Classic Beetle Mar 26 2022 The specially commissioned photographs in this book display each Beetle variant model in their full glory. From the military vehicles of the 1930s through the post-WWII cars, up to and including the final German-built model of 1979, this book offers a loving tribute to the car in sumptuous detail. The beautifully restored and kept cars of each decade are displayed across several double page spreads. Parts of each model are shown in close-up, compared and explained using studio photographs of each model's steering wheels, indicators, engine bays and other aspects of design and function. The history of the Beetle is illustrated using contemporary archive photography, and attention is given to the cultural impact of the Beetle as shown through movies (such as the Herbie franchise), advertising and graphic design. This large format, fully illustrated book presents the Beetle as an object of art, albeit one that starts every time and will run forever on reused cooking oil, with a little modification. Word count: 24,000

VW Phaeton - Did Zeus' anger hit sales of Volkswagen's luxury car Sep 19 2021 Essay from the year 2003 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 74% (A) entspricht 1,0, University of Teesside (Tesside Business School), course: Managing Markets, language: English, abstract: After the introduction of the first Volkswagen luxury car in May 2002, sales are still far behind the Volkswagen's expectation (Handelsblatt, 2003). It seems that the VW Phaeton faces the same destiny as its antique namesake Phaeton. In the Greek mythology, Phaeton was the son of Helios, the sun god. Helios has driven the family chariot across the sky, wearing the rays of the sun as a crown, lighting the day. One day Phaeton convinced his father to lend him the beautiful chariot. But Phaeton, in contrast to his father, was not able to drive the chariot appropriately, and drove the chariot so close to the earth that he boiled the oceans and scorched the land. So Zeus had to stop him by killing him with a lightning bolt (Vaughn, 2003). Volkswagen certainly had not considered this explanation when naming the Phaeton, but referred more likely to the second meaning of Phaeton; an elegant carriage of the 17th century which the owners drove on their own. Nevertheless, there are signs that the Volkswagen engagement in the high-class (luxury) car market is tougher than expected. It seems people are less persuadable to buy a high-quality car of the experienced and renowned German car manufacturer. This shows the divergence of the formerly targeted 12.000 to 15.000 units (Weernink, 2001) annually in global sales 2003 which is opposed by the actual numbers of only 2.600 units in Germany - the main market of the Phaeton - from January to October (Kraftfahrtbundesamt KBA) and estimated sales of 3500 units worldwide (Handelsblatt, 2003). The targeted sales of 20.000 units in 2004 (Weernink, 2003) seem to be completely unrealistic. But the Volkswagen top-management

remained silent. Although Volkswagen always claims that the Phaeton's technology, specifications and passenger protection is absolutely comparable with the competing Mercedes S-Class, BMW 7 and Audi A8, customers seem to spot a big disadvantage of the VW Phaeton – the lack of perception and the missing customer benefit of expressing the driver's status.

VW Beetle Nov 02 2022 The VW Beetle is one of the best-loved of all classic cars, with many thousands preserved across the world, many in regular use. Over the years countless changes were introduced, together making a mid-'60s Beetle, for instance, very different from one built in the mid-'50s, or mid-'70s, despite the obvious similarities. With the aid of hundreds of color photographs, this new paperback edition of *VW Beetle: Specification Guide 1949-1967* documents all the Beetle's specification changes and model differences during the classic period 1949-67, making it possible to determine the original specification and fittings of any Beetle from this period.

Remember Those Great Volkswagen Ads? Oct 09 2020 The revolutionary Volkswagen advertising campaign of the 1960s and 70s is universally acknowledged to be the greatest and most influential ever created and was acclaimed as “the campaign of the century” in the Millennium editions of *Time Magazine* and the US ad industry bible *Advertising Age*. *Remember those great Volkswagen ads?* is the only comprehensive review of this definitive ad campaign. Volkswagen Beetles and Buses Jan 12 2021 This illustrated history celebrates the 75th and 70th anniversaries of Volkswagen's two most iconic vehicles, from the first Beetles spearheaded by Ferdinand Porsche in the 1940s to the buses that became synonymous with a generation. Volkswagen is one of the most beloved brands in motoring history, thanks largely to two instantly

