United States Sentencing Commission Guidelines Manual 2013-2014
The Guidelines Manual is effective November 1, 2013- October 31, 2014. The 2013 amendments include some substantive, clarifying, and technical revisions to guidelines, policy statements, and commentary. To aid the reader in considering departures under the guidelines, the Guidelines Manual includes a list of departure provisions. The list appears at the back of the book, after the official Statutory Index (Appendix A) and the general index. For this edition, the general index has been redesigned to provide more references for more terms and generally make it easier to read, understand, and use. Appendix B (containing the principal statutory provisions governing sentencing as of May 1, 2013) is set forth in a separate volume. That volume is also enclosed. Appendix C sets forth guideline amendments and the accompanying reasons for amendment. Please take time to read the reasons for amendment when considering amendments. A new supplement to Appendix C (containing guideline amendments effective November 1, 2012, and November 1, 2013) is included. You should already have Volumes I through III (containing guideline amendments effective November 1, 1987, through November 1, 2011, and reasons for those amendments).

Rules and Guidance for Pharmaceutical Distributors 2013
2020 This new edition of The Green Guide provides a single source of guidance to, and legislation for, the distribution of medicines in Europe and UK. The Green Guide takes all the elements of the new Rules and Guidance for Pharmaceutical Manufacturers and Distributors 2014 (the Orange Guide) that are relevant to distributors, and reproduces them. Since the last edition in 2007, there have been significant changes and additions to the detailed European Community guidelines on Good Distribution Practice (GDP). The Community code relating to medicinal products for human use has also been substantially amended and the new edition brings together information about these important changes.

Therapeutic Guidelines Antibiotic. Version 15
2019 Apart from major textbooks of infectious disease, there have been few books published specifically on guidelines related to antibiotics. This text provides a well established set of clinical practice guidelines on antibiotics. This text is researched, concise and consistent in its presentation.

Geriatric Emergency Medicine
2020 This book discusses all important aspects of emergency medicine in older people, identifying the particular care needs of this population, which all too often remain unmet. The up-to-date and in-depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes, in conducting appropriate assessment, and in providing timely and adequate care. Particular attention is paid to the common pitfalls in emergency management and means of avoiding them. Between 1980 and 2013, the number of older patients in emergency departments worldwide doubled. Compared with younger patients, older people suffer from more comorbidities, a higher mortality rate, require more complex assessment and diagnostic testing, and tend to stay longer in the emergency department. This book, written by internationally recognized experts in emergency medicine and geriatrics, not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field.

[Children and Young People \(Scotland\) Act 2010](#)

Jan 22 2022

[Management of Acute Pulmonary Embolism](#)
Mar 24 2022 This practical volume highlights traditional, novel, and evolving aspects of the diagnosis and treatment of pulmonary embolism (PE). The contributors comprise an international team of experts. Important aspects of diagnosis, risk stratification, and differential treatment of patients with PE are presented in a concise, yet comprehensive manner. Emphasis is placed on special issues related to PE, including pregnancy, cancer, thrombophilia, and air travel.

The Green Book
Sep 29 2022 This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the analysis and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

CURRENT Practice Guidelines in Primary Care 2014
2021 Guidelines for more than sixty common outpatient conditions - drawn from the most authoritative sources For more than 70 years, professors, students, and clinicians have trusted LANGE for high-quality, current, concise medical information in a convenient, affordable, portable format. Whether for coursework, clerkships, USMLE prep, specialty board review, or patient care, there's a LANGE book that guarantees success. The most current screening, prevention, and management guidelines -- from government agencies, medical and scientific organizations, and expert panels Easy-to-follow guideline-based algorithms simplify clinical decision making Spans all areas of general medicine Website addresses for U.S. government agencies and professional societies Updated immunization schedules for all age groups Updated evidence-based content More than thirty new topics Essential for residents and practicing physicians

medicine, internal medicine, pediatrics, and obstetrics and gynecology; medical and nursing students; registered nurses; nurse practitioners; physician assistants

The Prevention and Control of Iodine Deficiency Disorders Feb 20 2022

The American Psychiatric Association Practice Guideline on the Use of Antipsychotics to Treat Agitation or Psychosis in Patients With Dementia 27 2019 The guideline offers clear, concise, and actionable recommendation statements to help clinicians to incorporate recommendations in clinical practice, with the goal of improving quality of care. Each recommendation is given a rating that reflects the level of confidence that potential benefits of an intervention outweigh potential harms.

