Replacing Darwin Feb 25 2022 If Darwin were to examine the evidence today using modern science, would his conclusions be the same? Charles Darwin's *On the Origin of Species*, published over 150 years ago, is considered one of history's

most influential books and continues to serve as the foundation of thought for evolutionary biology. Since Darwin's time, however, new fields of science have emerged that simply give us better answers to the question of origins. With a Ph.D. in cell and developmental biology from Harvard University, Dr. Nathaniel Jeanson is uniquely qualified to investigate what genetics reveal about origins. The Origins Puzzle Comes Together If the science surrounding origins were a puzzle, Darwin would have had fewer than 15% of the pieces to work with when he developed his theory of evolution. We now have a much greater percentage of the pieces because of modern scientific research. As Dr. Jeanson puts the new pieces together, a whole new picture emerges, giving us a testable, predictive model to explain the origin of species. A New Scientific Revolution Begins Darwin's theory of evolution may be one of science's "sacred cows," but genetics research is proving it wrong. Changing an entrenched narrative, even if it's wrong, is no easy task. Replacing Darwin asks you to consider the possibility that, based on genetics research, our origins are more easily understood in the context of . . . In the beginning . . . God, with the timeline found in the biblical narrative of Genesis. There is a better answer to the origins debate than what we have been led to believe. Let the revolution begin!

Outstanding Lessons Made Simple Nov 12 2020 Dr Richard Beard started off as a Science Teacher at Codsall Community High School, Staffordshire, UK and progressed to being an Advanced Skills Teacher (AST), Gifted & Talented and Science, Technology, Engineering and Mathematics (STEM) Co-ordinator. This supportive role continued for four years and across all subjects within a mixture of age ranges as part of the Codsall High School Federation of Schools. Throughout this period, Richard worked within an outstanding and innovative leadership team to help raise the quality of teaching rapidly from Satisfactory (2007) to Outstanding (2010). In three short years, the team had worked to complete a meteoric rise in the quality of Teaching & Learning. Richard's work during this time and in the present day is heavily influenced by Assessment for learning (AfL). He realised that training related to planning and the use of AfL lacked the simple approach. Confusion often reigned over what is good practice especially in teachers just joining the profession. From this, Outstanding-lessons-made-simple.co.uk was created in the aim of promoting the simple approach: The Outstanding Lesson Framework. The framework was designed to help teachers discover a simple and effective way to teach. The aim being that all teachers can deliver good and outstanding lessons all the time not just in observations with the simple backbone to good teaching: AfL. At the present time, the framework provides the basis for the improvement of the quality of Teaching & Learning across all of the schools Richard has worked at. He continues to use it as an Assistant Headteacher in charge of Teaching & Learning at The Marches School in Oswestry, Shropshire (Outstanding, Ofsted, 2010) whilst he regularly delivers training on the framework and its use to improve the quality of Teaching & Learning across different schools.
