Sensemaking in Elementary Science Jan 05 2021 Grounded in empirical research, this book offers concrete pathways to direct attention towards elementary science teaching that privileges sensemaking, rather than isolated activities and vocabulary. Outlining a clear vision for this shift using research-backed tools, pedagogies, and practices to support teacher learning and development, this edited volume reveals how teachers can best engage in teaching that supports meaningful learning and understanding in elementary science classrooms. Divided into three sections, this book demonstrates the skills, knowledge bases, and research-driven practices necessary to make a fundamental shift towards a focus on students' ideas and reasoning, and covers topics such as: An introduction to sensemaking in elementary science; Positioning students at the center of sensemaking; Planning and enacting investigation-based science discussions; Designing a practice-based elementary teacher education program; Reflections on science teacher education and professional development for reform-based elementary science. In line with current reform efforts, including the Next Generation Science Standards (NGSS), Sensemaking in Elementary Science is the perfect resource for graduate students and researchers in science education, elementary education, teacher education, and STEM education looking to explore effective practice, approaches, and development within the elementary science classroom.

Yardsticks Jul 31 2020 Expanded from its previous edition to include ages 13 and 14, this book provides teachers and parents with a quick reference on important childhood developmental issues, explaining what children should be learning and doing in the classroom at each developmental stage. The book begins by discussing how developmental issues can affect administrative and classroom decisions in the areas of mixed age grouping, ability grouping, retention, food, exercise, the structure of the school day, and racial and cultural questions. Each of the 11 chapters, one for each year, includes a narrative description and charts outlining growth patterns, classroom implications, and appropriate curriculum. The charts allow readers to identify developmental "yardsticks" for a given age. These charts outline characteristic growth patterns (physical, social, language, and cognitive) as well as what to expect in the classroom regarding vision and fine motor ability, gross motor ability, cognitive growth, and social behavior. The curriculum charts summarize the developmental continuum between ages 4 and 14, covering reading, writing, mathematics, and thematic units in social science, science, and current events. The book concludes with a list of over 100 favorite books for different ages, and resources for parents and teachers. (HTH)

*Ship of Fools* Aug 20 2019 The #1 New York Times bestseller from FOX News star of *Tucker Carlson Tonight* offers "a targeted snipe at the Democrats and Republicans and their elite enablers" (*New York Journal of Books*) in a funny political commentary on how America's ruling class has failed everyday Americans. "Informal and often humorous...an entertainingly told narrative of elite malfeasance" (*Publishers Weekly*), *Tucker Carlson's Ship of Fools* tells the truth about the new American elites, a group whose power and wealth has grown beyond imagination even as the rest of the country has withered. The people who run America now barely interact with it. They fly on their own planes, ski on their own mountains, watch sporting events far from the stands in sky boxes. They have total contempt for you. In *Ship of Fools*, Tucker Carlson offers a blistering critique of our new overlords and answers the all-important question: How do we put the country back on course? Traditional liberals are gone, he writes. The patchouli-scented hand-wringers who worried about whales and defended free speech have been replaced by globalists who hide their hard-edged economic agenda behind the smokescreen of identity politics. They'll outsource your job while lecturing you about transgender bathrooms. Left and right, Carlson says, are no longer meaningful categories in America. "The rift is between those who benefit from the status quo, and those who don't." Our leaders are fools, Carlson concludes, "unaware that they are captains of a sinking ship." But in the signature and witty style that viewers of *Tucker Carlson Tonight* enjoy so much, *Ship of Fools* is "bulging with big and interesting ideas, presented succinctly with wit and precision, each chapter a potential book in itself" (*The Washington Times*).