ACSM's Guidelines for Exercise Testing and Prescription 26 2022 The flagship title of the certification suite from the American College of Sports Medicine, ACSM's Guidelines for Exercise Testing and Prescription is a handbook that delivers scientifically based standards on exercise testing and prescription to the certification candidate, the professional, and the student. The 9th edition focuses on evidence-based recommendations that reflect the latest research and clinical information. This manual is an essential resource for any health/fitness and clinical exercise professional, physician, nurse, physician assistant, physical and occupational therapist, dietician, and health care administrator. This manual give succinct summaries of recommended procedures for exercise testing and exercise prescription in healthy and diseased patients

British National Formulary 26 2019
Braddom's Physical Medicine and Rehabilitation 09 2020 The most-trusted resource for physiatry knowledge and techniques, Braddom's Physical Medicine and Rehabilitation remains an essential guide for the entire rehabilitation team. With proven science and comprehensive guidance, this medical reference book addresses a range of topics to offer every patient maximum pain relief and optimal return to function. Depth coverage of the indications for and limitations of axial and peripheral joints through therapies enables mastery of these techniques. O the use of ultrasound in diagnosis and treatment. A chapter covering PM&R in the international community serves to broaden your perspective the field. Detailed illustrations allow you to gain a clear visual understanding of important concepts. New lead editor - Dr. David Cifu - was succeeded by Dr. Randall Braddom to retain a consistent and readable format. Additional new authors and editors provide a fresh perspective to this edition. Features comprehensive coverage of the treatment of concussions and military amputees. Includes brand-new information on rehabilitating wounded military personnel, the latest injection techniques, speech/swallowing disorders, head injury rehabilitation, and the rehabilitation of chronic diseases. New chapters on pelvic floor disorders and sensory impairments keep you at the forefront of the field. Reader-friendly design features an updated table of contents and improved chapter approach for an enhanced user experience. Expert Consult eBook version included with purchase. This enhanced eBook experience gives access to the text, figures, over 2,500 references, 51 videos, and 750 self-assessments on a variety of devices.

Special Educational Needs 24 2019

Consolidated Guidelines on the Use of Antiretroviral Drugs for Treating and Preventing HIV Infection 20 2019 These guidelines provide guidance on the diagnosis of human immunodeficiency virus (HIV) infection, the use of antiretroviral (ARV) drugs for treating and preventing HIV infection and the care of people living with HIV. They are structured along the continuum of HIV testing, prevention, treatment and care. This edition updates the 2013 consolidated guidelines on the use of antiretroviral drugs following an extensive review of evidence and consultations in March shared at the end of 2015, and now published in full in 2016. It is being published in a changing global context for HIV and for health more broadly.

Diagnosis and Management of Hypertrophic Cardiomyopathy 29 2022 Diagnosis and Management of Hypertrophic Cardiomyopathy is a unique, multi-authored compendium of information regarding the complexities of clinical and genetic diagnosis, natural history, and management of hypertrophic cardiomyopathy (HCM)—the most common and important of the genetic cardiovascular diseases—as well as related issues impacting health of trained athletes. Edited by Dr. Barry J. Maron, a world authority on HCM, and with major contributions from all of the international experts in this field, this book provides a single comprehensive source of information concerning HCM. Recent advances in the field are discussed, including the importance of left ventricular outflow tract obstruction, the use of implantable defibrillators for the prevention of sudden death in young people, definition of the genetic basis for HCM and its role in clinical diagnosis and risk stratification, the development of more precise strategies for assessing the level of risk for sudden death among all patients with HCM, and the evolution of invasive interventions for heart failure symptoms, such as surgical management and its alternatives (alcohol septal ablation and dual-chamber pacing). Key Features: Contributions from all experts in the field, representing diverse viewpoints regarding this heterogeneous disease and related issues in athletes. Information to dispel misunderstandings regarding issues associated with HCM and cardiovascular disease in athletes. The only comprehensive source of information available on the topic.

