Advances in Questionnaire Design, Development, Evaluation and Testing Sep 29 2022 A new and updated definitive resource for survey questionnaire testing and evaluation Building on the success of the first Questionnaire Development, Evaluation, and Testing (QDET) conference in 2002, this book brings together leading papers from the Second International Conference on Questionnaire Design, Development, Evaluation, and Testing (QDET2) held in 2016. The volume assesses the current state of the art and science of QDET; examines the importance of methodological attention to the questionnaire in the present world of information collection; and ponders how the QDET field can anticipate new trends and directions as information needs and data collection methods continue to evolve. Featuring contributions from international experts in survey methodology, *Advances in Questionnaire Design, Development, Evaluation and Testing* includes latest insights on question characteristics, usability testing, web probing, and other pretesting approaches, as well as: Recent developments in the design and evaluation of digital and self-administered surveys Strategies for comparing and combining questionnaire evaluation methods Approaches for cross-cultural and cross-national questionnaire development New data sources and methodological innovations during the last 15 years Case studies and practical applications *Advances in Questionnaire Design, Development, Evaluation and Testing* serves as a forum to prepare researchers to meet the next generation of challenges, making it an excellent resource for researchers and practitioners in government, academia, and the private sector.

Parenting Matters Jun 22 2019 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Manual for Stenographers and Typists Feb 29 2020

Contesting Development Dec 09 2020 This pathbreaking book grapples with an established reality: well-intentioned international development programs often generate local conflict, some of which escalates to violence. To understand how such conflicts can be managed peacefully, the authors have undertaken a comprehensive mixed-methods analysis of one of the world's largest participatory

development projects, the highly successful Kecamatan Development Program (KDP), which was launched by the World Bank and the Indonesian government in the late 1990s and now operates in every district across Indonesia. --

Encyclopedia of Computer Science and Technology Jan 10 2021 "This comprehensive reference work provides immediate, fingertip access to state-of-the-art technology in nearly 700 self-contained articles written by over 900 international authorities. Each article in the Encyclopedia features current developments and trends in computers, software, vendors, and applications...extensive bibliographies of leading figures in the field, such as Samuel Alexander, John von Neumann, and Norbert Wiener...and in-depth analysis of future directions."

Design Recommendations for Intelligent Tutoring Systems: Volume 8 - Data Visualization Aug 29 2022 This book on data visualization is the eighth in a planned series of books that examine key topics (e.g., learner modeling, instructional strategies, authoring, domain modeling, assessment, team tutoring, self-improving systems, data visualization, and competency based scenario design) in intelligent tutoring system (ITS) design. This book focuses on data visualization and how it is applied in ITSs. The chapters within this book specifically examine topics in relationship to the Generalized Intelligent Framework for Tutoring (GIFT) (Sottolare, Brawner, Goldberg & Holden, 2012; Sottolare, Brawner, Sinatra, & Johnston, 2017). GIFT is an open-source, domain-independent, modular, service-oriented architecture for ITSs. The design of GIFT allows for reusability, reduction in authoring time, and reducing the skill level needed to create an ITS. GIFT provides functionality to create ITSs, distribute ITSs to learners through the Cloud, conduct research to evaluate ITSs, and to examine instructional outcomes. Data visualization is an important topic for ITSs, as there are many different users of the systems (including learners, instructors, researchers, subject matter experts). The data that is collected by the ITS can be organized and displayed in a number of different ways. The current book includes a general discussion of how data visualizations can be applied in ITSs, as well as detailed specific examples of existing implementations, and technical details related to incorporating data visualization in ITSs. We believe this book can be used as a design tool for data visualization interfaces in ITSs.

New National Framework Mathematics 8+ Teacher Planning Pack Feb 20 2022 Each lesson plan contains everything you will need to teach the course including Framework Objectives & Medium Term Planning references, resources needed, starter and plenary ideas and links to Homework activities. The pack also features mappings to the Framework for teaching mathematics and the Medium Term Plan, National Curriculum/Framework planning grids.

Advances in Comparative Survey Methods Aug 24 2019 Covers the latest methodologies and research on international comparative surveys with contributions from noted experts in the field *Advances in Comparative Survey Methodology* examines the most recent advances in methodology and operations as well as the technical developments in international survey research. With contributions from a panel of international experts, the text includes information on the use of Big Data in concert with survey data, collecting biomarkers, the human subject regulatory environment, innovations in data collection methodology and sampling techniques, use of paradata across the survey lifecycle, metadata standards for dissemination, and new analytical techniques. This important resource: Contains contributions from key experts in their respective fields of study from around the globe Highlights innovative approaches in resource poor settings, and innovative approaches to combining survey and other data Includes material that is organized within the total survey error framework Presents extensive and up-to-date references throughout the book Written for students and academic survey researchers and market researchers engaged in comparative projects, this text represents a unique collaboration that features the latest methodologies and research on global comparative surveys.

