(Reading Effectively Across the Disciplines), a disciplinary literacy program at New York City College of Technology, it presents a broad collection of methodologies, strategies, and best practices with discipline-specific considerations. It offers an overview of the program informed by evidence-based research and practices in college disciplinary learning, describing how its unique model addresses the literacy needs of students in STEM and professional studies. Chapter authors, including administrators, literacy specialists, and content experts discuss program design, professional development, and assessments. They also outline strategies to foster disciplinary literacy pedagogy and college success in five content areas, including Accounting, Architecture, Biology, Electromechanical Engineering, and Mathematics.

Revising as Accounting Oct 30 2019 This book is written for teachers and students of AS Accounting. It is written in line with the latest Cambridge AS Accounting syllabus. The book will take the work out of setting homework as there are numerous, relevant exercises contained in each chapter. Students will find this book an easy to use tool at the time of revising for examinations.

On the Crutches Jun 18 2021 I am the witness of my disability and I know how to be disabled. I know how to be stigmatized by the people whom you never did something wrong to them. I know how to live in discrimination because of the disability I never intended to have, but all those things are nothing because the only dangerous weapon that kills the expectations of any disabled person is the WORD that many people use; thinking that they are showing their kindness. Yet they do not know that they are killing the strength of mind of the

the word SHAME as if all is well to the disabled person. In actuality it is not good to be disabled. It is not magnificent to depend on somebody's kindness and willingness to quench your desire.

Ebook: Auditing & Assurance Services May 18 2021 Auditors are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. The recent financial crisis has made this skill even more crucial to the business community. As a result of this recent crisis and of the financial statement accounting scandals that occurred at the turn of the century, understanding the auditor's responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. The author team of Louwers, Ramsay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition.

highlights the key drivers of change - whether in the field of practice on the one hand (e.g. increased regulation, globalisation, risk, and complexity), or from developments in the academy on the other (e.g. pressures to embed technology within the classroom, or to meet accreditation criteria) on the other. Thirty chapters, written by leading scholars from around the world, are grouped into seven themed sections which focus on different facets of their respective themes - including student, curriculum, pedagogic, and assessment considerations.

methods, and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and their applications. The networks and information systems of today are evolving rapidly. There are new trends and applications in information networking such as wireless sensor networks, ad hoc networks, peer-to-peer systems, vehicular networks, opportunistic networks, grid and cloud computing, pervasive and ubiquitous computing, multimedia systems, security, multi-agent systems, high-speed networks, and web-based systems. These kinds of networks need to manage the increasing number of users, provide support for different services, guarantee the QoS, and optimize the network resources. For these networks, there are many research issues and challenges that should be considered and find solutions.
