverse applied specialties threatens to fragment mathematics into distinct and frequently hostile mathematical sciences. These crises in mathematics presage difficulties for science and engineering, and alarms are beginning to sound in the scientific and even in the political communities. Citing a trend towards "virtual scientific and technological illiteracy" and a "shrinking of our national commitment to excellence . . . in science, mathematics and technology," a recent study conducted for the President by the U. S. National Science Foundation and Department of Education warns of serious impending shortcomings in public understanding of science. "Today people in a wide range of non scientific . . . professions must have a greater understanding of technology than at any time in our history. Yet our educational system does not now provide such understanding." The study goes on to conclude that present trends pose great risk of manpower shortages in the mathematical and engineering sciences. "The pool from which our future scientific and engineering personnel can be drawn is . . . in danger of becoming smaller, even as the need for such personnel is increasing." It is time to take a serious look at mathematics tomorrow.

Spectrum Test Prep, Grade 4 Apr 14 2021 Spectrum Test Prep Grade 4 includes strategy-based activities for language arts and math, test tips to help answer questions, and critical thinking and reasoning. Mathematical Practices, Mathematics for Teachers: Activities, Models, and Real-Life Examples Feb 10 2021 To become a successful mathematics teacher, you must first become a successful mathematics student. Ron Larson and Robyn Silbey's first edition of MATHEMATICAL PRACTICES, MATHEMATICS FOR TEACHERS: ACTIVITIES, MODELS, AND REAL-LIFE EXAMPLES helps students aspire to be the best educators they can be. Peruse the book and you'll find Classroom Activities integrated into each section; modeling Examples that ask students how to model math concepts in the classroom; real-life Examples that model math concepts students will encounter in their everyday lives; and finally, to frame Ron and Robyn's approach, Common Core State Standards relevant to each lesson to provide future teachers with the knowledge of what their students should know at various grade levels. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
