The Documentary Impulse Mar 19 2022 Award-winning photographer Stuart Franklin's exploration of how we, as humans, are driven to visually document our experiences and the world around us. Stuart Franklin took one of the most powerful photographs of the twentieth century - the 'tank man' in Tiananmen Square, Beijing, 1989. From his insightful position as a photographer, Franklin explores why we are driven to visually document our experiences and the world around us. He focuses on photography but traces this universal need through art, literature and science. Looking at photojournalism, war photography and work recording our culture, Franklin identifies some of its driving impulses: curiosity, outrage, reform and ritual; the search for evidence, for beauty, for therapy; and the immortalization of memory. As our understanding of 'documentary' continues to expand, Franklin considers photographic staging - where, perhaps, the future of the genre may lie: in search of truth over fact. "This book traces

what I shall call the documentary impulse. Here I mean the passion to record, with fidelity, the moments we experience and wish to preserve, the things we witness and might want to reform; or simply the people, places or things we find remarkable... Photography (and journalism) practised respectfully has the power to educate us all towards a greater understanding and empathy towards others." —Stuart Franklin

Videojournalism Jun 17 2019 Videojournalism is a new field that has grown out of traditional print photojournalism, slideshows that combine sound and pictures, public radio, documentary filmmaking and the best of television news features. This amalgam of traditions has emerged to serve the Internet's voracious appetite for video stories. Videojournalism is written for the new generation of "backpack" journalists. The solo videojournalist must find a riveting story; gain access to charismatic characters who can tell their own tales; shoot candid clips; expertly interview the players; record clear, clean sound; write a script with pizzazz; and, finally, edit the material into a piece worthy of five minutes of a viewer's attention.

Videojournalism addresses all of these challenges, and more - never losing sight of the main point: telling a great story. This book, based on extensive interviews with professionals in the field, is for anyone learning how to master the art and craft of telling real short-form stories with words, sound and pictures for the Web or television. The opening chapters cover the foundations of multimedia storytelling, and the book progresses to the

techniques required to shoot professional video, and record high quality sound and market the resulting product. Videojournalism also has its own website - go to just one URL and find all the stories mentioned in the book. You also will find various "how-to videos on the site. To keep up with the latest changes in the field such as new cameras, new books, new stories or editing software, check the site regularly and "like" www.facebook.com/KobreGuide.