Nutritional Care of Preterm Infants 14 2021 Improved conditions of care for premature infants have led to markedly increased survival rates over the last few decades, particularly in very low and extremely low birth weight infants. Nutritional measures play a central role in the long-term outcome, health and quality of life of these premature infants. In this publication, leading experts from all 5 continents present the most recent evidence and critical analyses of nutrient requirements and the practice of nutritional care (with the focus on very low birth weight infants) to provide guidance for clinical application. After the introductory chapters, covering nutritional needs and research evidence in a more general manner, topics such as amino acids and proteins, lipids, microminerals and vitamins, parenteral and enteral nutrition as well as approaches to various disease conditions are addressed. Due to its focus on critical appraisals and recommendations, this book is of interest not only for the researcher who wants to keep up to date, but also for the clinician faced with premature infants in his practice.

Children and Young People (Scotland) Act 25 2019

WHO Guidelines on Hand Hygiene in Health Care 17 2021 The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

National planning policy framework 2012 26 2022 The National Planning Policy Framework 2012 sets out the Government's planning policy for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system, not only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen

chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals.

Guideline: Sugars Intake for Adults and Children Dec 21 2021 This guideline provides updated global, evidence-informed recommendations on the intake of free sugars to reduce the risk of NCDs in adults and children, with a particular focus on the prevention and control of unhealthy weight gain and dental caries. The recommendations in this guideline can be used by policy-makers and programme managers to assess current intake levels of free sugars in their countries relative to a benchmark. They can also be used to develop measures to decrease intake of free sugars, where necessary, through a range of public health interventions. Examples of such interventions and measures that are already being implemented in many countries include food and nutrition labelling, consumer education, regulation of marketing of food and non-alcoholic beverages that are high in free sugars, and fiscal policies targeting foods and beverages that are high in free sugars. This guideline should be used in conjunction with other nutrient guidelines and dietary goals, in particular those related to fats and fatty acids (including saturated fatty acids and trans-fatty acids) to guide development of effective public health nutrition policies and programmes to promote a healthy diet.

Children and Young People (Scotland) Act 2014 2014 2021

Annual Report on the OECD Guidelines for Multinational Enterprises Jun 2014 2020 This 14th annual report on the OECD Guidelines for Multinational Enterprises describes the activities undertaken to promote the observance of the Guidelines during the implementation cycle of 2013-June 2014. This includes work on due diligence in the financial and extractive sectors, as well as along agricultural supply chains, strengthened co-operation with non-adhering countries, the outcomes of the 2nd Global Forum on Responsible Business Conduct, as well as activities of National Contact Points who promote the observance of the Guidelines' principles and standards in the 46 adhering countries.

WHO Guidelines for Indoor Air Quality Jan 28 2020 This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide, polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

The Health and Social Care Act 2008 (Regulated Activities) Regulations Sep 25 2012 2020 Enabling power: Health and Social Care Act 2008, ss. 8 (1), 20 (1) to (5A), 35, 86 (2) (4), 87 (1) (2), 161 (3) (4). Issued: 11.07.2014. Made: -. Laid: -. Coming into force: In accord. with reg. 1. Effect: 2012/921 partially revoked & 2010/781; 2011/2711; 2012/1513 revoked. Territorial extent & classification: E. For approval by resolution of House of Parliament

