Be A Triangle Jun 14 2021 'We need to create a home to return to. And when I say home, I'm not talking about a physical place or somewhere where pants are optional. I'm talking about a set of beliefs after a day full of, well, anything. We need to dig a foundation so deep that it will exist and thrive even if our surface-level efforts fail.' Ever wondered what the point of all those school maths lessons about triangles was? Youtuber and comedian Lilly Singh has finally discovered the answer: triangles are the perfect model for building your self-esteem and getting to know your own values. Triangles have a strong base, they're hard to knock-over and always retain their own shape, even when they grow. With her incomparable sense of humour and fun, Lilly explains how she has put the ethos of the triangle to work in her own life, and shows how you can do the same. Complete with playful illustrations and inspiring ideas, this book is like a best friend cheering you on as you find your purpose and get to know yourself.

Become a Problem-Solving Crime Analyst Jul 16 2021 Crime analysis has become an increasingly important part of policing and crime prevention, and thousands of specialist crime analysts are now employed by police forces worldwide. This is the first book to set out the principles and practice of crime analysis, and is designed to be used both by crime analysts themselves, by those responsible for the training of crime analysts and teaching its principles, and those teaching this subject as part of broader policing and criminal justice courses. The particular focus of this book is on the adoption of a problem solving approach, showing how crime analysis can be used and developed to support a problem oriented policing approach – based on the idea that the police should concentrate on identifying patterns of crime and anticipating crimes rather than just reacting to crimes once they have been committed. In his foreword to this book, Nick Ross, presenter of BBC Crime Watch, argues passionately that crime analysts are 'the new face of policing', and have a crucial part to play in the increasingly sophisticated police response to crime and its approach to crime prevention – 'You are the brains, the expert, the specialist, the boffin.'

Math with Bad Drawings Sep 05 2020 A hilarious reeducation in mathematics-full of joy, jokes, and stick figures-that sheds light on the countless practical and wonderful ways that math structures and shapes our world. In Math With Bad Drawings, Ben Orlin reveals to us what math actually is; its myriad uses, its strange symbols, and the wild leaps of logic and faith that define the usually impenetrable work of the mathematician. Truth and knowledge come in multiple forms: colorful drawings, encouraging jokes, and the stories and insights of an empathetic teacher who believes that math should belong to everyone. Orlin shows us how to think like a mathematician by teaching us a brand-new game of tic-tac-toe, how to understand an economic crises by rolling a pair of dice, and the mathematical headache that ensues when attempting to build a spherical Death Star. Every discussion in the book is illustrated with Orlin's trademark "bad drawings," which convey his message and insights with perfect pitch and clarity. With 24 chapters covering topics from the electoral college to human genetics to the reasons not to trust statistics, Math with Bad Drawings is a life-changing book for the math-estranged and math-enamored alike.