recognizable vehicles: the Beetle (a.k.a. Bug) and the Bus. More than 23 million VW Beetles have buzzed into the world since 1945, while the VW Bus presaged the minivan by thirty-plus years. Volkswagen: Beetles and Buses examines and celebrates all aspects of the vehicles and the many cultural associations that have swirled around them for more than seven decades. The diminutive rear-engined and easily mass-produced Beetle became the most popular imported car in America during the 1960s. Its success was due to its familiar face, its wildly clever ad campaigns, and the sheer numbers produced. The equally compact yet spacious Bus (a.k.a. Kombi, Microbus, Type 2, Transporter, and simply “van”) has won millions of fans around the world with its practicality, simplicity, and design. In this beautifully illustrated and authoritatively written celebration, author Russell Hayes looks back at the vehicles while focusing on the classic air-cooled VWs that ran into the late 1970s. Along the way, readers witness the Beetle and Bus at work and at play and learn about vehicle development and growing roles in popular culture, including star appearances in films like *The Love Bug*, *Little Miss Sunshine*, *Footloose*, *Fight Club*, *The Big Lebowski*, and *Fast Times at Ridgemont High*, as well as television shows like *Lost* and *Once Upon a Time* and on the covers of the Beatles’ *Abbey Road* and Bob Dylan’s *Freewheelin’* album. The story is brought up to date with coverage of the New Beetle and plans for the VW Buzz, a modern electric version of the iconic Microbus due in 2022. *Volkswagen: Beetles and Buses* deserves a place in the motoring libraries of VW owners, automotive enthusiasts, and those simply interested in pop culture. It’s the ultimate illustrated history of these beloved vehicles.

[VW Kubelwagen/Schwimmwagen \(VW Type 82 Kubelwagen \(1940-45\) / VW Type 128/166 Schwimmwagen \(1941-44\) Aug 31 2022](#) Few war films made about the 1939-45 period are complete without sight of a boxy little Kübelwagen light utility vehicle being smartly driven by a German

officer. Designed by Ferdinand Porsche and built by Volkswagen, the 'Kübel' was to the Germans what the Jeep was to the Allies and was used widely by the Wehrmacht and the Waffen-SS. When production ceased at the end of the war, 50,435 Kübelwagen had been built. Of simple but sturdy construction, the VW Type 82 Kübelwagen (which translates as 'bucket car' because of its similarity to a metal bathtub on wheels) was based closely on the legendary VW Beetle. Its winning design features included air cooled engine (the absence of a radiator meant the engine was less vulnerable to bullet damage), a light-weight, flat and smooth under-body that allowed the car to slide over the surface when its wheels were sinking into sand, mud or snow, independent suspension, portal gear hub reduction and self-locking differential. Because the body was not a load-bearing part of the structure of the vehicle it could easily be modified to special purposes. Several dozen variants of the 'Kübel' were developed and built during the war including its cousin the Schwimmwagen. The VW Type 128 and 166 Schwimmwagen (which means floating or swimming car) were amphibious four-wheel drive off-roaders. Like the Kübel, they were used widely by the Wehrmacht and the Waffen-SS during the Second World War. The Type 166 Schwimm is the most numerous mass-produced amphibious car in history (14,265 between 1942 and 1944). Erwin Komenda, Ferdinand Porsche's first car body designer, developed an all-new unitized body-tub structure for the Schwimmwagen swimming car. When crossing water a screw propeller could be lowered from the rear deck engine cover and coupled to the engine's crankshaft to provide drive. The 'Schwimm' also shared many of the Kübel's mechanicals. The appeal of the Kübel lived on long after the war's end when a derivative version, the Volkswagen Type 181, was manufactured by VW from 1968 to 1983. This was a two-wheel drive, four-door, convertible, off-road military vehicle, which had been developed for the German Army but was also sold to the civilian market as the Kurierwagen in Germany, the Trekker

in the UK, the Thing in the US, and the Safari in Mexico. In recent years both the Kübel and Schwimm have acquired something of a cult status among military vehicle collectors worldwide, particularly in Europe (eg, Germany, Poland Czech Republic, Switzerland), the UK and US. There are literally dozens of Kübelwagen and Schwimmwagen enthusiast/owner/interest groups! About 150 original Type 166 Schwimmwagens remain today.

Branding, Positioning and Segmentation at Volkswagen Jul 06 2020 Seminar paper from the year 2005 in the subject Business economics - Marketing, Corporate Communication, CRM, Market

Research, Social Media, grade: A, University of Teesside (Teesside Business School), course: Strategic Marketing, 30 entries in the bibliography, language: English, abstract: This paper analysis the case study "VW Phaeton" by Röhm and Murphy (2005) about the launch of a luxury car by Volkswagen. Since the introduction of the VW Phaeton in May 2002, Volkswagen has been under pressure as the company did not reach their sales forecast, experiencing dramatic financial losses (Weernink, 2002). It comments on the strategy of VW in terms of branding and positioning. It also considers segmentation, niche and mass marketing as essential issues for VW. Various aspects of these issues are discussed as well as their relationship to customer loyalty, and how they contribute to a business success. Finally, it is summarised why the future of the VW Phaeton is considered to be a bleak. It could be shown that positioning is an outgrowth of segmentation, and therefore, presents an integral part of VW's strategy. The paper shows that VW introduced the VW Phaeton to move up-market, and to polish the VW brand. However, the company did underestimate their own brand, which is associated with a people's car. At the same time, Volkswagen missed to serve highly potential segments in the middle-class segment. In order to position the VW Phaeton in the upper-class, a comprehensive marketing campaign was launched, which could not add the missing emotional and prestige value to the VW brand. In the final section, it is argued why the future of the VW Phaeton is a bleak - mainly because of a strategic failure regarding the branding strategy.