Guidelines on the Management of Latent Tuberculosis Infection Mar 2021 BACKGROUND: Latent tuberculosis infection (LTBI), defined as a state of persistent immune response to prior-acquired Mycobacterium tuberculosis antigens without evidence of clinically manifested active disease, affects about one-third of the world's population. Approximately 10% of people with LTBI will develop active TB disease in their lifetime, with the majority developing it within the first five years after initial infection. Currently available treatments have an efficacy ranging from 60% to 90%. Systematic testing and treatment of LTBI in at-risk populations is a critical component of WHO's eight-point framework adapted from the End TB Strategy to target pre-elimination and, ultimately, elimination in low incidence countries. OVERVIEW: Recognizing the importance of expanding the response to LTBI, in 2014 WHO developed Guidelines on the Management of Latent Tuberculosis Infection. The guidelines are primarily targeted at high-income or upper middle-income countries with an estimated TB incidence rate of less than 100 per 100 000 population, but they are most likely to benefit from it due to their current TB epidemiology and resource availability. The overall objective of the guidelines is to provide public health approach guidance on evidence-based practices for testing, treating and managing LTBI in individuals with the highest risk of progression to active disease. Specific objectives include identifying and prioritizing at-risk population groups for targeted intervention of testing and treatment, including defining an algorithm, and recommending specific treatment options. The guidelines are expected to provide the basis and rationale for the development of national guidelines for LTBI management based on available resources, epidemiology of TB including intensity of transmission, the health-care delivery system of the country, and other national and local determinants.

Pocket Book of Hospital Care for Children Apr 24 2022 The Pocket Book is for use by doctors nurses and other health workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updates and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book consists of a series of documents and tools that support the Integrated Management of Childhood Illnesses.

ASA S3/SC1.4 TR-2014 Sound Exposure Guidelines for Fishes and Sea Turtles: A Technical Report prepared by ANSI-Accredited Standards Committee S3/SC1 and registered with ANSI 2021 This Technical Report presents the outcome of a Working Group that was established to determine broadly applicable sound exposure guidelines for fishes and sea turtles. After consideration of the diversity of fish and sea turtles, sound exposure guidelines were developed for broad groups of animals, defined by the way they detect sound. Different sound sources were considered in terms of their acoustic characteristics and appropriate metrics defined for measurement of the received levels. The resultant sound exposure guidelines are presented in a set of tables. In some cases numerical guidelines are provided, expressed in appropriate metrics. When there were insufficient data to support numerical values, the relative likelihood of effects occurring was evaluated, although the actual likelihood of effects depends on the sound level. These sound exposure guidelines, which are based on the best scientific information at the time of writing, should be treated as interim guidelines. The expectation is that with more research the guidelines can be refined and more cells in the tables completed. Recommendations are put forward for defining the research requirements of highest priority for extending these interim exposure guidelines.

Alexander's Nursing Practice E-Book Nov 07 2020 The latest edition of this popular volume has been fully updated throughout to meet the needs of the 2018 NMC Standards of Proficiency. Richly illustrated throughout, the book comes with 'real-life' Case Studies to help readers contextualise and apply new information, pathophysiology to explain disease processes, enhanced discussion of pharmacology and medicines management to assist with 'prescribing readiness', and helpful learning features which include Key Nursing Issues and Reflection and Learning – What Next? Available with a range of supplementary online tools and learning activities, Alexander's Nursing Practice, fifth edition, will be ideal for all undergraduate adult nursing students, the Trainee Nursing Associate, and anyone returning to practice. New edition of the UK's most comprehensive textbook on Adult Nursing! Retains the popular 'three-part' structure to ensure comprehensive coverage of the subject area. Common Disorders, Core Nursing Issues and Specific Patient Groups Illustrative A&P and pathophysiology help explain key diseases and disorders 'Real-life' Case Studies help contextualise and apply new information Explains relevant tests and investigations and, when needed, the role of the nurse in the context of each of them Helpful learning features include Key Nursing Issues and Reflection and Learning – What Next? Encourages readers to critically examine issues that are related to care provision Useful icons throughout the text directs readers to additional resources

