Ubuntu Aug 19 2021 As you travel Africa, you will find the way of ubuntu – the universal bond that connects all of humanity as one. At the age of twenty-eight, while sitting in a friend’s backyard in the remote mining township of Jabiru, Heather Ellis has a light-bulb moment: she is going to ride a motorcycle across Africa. The idea just feels right – no matter that she’s never done any long-distance motorcycle travelling before, and has never even set foot on the African continent. Twelve months later, Heather unloads her Yamaha TT600 at the docks in Durban, South Africa, and her adventure begins. Her travels take her to the dizzying heights of Mt Kilimanjaro and the Rwenzori Mountains, to the deserts of northern Kenya where she is befriended by armed bandits and rescued by Turkana fishermen, to a stand-off with four Ugandan men intent on harm, and to a voyage on a ‘floating village’ on the mighty Zaire River. Everywhere she goes Heather is aided by locals and travellers alike, who take her into their homes and hearts, helping her to truly understand the spirit of ubuntu – a Bantu word meaning ‘I am because you are’. Ubuntu is the extraordinary story of a young woman who, alone and against all odds, rode a motorcycle to some of the world’s most remote, beautiful and dangerous places.

Motorcycle Engineering Apr 02 2020 328 pages, 186 black & white illustrations, size 5.5 x 8.5 inches. This is a faithful reproduction of the 1962 Floyd Clymer U.S.A. Edition of the same title. While the primary focus of this publication utilizes 1960’s and prior motorcycles as examples, the reader is reminded that engineering theory and the laws of physics do not change and as such, the

information it contains is still relevant today. Consequently, this publication is indispensable to those either contemplating modification to a current model or the construction of a 'special' for any form of motorcycle competition. Predominantly a technical work, it is written in terms easily understood by the layman. While it includes geometry and math formulae the reader will be aptly rewarded if they take a moment to comprehend the significance of the examples. Consequently, 'Motorcycle Engineering' is considered by many knowledgeable motorcycle enthusiasts to be the best book ever written on how to construct, improve, modify and fine tune a motorcycle from the 'ground up'. It is our pleasure to offer this reprint to all motorcycle enthusiasts worldwide.

The Upper Half of the Motorcycle Jun 16 2021 Bernt Spiegel's *The Upper Half of the Motorcycle* was a best-selling motorcycling book in its original German with multiple editions and printings to its credit. Now translated into English, its provocative message is available to a wider audience. Spiegel's metaphor considers the rider and the motorcycle as a single unit, the rider being the upper half. Taking a multidisciplinary approach, the author draws on anthropology, psychology, biology, physics, and other disciplines to analyze the theory and function of the man-machine unit. Motorcycle riding is seen as a junction where people have created machines for personal transport and then become so adept at using them that the machine becomes like an extension of the rider themselves. The ultimate goal for riders is the integration of the man-machine interface and subsequent skill development to the point of virtuosity. Spiegel considers the various aspects of motorcycle riding that must be understood, practiced, and mastered before virtuosity can be attained. Many anecdotes, supplementary material, and in-depth treatment of specialized topics is contained in sidebars and footnotes. Numerous diagrams and photographs illustrate the book's principles allowing the reader to consider and develop their riding skill set.

The Castrol Six Hour Production Race Jul 06 2020 For eighteen years, the Castrol Six Hour Race was the biggest single event on the Australian motorcycling calendar. The race was for motorcycles in absolutely standard production trim,

with no modifications whatsoever allowed - a genuine 'Showroom Shootout'. What made it so significant was that the inception of the event coincided with the biggest sales boom in motorcycle history, and that television discovered the event and turned it into a major sporting attraction in its own right. Throughout the race's history, Channel Seven and later ABC Television broadcast the event live to a national audience. The Castrol Six Hour Race was always run before a huge crowd, at Amaroo Park 1970-1983 and at Oran Park 1984-87. Commercial interest, from sponsors within and outside the motorcycle trade, was unprecedented. Many of the high-performance tyres fitted to motorcycles even today were originally developed in the Castrol Six Hour Race. Some of the stars of the Castrol Six Hour Race went on to much greater things - notably Wayne Gardner, winner in 1980 and 1982 and later the 500cc World Champion, Mick Doohan, five times 500cc World Champion, and Grand Prix stars like Kevin Magee. The Castrol Six Hour Race is Jim Scaysbrook's eighth book on motorcycling. The 240-page full colour book contains a complete description of each year's event, with full entry list and results, and is profusely illustrated. There is also an introductory chapter charting the history of standard production motorcycle racing in Australia since the 1950s, which included two 24-hour events. A Hall of Fame section gives pen portraits of the Six Hour winners over the years.

This translation provides a continuous narrative from 1277 until the assassination of al-Malik al-Ashraf in 1293, with selections from Ibn al-Furat's later entries concerning the Crusades until 1365.