Foreign Relations of the United States, 1948: The Far East: China Dec 21 2021

Computing Research & Innovation (CRINN) Vol 2, October 2017 Jul 04 2020 CRINN (Computing Research and Innovation), Volume 2, October 2017, is a compilation of peer-reviewed research papers, technical and concept papers and innovations among the academicians from Faculty of Computer and Mathematical Sciences, Universiti Teknologi MARA, Perlis Branch and other universities from all over Malaysia. CRINN also serves as a sharing center for every faculty members and others to share their research findings, experiences and innovations. This volume comprises a selection of 38 scholarly articles from Mathematical Sciences, Computer Sciences, Computer Network, Information Technology and System Sciences fields

The Yoga of Jesus: Understanding the Hidden Teachings of the Gospels Jun 14 2021 In his remarkable book, Paramahansa Yogananda reveals the hidden yoga of the Gospels and confirms that Jesus, like the ancient sages and masters of the East, not only knew yoga but taught this universal science of God-realization to his closest disciples. Compiled from the author's highly praised two-volume work, *The Second Coming of Christ: The Resurrection of the Christ Within You*, this insightful and compact book transcends the centuries of dogma and misunderstanding that have obscured the original teachings of Jesus, showing that he taught a unifying path by which seekers of all faiths can enter the kingdom of God. Topics include: • The lost years of Jesus in India • The ancient science of meditation: how to become a Christ • The true meaning of baptism • How the principles and methods of yoga parallel the teachings of the greatest Christian saints and mystics

Tied Aid and Development Aid Procurement in the Framework of EU and WTO Law Oct 19 2021 This book is the first legal treatment of tied aid and examines in detail the compatibility of tied aid with EU and WTO law. The workings of the aid projects and aid procurement systems of donor countries granting bilateral aid are fully examined through case studies from the UK, Italy, the EU and the US. Tied aid refers to aid granted to developing countries on condition that goods and services for the aid-financed projects are purchased from the donor country only. The recipient country, in order to receive the grant or the loan, has no other choice but to fulfil the condition imposed by the donor. Economists have shown that tying aid undermines the effectiveness of aid. It leads to higher costs paid for the goods and services purchased and the distortion of the nature of the aid. Further, tying frustrates the potential of aid to foster trade between developing countries - in many of these countries public bodies and, in particular, aid-financed projects are major potential outlets for trade between neighbouring states. The importance of tied aid has been pointed out in economic literature but there is surprisingly little written on the legal aspects of tied aid practices and this book seeks to fill this major gap in the literature. The book is of interest to academics in the field of EU and WTO law, NGOs and practitioners working both in the field of public procurement and development policies.

The Book of Common Prayer ... Apr 12 2021

Classroom Assessment in Action Jun 26 2022 *Classroom Assessment in Action* clarifies the multi-faceted roles of measurement and assessment and their applications in a classroom setting.

Comprehensive in scope, Shermis and Di Vesta explain basic measurement concepts and show students how to interpret the results of standardized tests. From these basic concepts, the authors then provide clear and ordered discussions of how assessment and instruction is integrated into a functional process to enhance student learning. Guidelines are set forth for constructing various common assessments. Procedures are laid out to evaluate and improve assessments once they are constructed. And, ultimately, the authors shed light on the myriad of factors that impact test score

interpretation.

Understanding State Aid Policy in the European Community May 26 2022 Why do the Member States of the European Union still grant aid and is that aid compatible with the objective of integration which should result in a better allocation of resources? The main purpose of this book is to explain the principles and methods of EC state aid policy in a manner which is both accessible and useful to practitioners and policy makers, by bringing together contributions from officials (both Community and national), industry representatives, and academics. In particular, it examines both theory on the role and objective of public assistance and current practice controlling such assistance. It addresses the issue of state aid from economic, legal and administrative perspectives and offers detailed information on current practice through case studies. It also considers likely future developments in the Community framework of state aid control. Finally, this book identifies major weaknesses in the present system of state aid rules, and paves the way for a proper economic analysis of the effects of forty years of state aid policy in the European Community.