online material Glossary contains over 300 entries to explain new terminology and concepts Appendices include notes on Système International units and reference ranges for common biochemical and haematological values Perfect for second and third-year undergraduate nursing students, senior Trainee Nursing Associates, those 'returning to practice' or needing to review practice and prepare for revalidation Edited by the world-renowned Ian Peate – editor of the British Journal of Nursing – who brings together a new line up of contributors from across the UK and Australia Reflects contemporary issues such as the complexity of acute admissions and the increasing importance of the multidisciplinary approach to patient care Reflects the 2018 NMC Standards of Proficiency for Nurses and the NMC 2018 Code Helps prepare students for 'prescribing readiness', with basic principles of pharmacology, evidence-based person-centred approaches to medicines management and an understanding of the regulatory, professional legal and ethical frameworks Recognises the introduction of the Nursing Associate role in England Immunisation against infectious diseases 28 Oct 2022 This is the third edition of this publication which contains the latest information on vaccination and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Severe Asthma Jul 16 2021 Severe asthma is a form of asthma that responds poorly to currently available medication, and its patients represent those with greatest unmet needs. In the last 10 years, substantial progress has been made in terms of understanding some of the mechanisms that drive severe asthma: there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma – epidemiology, diagnosis, mechanisms, treatment and management – but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various 'omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.

WHO Recommendations for Augmentation of Labour 02 2020 Optimizing outcomes for women in labor at the global level requires evidence-based guidance of health workers to improve care through appropriate patient selection and use of effective interventions. In this regard, the World Health Organization (WHO) published recommendations for induction of labor in 2011. The goal of the present guideline is to consolidate the guidance for effective interventions that are needed to reduce the global burden of prolonged labor and its consequences. The primary target audience includes health professionals responsible for developing national and local health protocols and policies, as well as obstetricians, midwives, nurses, general medical practitioners, managers of maternal and child health programs, and public health policy-makers in all settings.

Who Handbook for Guideline Development 31 Oct 2022 This handbook provides detailed instructions for guideline developers on the following topics: application of high quality methodology for guideline development using systematic search strategies, synthesis and quality assessment of the best available evidence to support the recommendations; appropriate collection and management of experts' declared conflict of interest; expert group composition including content experts, methodologists, target users, policy makers, with gender and geographical balance; instruction on the management of group process to achieve consensus among experts; standards for a transparent decision-making process, taking into consideration potential harms and benefits, end users values and preferences; developing plans for implementing and adapting guidelines; and minimum standards for reporting.--Publisher description

Cochrane Handbook for Systematic Reviews of Interventions 07 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential guide for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform them themselves.

ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription 15 Oct 2020 ACSM's Resource Manual for Guidelines for Exercise Testing and Prescription was created as a complement to ACSM's Guidelines for Exercise Testing and Prescription and elaborates on all major aspects of preventative rehabilitation and fitness programs and the major position stands of the ACSM. The 7th edition provides information necessary to address the knowledge, skills, and abilities set forth in the new edition of Guidelines, and explains the science behind the exercise testing and prescription. ACSM's Resource Manual is a comprehensive resource for those working in the fitness and clinical exercise fields, as well as those in academic training.

Rules and Guidance for Pharmaceutical Manufacturers and Distributors (The Orange Guide) 19 Oct 2021 This publication, known as the "Orange Guide", has been an essential reference for those involved in the manufacture or distribution of medicines in Europe. The Orange Guide collates in one convenient and authoritative source European and UK guidance documents and information on legislation relating to the manufacture and distribution of medicines for human use. In the production and distribution of medicines for human use, compliance with Good Manufacturing Practice and Good Distribution Practice is a necessity. Changes to this particular edition include: detailed changes to the EU Directive on good manufacturing practice; detailed revisions to the EU Directive on medicinal products for human use; the new Directive on the Principles and Guidelines on Good Manufacturing Practice of Medicinal Products for Human Use. The document is compiled by the Inspection and Standards Division of the Medicines and Healthcare products Regulatory Agency.

