*Good Smell, Make-up Tree* Jul 20 2019 Tiré du site Internet de JRP/Ringier: ""When encountering the strange objects (sculptures, drawings, installations) made by Urs Fischer (\*1973)," writes the book's editor, Beatrix Ruf, "a waterfall of quickly triggered words, memories, comparisons, reproduced knowledge, and understanding is combined with speechlessness. It is as if an Internet search engine had generated a massive number of hits leading to technical and mental breakdown, confronting the user with a simultaneity of information, styles, facts, and possibilities that are at first unmanageable." The book has been conceived by the artist as a cross-referencing of his process-related and "styleless" work through the arrangement of more than 200 images: reproductions of works, installation views, studio shots, and special features.

Using all possible ordinary materials, Fischer creates unhierarchical collages of objects and thoughts, high and low aesthetics, mundane and artistic memories, and personal and political interrogation. The publication has been designed by Scipio Schneider in collaboration with the artist, and laid out in printed form as a studio journal. Asked for a contribution, the London-based composer, engineer, and consultant Garrick Jones (\*1965) wrote seven piano studies and a suite for strings and oboe inspired by Fischer's work. Taking up 200 pages of the book, these scores have been recorded, and the results are available on CD or as downloads on request from the publisher."

***Improving Air Force Purchasing and Supply Management of Spare Parts May 10 2021*** This research provides the Air Force with a methodology for evaluating various strategies to improve the procurement of spare parts and applies the methodology to

**F100 engine parts. The author uses exploratory analysis techniques and system dynamic modeling to gain a better understanding of the effectiveness of various supplier management policies, including identifying those policy levers most effective in improving various measures of interest. The research shows that policy and organizational changes in the purchasing and supply management (PSM) process have the potential to improve effectiveness while maintaining or lowering costs. It also demonstrates that a system dynamic model can be an important contribution to defining, discussing, and understanding the complex interactions among policy levers and outcome measures, particularly in enhancing PSM efficiency and effectiveness.**

**Virgil's Garden Dec 17 2021 Virgil's book of bucolic verse, the Eclogues, defines a green space separate from the outside worlds both of other Roman verse and of the real world of his audience. However, the boundaries between inside and outside are deliberately porous. The bucolic natives are aware of the presence of Rome, and Virgil himself is free to enter their world. Virgil's bucolic space is, in many ways, a poetic replication of the public and private gardens of his Roman audience - enclosed green spaces which afforded the citizen sheltered social and cultural activities, temporary respite from the turbulence of public life, and a tamed landscape in which to play out the tensions between the simple ideal and the complexities of reality. This book examines the Eclogues in terms of the relationship between its contents and its cultural context, making connections between the Eclogues and the representational modes of Roman art, Roman concepts of space and landscape, and Roman gardens.**

**The Books of Kings Jun 30 2020 This collaborative commentary on, or dictionary of, Kings, explores cross-cutting aspects of Kings ranging from the analysis of its composition, historically regarded, to its transmission and reception. Ample attention is accorded sources, figures and peoples who play a part in the book. The commentary deals with Kings treatment in translation and role in later ancient literature. While our comments do not proceed verse by verse, the volume furnishes guidance, from contributors highly qualified to advance contemporary discussion, on the book's historical background, its literary intentions and characteristics, and on themes and motifs central to its understanding, both of itself and of the world from which it arose. This volume functions as a meta-commentary, offering windows into the secondary literature, but assembling data more fully than is the case in individual commentaries.**

**Escaping the Labyrinth Mar 28 2020 Beneath the Bronze Age 'Palace of Minos', Neolithic Knossos is one of the earliest known farming settlements in Europe and perhaps the longest-lived. For 3000 years, Neolithic Knossos was also perhaps one of**

very few settlements on Crete and, for much of this time, maintained a distinctive material culture. This volume radically enhances understanding of the important, but hitherto little known, Neolithic settlement and culture of Crete. Thirteen papers, from the tenth Sheffield Aegean Round Table in January 2006, explore two aspects of the Cretan Neolithic: the results of recent re-analysis of a range of bodies of material from J.D. Evans' excavations at EN-FN Knossos; and new insights into the Cretan Late and Final Neolithic and the contentious belated colonisation of the rest of the island, drawing on both new and old fieldwork. Papers in the first group examine the idiosyncratic Knossian ceramic chronology (P. Tomkins), human figurines from a gender perspective (M. Mina), funerary practices (S. Triantaphyllou), chipped stone technology (J. Conolly), land and-use and its social implications (V. Isaakidou). Those in the second group, present a re-evaluation of LN Katsambas (N. Galanidou and K. Mandeli), evidence for later Neolithic exploration of eastern Crete (T. Strasser), Ceremony and consumption at late Final Neolithic Phaistos (S. Todaro and S. Di Tonto), Final Neolithic settlement patterns (K. Nowicki), the transition to the Early Bronze Age at Kephala Petra (Y. Papadatos), and a critical appraisal of Final Neolithic 'marginal colonisation' (P. Halstead). In conclusion, C. Broodbank places the Cretan Neolithic within its wider Mediterranean context and J.D. Evans provides an autobiographical account of a lifetime of insular Neolithic exploration.