Intelligent Systems and Applications Sep 17 2021 This book is a remarkable collection of chapters covering a wider range of topics, including unsupervised text mining, anomaly and Intrusion Detection, Self-reconfiguring Robotics, application of Fuzzy Logic to development aid, Design and Optimization, Context-Aware Reasoning, DNA Sequence Assembly and Multilayer Perceptron Networks. The twenty-one chapters present extended results from the SAI Intelligent Systems Conference (IntelliSys) 2015 and have been selected based on high recommendations during IntelliSys 2015 review process. This book presents innovative research and development carried out presently in fields of knowledge representation and reasoning, machine learning, and particularly in intelligent systems in a more broad sense. It provides state - of - the - art intelligent methods and techniques for solving real world problems along with a vision of the future research.

Moral Vision in International Politics Jan 28 2020 Can moral vision influence the dynamics of the world system? This inquiry into the evolving foreign aid policies of eighteen developed democracies challenges conventional international relations theory and offers a broad framework of testable hypotheses about the ways ethical commitments can help structure global politics. For forty years development assistance has been the largest and steadiest net financial flow to the Third World, far exceeding investment by multinational corporations. Yet fifty years ago aid was unheard of. Investigating this sudden and widespread innovation in the postwar political economy, David Lumsdaine marshals a wealth of historical and statistical evidence to show that aid was based less on donor economic and political interests than on humanitarian convictions and the belief that peace and prosperity could be sustained only within a just international order. Lumsdaine finds the developed countries adhered to rules that, increasingly, favored the neediest aid recipients and reduced their own leverage. Furthermore, the donors most concerned about domestic poverty also gave more foreign aid: the U.S. aid effort was weaker than that of other donors. Many lines of evidence--how aid changed over time, which donors contributed heavily, where the money was spent, who supported aid efforts--converge to show how humanitarian concerns shaped aid. Seeking to bridge the gap between normative theory and empirical analysis, Lumsdaine's broad comparative study suggests that renewed moral vision is a prerequisite to devising workable institutions for a post-cold war world.

Development Aid—Populism and the End of the Neoliberal Agenda Apr 24 2022 This volume examines the impact of the Trump presidency on development aid. It starts out by describing the rise of national populism, the political landscape and the reasons for rejection of the political establishment, both under Trump and internationally. Next, it gives a historical-political overview of development aid in the post WW-II era and discusses the dominant Washington Consensus doctrine and its failure. It then provides a critique of the Official Development Assistance (ODA) discourse and reviews the political economy of ODA, the discourse, and the conditionalities that are barriers to socio-economic development. The final chapters explore the question of Trumponomics as an alternative to the global neoliberal ODA, and the potential impact of Trumponomics' on ODA. The book concludes with thoughts on the potential future directions for ODA within the 'ideals' of Trumponomics and national populism.

Code of Federal Regulations Nov 07 2020 Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

Color Atlas of Neurology Mar 12 2021 Highly Commended at the 2004 British Medical Awards Medical Book Competition! Neurology - made visible Every practitioner in modern medicine is confronted daily with neurologic symptoms, diagnoses, and clinical problems. Yet there is scarcely any other medical specialty that is so fraught with complexities and abstractions. This pocket atlas is designed to provide a better, easier-to-understand visual guide on what the reader needs to know about neurology. In a unique way, neurology is made visible in the truest sense of the word. Coverage includes: The basic principles of neuroanatomy and neurophysiology (structure of the CNS, peripheral nerves, stimulus transmission, nerve conduction velocity, etc.) Diagnostic methods and procedures (clinical examinations, electrophysiologic techniques, imaging studies, etc.). Neurologic disorders including their clinical manifestations, pathogenesis, and principles of treatment. These topics and more are covered in elaborately drawn, meticulously labeled illustrations. The effective concept of placing the illustrations opposite the descriptive text for a particular subject has created word-and-picture units that combine maximum teaching impact with an optimum density of information. Neurologic relationships can be grasped literally at a glance. This pocket atlas is intended for medical students, physicians, and other medical professionals (nurses, physical therapists, occupational therapists, speech therapists) who could profit from a visual guide to neurology.

Rethinking Canadian Aid May 14 2021 In 2013, the government abolished the Canadian International Development Agency (CIDA), which had been Canada's flagship foreign aid agency for decades, and transferred its functions to the newly renamed Department of Foreign Affairs, Trade and Development (DFATD). As the government is rethinking Canadian aid and its relationship with other foreign policy and commercial objectives, the time is ripe to rethink Canadian aid more broadly. Edited by Stephen Brown, Molly den Heyer and David R. Black, this is the first book on Canadian foreign aid since CIDA was folded into DFATD. Designed to reach a variety of audiences, contributions by twenty-one scholars and experts in the field offer an incisive examination of Canada's record and recent changes in Canadian foreign aid, such as its focus on maternal and child health and on the extractive sector. Many chapters also ask more fundamental questions concerning the intersection of the moral imperative that underpins aid and the trend towards greater self-interest. For instance, what are and what should be the underlying motives of Canadian aid? How compatible are altruism and self-interest in foreign aid? To what extent should aid be integrated with Canada's other policies and practices? The portrait that emerges is a sobering one. This book is essential reading for anyone interested in Canada's changing role in the world and how it reflects on Canada.