ASHP Best Practices 2014-2015 24 Oct 2019 More than half a century ago, ASHP® developed its earliest proposed practice standard—the Proposed Minimum Standards for Pharmacies in Hospitals. Today, ASHP continues to foster concrete improvements in pharmacy practice and the therapeutic use of drugs with its annual compilation of ASHP guidance documents: ASHP Best Practices. These guidance documents have stimulated improvements in pharmacy practice and operations, influenced accreditation standards, laws, and regulations (both in the United States and in other countries), and contributed to an awareness among consumers and policymakers of the vital patient care role of pharmacists. ASHP Best Practices, ASHP continues to provide positions and more than 70 ASHP guidance documents of varying scope that provide ongoing advice to practitioners and health systems to help improve the medication-use process, patient care and safety, and patient outcomes and quality of care. ASHP Statements • ASHP Guidelines • Technical Assistance Bulletins • Therapeutic Position Statements • Therapeutic Guidelines • ASHP-Endorsed Documents Substantial content has been added or revised since the release of the 2013–2014 edition. New or revised material in this edition includes: • ASHP Guidelines on Preventing Medication Errors with Chemotherapy and Biotherapy • ASHP Guidelines on the Pharmacist's Role in Providing Drug Information • ASHP Statement on the Pharmacist's Role in Clinical Pharmacogenomics • ASHP Therapeutic Position

Statement on Strategies for Identifying and Preventing Pneumococcal Resistance ASHP Best Practices is the most comprehensive set of quality guidelines available to the pharmacy profession.

April 2021 This book is an up-to-date summary of all aspects of aortic disease, written by international experts in their fields, covering diagnostic concepts of all aortic diseases, the most modern therapeutic approaches in various syndromes, the pathogenic origin and the most recent molecular and cellular findings that have revolutionized our present knowledge of aortic diseases. The reader will come to understand the aorta as a functional organ with a complex regulatory system rather than just a major arterial vessel, and will have a better understanding of the prognostic impact of various aortic syndromes, and of the most recent therapeutic concepts in chronic as well as acute aortic pathology. As a unique feature of this book, the aorta is placed in the center of systemic illnesses, such as atherosclerosis, diabetes, hypertension, infectious diseases and connective tissue disorders, storage diseases, trauma and toxic factors; this book aims to attract the attention of both clinical specialties such as cardiology, radiology and cardiovascular surgery and adjacent areas like pathology and clinical genetics. The book portrays the aorta as an integral part of the cardiovascular system and the entire organism and features the complexity and clinical impact of all major aortic diseases.

February 2020 This product of the Facility Guidelines Institute (FGI) provides minimum standards for design and construction of hospitals and outpatient facilities. The standards for long-term care facilities will appear in a new document for 2014; please see the entry for Guidelines for Design and Construction of Residential Health, Care, and Support Facilities. Included in the Guidelines for Hospitals and Outpatient Facilities is information on the planning, design, construction, and commissioning process and facility requirements for both hospitals and outpatient facilities. Included are general hospitals, psychiatric hospitals and rehabilitation facilities as well as new chapters on children's and critical access hospitals. Outpatient facilities covered include primary care facilities; outpatient surgery facilities; birth centers; urgent care centers; mobile units; outpatient psychiatric and rehabilitation centers; facilities for endoscopy, dialysis, and cancer treatment; and a new chapter on dental facilities. In addition, the 2014 Guidelines includes new material on safety risk assessments and medication safety zones; increased requirements for commissioning infrastructure systems; and updated requirements for surgery, imaging, endoscopy, and dialysis facilities as well as primary care facilities and freestanding emergency facilities.