Laws in the Bible and in Early Rabbinic Collections Feb 07 2021 The remarkable discovery of ancient Near Eastern law collections or "codes," beginning with the Laws of Hammurabi and followed by many other collections in decades following, opened a new window upon biblical law. This volume seeks to examine within a single study all of the biblical laws that are similar in content with ancient Near Eastern laws from Sumer, Babylonia, Assyria, and Hatti. The book also examines a small but important group of early rabbinic laws from postbiblical times that exhibit significant similarities with laws found in the ancient Near Eastern collections or "codes." This later group of laws, although absent from the Bible, are nevertheless of comparable antiquity. The presentation focuses on the actual law statements preserved in these ancient law "codes." The discussion then adds narratives, records, and reports of legal actions from ancient sources outside the laws-all of which relate to the formal law statements. The discourse is non-polemical in tone and does not seek to revisit all theories and interpretations. The format allows readers, including those who are new to the subject of biblical law, to engage the primary sources on their own.

The Book of Genesis Oct 03 2020 Retrieves rich historical biblical insights for readers of Genesis today In this latest addition to the Bible in Medieval Tradition series, Joy Schroeder provides substantial excerpts — none previously available in English — from seven noteworthy medieval biblical interpreters who commented on Genesis between the ninth and fifteenth centuries. Representing a chronological and geographical range of authors — including Hildegard of Bingen, Nicholas of Lyra, and Denis the Carthusian — these clear, readable translations illustrate the rich diversity of medieval approaches to biblical interpretation. The commentary covers the entire book of Genesis and includes an in-depth introduction by Schroeder that locates each of the medieval authors within his or her context.

*The Principle of Subsidiarity in Catholic Social Thought* Mar 08 2021 The Principle of Subsidiarity in Catholic Social Thought: Implications for Social Justice and Civil Society in Nigeria provides a theoretical and practical framework for a just vision of society. It focuses on how support for individuals and social groups in Nigeria can foster the building of their communities through the practice of social justice. Social justice will ensure the building of trust across ethnic lines, challenge corruption, encourage accountability and servant leadership, protect minority tribes from larger ones, and promote grassroots self-help tribal, communal, religious, and non-governmental associations as agents of positive social change and development. These dynamics interact within a healthy federal structure that respects its constituent parts for the common good. This volume is recommended as a graduate text for courses in theology, religious education, and social philosophy, and for all interested in promoting the common good.

Social Policy and International Interventions in South East Europe Nov 23 2019 Social Policy and International Interventions in South East Europe proves a comprehensive, dense, and thought provoking read, particularly successful in framing both the historical and institutional contexts of the countries examined, as well as literary debates on the subject and is thus a precious resource. . . Irene Dioli, Journal of Southeastern Europe The questions broached by the volume are of interest to all who are concerned with development and politics. Experts will find the data and is presentation quite useful; others will benefit from the background information presented in each chapter. . . . Social Policy and International Interventions in South East Europe is an excellent addition to the academic literature and will serve all those who are trying to keep pace with fluid developments in the transitional states of south east Europe. Richard P. Farkas, Slavic Review This is a remarkably rich and thought-

provoking collection. Its substantial case studies make it a vital resource for studying social policy in South East Europe. Its focus on the flows of international actors, agencies, ideas and resources poses critical questions about how the emergence of social policy, the emergence of new forms of governance and the creation of new spaces of welfare are connected. The implications of this concern with emergent forms and directions reach far beyond the region itself. John Clarke, The Open University, UK

A brilliant book that shows conclusively that transnational actors have taken their place alongside states in setting social policy in Europe. Through careful and comprehensive case studies of a wide range of South East European countries, this volume systematically presents a wealth of new data on transnational actor interventions. It helps to shape an emerging debate on the relative power of transnational and domestic actors and makes a unique empirical contribution to the discussion. The authors have done an amazing job of coordinated digging and produced some impressive results. Mitchell Orenstein, Johns Hopkins University, US

This comprehensive and engaging book investigates the role of international actors in the making of social policy in South East Europe. Introductory chapters on transnationalism and Europeanization are followed by a series of nine linked case studies depicting research undertaken within this region. The book charts the variable influence that international actors such as formal organizations, non-governmental organizations, consulting companies and individual transnational policy entrepreneurs have on key policy issues, including pensions, social protection, labour markets and health. The authors conclude that welfare settlements are a complex product of historical and institutional legacies, the neo-liberal interventions of the World Bank, the emerging impact of the EU, and the crowded international arena resulting from war and post-war reconstruction agendas. Written by leading researchers in the field, *Social Policy and International Interventions in South East Europe* will be of great interest to researchers and students of social policy, policy studies and regional studies, as well as policymakers within international and governmental organizations.

**An Elementary Treatise on Astronomy in Two Parts Oct 15 2021**

The Muse at Play Jan 26 2020 Riddles and other word games are widespread in classical literature and played a crucial role in shaping Greek and Roman cultural discourses, yet few efforts have been made to treat them in all their variety and complexity. This volume, the fruit of a conference held in May 2011 by the Institute of Classical Studies of the University of Warsaw, gathers contributions on a range of topics linked by the theme of linguistic play. With its broad spectrum of approaches, the book serves as companion to a fascinating but somewhat neglected area of ancient culture - the domain of the Playful Muse.