Federal Register Mar 31 2020

Fragility, Aid, and State-building Dec 29 2019 Fragile states pose major development and security challenges. Considerable international resources are therefore devoted to state-building and institutional strengthening in fragile states, with generally mixed results. This volume explores how unpacking the concept of fragility and studying its dimensions and forms can help to build policy-

relevant understandings of how states become more resilient and the role of aid therein. It highlights the particular challenges for donors in dealing with 'chronically' (as opposed to 'temporarily') fragile states and those with weak legitimacy, as well as how unpacking fragility can provide traction on how to take 'local context' into account. Three chapters present new analysis from innovative initiatives to study fragility and fragile state transitions in cross-national perspective. Four chapters offer new focused analysis of selected countries, drawing on comparative methods and spotlighting the role of aid versus historical, institutional and other factors. It has become a truism that one-size-fits-all policies do not work in development, whether in fragile or non-fragile states. This is should not be confused with a broader rejection of 'off-the-rack' policy models that can then be further adjusted in particular situations. Systematic thinking about varieties of fragility helps us to develop this range, drawing lessons – appropriately – from past experience. This book was originally published as a special issue of Third World Quarterly, and is available online as an Open Access monograph at <https://www.taylorfrancis.com/books/e/9781351630337>.

Governing the Empire Jul 28 2022 This book examines through the edition, translation, and study of Almohad provincial appointments the administrative, political, ideological, and religious organisation of the largest European-African Empire, renewing the study of power and authority in the medieval Islamic world.

Assessing Quality of Life in Clinical Trials Jun 02 2020 Researchers in all clinical fields are fully aware of the importance of Quality of Life measurements in judging the efficacy of a given treatment. Psychological criteria play an important role in this evaluation. Assessment of Quality of Life in Clinical Trials: methods and practice explores the current state of the art and illustrates the benefits and potential of health related quality of life assessment in clinical trials. It covers a wide range of analytical issues, emphasizing new and innovative approaches that are of practical and clinical importance.

Departments of State, Justice, and Commerce, the Judiciary, and Related Agencies Appropriations for 1965 Oct 26 2019

The UAE and Foreign Policy Jul 16 2021 This book offers a concise and detailed analysis of the United Arab Emirates (UAE) foreign aid as a main instrument in its foreign policy. Exploring the cultural factors that have impacted on the foreign policy behaviour of the UAE and its foreign aid, the author argues that Arabism and Islamic traditions have shaped the country's foreign policy in general and foreign aid in particular. Examining in depth the motives and purposes of this large aid program through the lens of International Relations theories (mainly Constructivism and Rationalism), the book details the UAE's foreign policy and aid program since its inception. Drawing on a comprehensive analysis of two major recipients of aid from the UAE – Palestine and Pakistan – the focus moves beyond the UAE to show how cultural factors have impacted on the behaviour of the authorities across the wider Arab Middle East. This critical assessment and analysis of the UAE's foreign policy will be of particular interest to students, researchers and academics interested in Middle East studies, the Gulf States, Middle East politics, and foreign aid and foreign policy.