Volkswagen (VW). Financial Performance and Financial Position Feb 10 2021 Seminar paper from the year 2021 in the subject Business economics - Market research, grade: 1,3, Buckinghamshire New University, language: English, abstract: In this assignment, the author finds herself in the role of a consultant, whose client intends to acquire VW. The objective of this paper is to provide an assessment of VW's financial performance and financial position to prepare a proposal to the client, that assists in deciding whether acquiring VW is financially beneficial. For a comprehensive insight into VW's financial performance and position, the approach was as follows. Hereafter, in chapter two, the theoretical background provides the reader with knowledge about VW and describes the meaning of DD in M&A processes. Chapter three, the financial statement analysis, is subdivided into FDD and CDD. In the FDD profitability ratios, asset and capital structure KPIs, and liquidity ratios are described and reviewed. The ratios are based in each case on the corresponding statement, the income statement, the balance sheet, and the CFS. The annual reports of VW from the years 2017-2019 serve as a reference for the financial KPIs. The CDD is based on Porter's Five Forces framework, which considers future trends, and in addition, includes a brief benchmarking to identify competition between global car manufacturers within this framework. To conclude chapter three, the results of FDD and CDD are summed up. In chapter four, a proposal to

the client is provided, which speaks for the fact that VW is worth buying in terms of the numbers considered.

Volkswagen Type 4 - 411 and 412 May 04 2020 What kind of car is that? It looks like a big Beetle! If ever there was a car in search of a context and market, it was the VW Type 4. Volkswagen's first foray into the upscale sector brought engineering innovation to Wolfsburg. It also tried to convince worldwide buyers that VW still had the right stuff. With design origins in the Porsche consultancy, the signs were hopeful. However, globally, the automarket was rapidly changing. The VW Type 4's portfolio ran to unitary construction and fuel injection, but had to face fancy competition from Detroit's European subsidiaries. All the while, VW was searching for its future road, and faced challenging developments. The fuel crisis and Japanese competition in North America kept the pressure on at Wolfsburg. Could the VW 411 and 412's solid traditional virtues carry the day? Then and now the Type 4's unbreakable VW quality, and flat out sustainability, appealed to air cooled devotees. The 411 and 412 brought a new dimension in comfort to VW, and its hardware design was utilized by the air cooled clan both on and off road. The Type 4 even had a sports car connection, and never lost the power to surprise.

VW Advertising Sep 27 2019 In this period Volkswagen's publicity and advertising material was among the very best issued by any motor manufacturer. Following the Beetle's launch brochures in the late 1930s, the 1950s saw extraordinarily strong artwork images from the brush of Bernd Reuters and other artists, depicting Saloon, Cabriolet and Transporter in such a way as to suggest more streamlined, spacious and powerful VWs than the reality. In the '60s the American advertising agency Doyle Dane Bernbach took over, combining stark photography with sharp, witty text and endowing the Beetle with a cult status that took production to over a million for the first time, but

VW's new Type 3 and Type 4 models were failing to impress the public, and only the arrival of the Golf saved the day. Author Richard Copping has a vast collection of VW material and in this book he provides a selection of some 400 of the most striking or interesting images used by the company to sell us its products, taking in every model and variant. The accompanying text guides us through the changing styles of the publicity material as well as through the range of vehicles and thus through the story of Volkswagen in the period.

The VW Camper Van Jul 30 2022 It was invented immediately after the war, in the factory a far-sighted English military man had set up to turn the German economy from making machines of warfare to more pacific products. By the seventies that dream had been amply fulfilled, as the VW Campervan became the conveyance of choice for West Coast hippies, Australian surf bums and Europeans taking the overland route to find enlightenment and good karma in India. It had also become - indeed, still is - the first choice for any couple, or family, seeking a cheap camping holiday with wheels attached. So never mind the oddly off-centre driving wheel, the vagaries of the aircooled rear engine - the VW Campervan had become more than a vehicle - it had truly become a way of life. Mike Harding's first ride in a Volkswagen Camper Van was back in 1961, when it was the carrying around the gear and bandmembers of his rock band the Manchester Rainmakers. Finally, in 2009, he could wait no longer, and bought his own, a 2001 Type 2 bay window Brazilian import Danbury conversion in hot orange and off white. Add in the endless curiosity of the author of eight monographs on church architecture, and the hilarious sense of humour of one of Britain's best stand-up comics, and you have a wonderful social history of the postwar years through the prism of a single transport icon.