Envisioning the Survey Interview of the Future Jul 24 2019 Praise for Envisioning the Survey Interview of the Future "This book is an excellent introduction to some brave new technologies . . . and their possible impacts on the way surveys might be conducted. Anyone interested in the future of survey methodology should read this book." -Norman M. Bradburn, PhD, National Opinion Research Center, University of Chicago "Envisioning the Survey Interview of the Future gathers some of the brightest minds in alternative methods of gathering self-report data, with an eye toward the future self-report sample survey. Conrad and Schober, by assembling a group of talented survey researchers and creative inventors of new software-based tools to gather information from human subjects, have created a volume of importance to all interested in imagining future ways of interviewing." -Robert M. Groves, PhD, Survey Research Center, University of Michigan This collaboration provides extensive insight into the impact of communication technology on survey research As previously unimaginable communication technologies rapidly become commonplace, survey researchers are presented with both opportunities and obstacles when collecting and interpreting data based on human response. Envisioning the Survey Interview of the Future explores the increasing influence of emerging technologies on the data collection process and, in particular, self-report data collection in interviews, providing the key principles for using these new modes of communication. With contributions written by leading researchers in the fields of survey methodology and communication technology, this compilation integrates the use of modern technological developments with established social science theory. The book familiarizes readers with these new modes of communication by discussing the challenges to accuracy, legitimacy, and confidentiality that researchers must anticipate while collecting data, and it also provides tools for adopting new technologies in order to obtain high-quality results with minimal error or bias. Envisioning the Survey Interview of the Future addresses questions that researchers in survey methodology and communication technology must consider, such as: How and when should new communication technology be adopted in the interview process? What are the principles that extend beyond particular technologies? Why do respondents answer questions from a computer differently than questions from a human interviewer? How can systems adapt to respondents' thinking and feeling? What new ethical concerns about privacy and confidentiality are raised from using new communication technologies? With its multidisciplinary approach, extensive discussion of existing and future technologies, and practical guidelines for adopting new technology, Envisioning the Survey Interview of the Future is an essential resource for survey methodologists, questionnaire designers, and communication technologists in any field that conducts survey research. It also serves as an excellent supplement for courses in research methods at the upper-undergraduate or graduate level.

The Electrician Oct 07 2020

Information and Communication Technologies for Development May 02 2020 This book constitutes the refereed proceedings of the 14th IFIP WG 9.4 International Conference on Social Implications of Computers in Developing Countries, ICT4D 2017, held in Yogyakarta, Indonesia, in May 2017. The 60 revised full papers and 8 short papers presented together with 3 keynotes were carefully reviewed and selected from 118 submissions. The papers are organized in the following topical sections: large scale and complex information systems for development; women empowerment and gender justice; social mechanisms of ICT-enabled development; the data revolution and sustainable development goals; critical perspectives on ICT and open innovation for development; the contribution of practice theories to ICT for development; agile development; indigenous local community grounded ICT developments; global sourcing and development; sustainability in ICT4D; and information systems development and implementation in Southeast Asia. Also included are a graduate student track, current issues and notes. The chapter 'An Analysis of Accountability Concepts for Open Development' is open access under a CC BY 4.0 license via link.springer.com.

A Greek and English Dictionary, comprising all the words in the writings of the most popular Greek authors ... and in the Septuagint and New Testament Mar 24 2022

Chronic Lymphocytic Leukemia, An Issue of Hematology/Oncology Clinics of North America, E-Book Sep 25 2019 This issue of Hematology/Oncology Clinics, guest edited by Dr. Jennifer R. Brown?, will focus on Chronic Lymphocytic Leukemia. This issue is one of six selected each year by our series consulting editors, Dr. George P. Canellos and Dr. Edward J. Benz. Topics discussed in

this issue will include: Chronic Lymphocytic Leukemia: Do We Know the Cell of Origin Yet?; Significance of BCR Stereotypy; Prognostic and Predictive Implications of Cytogenetics and Genomics; Role of Epigenetics in Chronic Lymphocytic Leukemia; Genomics of Resistance to Targeted Therapies; First Line Therapy for Chronic Lymphocytic Leukemia; The Ongoing Unmet Needs in Chronic Lymphocytic Leukemia Therapy; BTK Inhibitors; Minimal Residual Disease; Should Undetectable MRD Be the Goal of Chronic Lymphocytic Leukemia Therapy?; Management of Chronic Lymphocytic Leukemia after Progression on BTK Inhibitors; Role of PI3K Inhibitors in Chronic Lymphocytic Leukemia; Can We Restore the Immunodeficiency of Chronic Lymphocytic Leukemia?; and Immune Therapy for Chronic Lymphocytic Leukemia

Greening Aid? Feb 08 2021 For more than three decades, the impact of aid on the global environment has been the subject of vigorous protest and debate. With billions spent on environmental aid each year, this groundbreaking text seeks to understand why aid is given, how effective it is, and whether aid is actually going to the places with the greatest environmental need.

Palestine and Rule of Power Aug 05 2020 This book explores how the rule of power relates to the case of occupied Palestine, examining features of local dissent and international governance. The project considers expressions of the rule of power in two particular ways: settler colonialism and neoliberalism. As power is always accompanied by resistance, the authors engage with and explores forms of everyday resistance to the logics and regimes of neoliberal governance and settler colonialism. They investigate wide-ranging issues and dynamics related to international governance, liberal peacebuilding, statebuilding, and development, the claim to politics, and the notion and practice of resistance. This work will be of interest for academics focusing on modern Middle Eastern politics, international relations, as well as for courses on contemporary conflicts, peacebuilding, and development.
