Drug Therapy for the Elderly Sep 03 2022 With people aged 65 years and older currently making up the fastest growing age group throughout the world, the demographic revolution of an aging society will inevitably lead to increased pressure to develop a rationalistic and age-tailored process of diagnosis and treatment among the elderly. As aging people often suffer from several chronic diseases and are being treated with multiple medications concurrently, unwanted drug interactions occur more frequently. Whereas recent approaches have recommended to remove particular drugs from the medication regimen to avoid adverse effects, ***Drug Therapy for the Elderly*** underlines both indispensable and dispensable elements of drug treatment in order to provide an overall assessment of drugs suitable for the aged. In view of the multimorbidity and polypharmacy situations experienced by elderly patients, this book takes into account the special needs and requirements shown by this group, thus serving as a timely reference for physicians who treat the elderly.

Residential Care Services for the Elderly Jun 19 2021 As the elderly population continues to increase, the need for suitable housing will continue to rise as well. This handbook is designed to help individuals and families determine the feasibility of starting a small home business providing residential home services for one or more elderly persons. Persons interested in starting a business of this type will find this unique book a goldmine of important information. ***Residential Care Services for the Elderly*** is a valuable decision-making tool which helps readers determine if this type of business venture is appropriate and, if so, how to start and maintain a residential care service for the elderly. Thorough coverage of background and implementation details provides potential operators with a rationale and necessary information. Numerous self-assessment and resource inventories in this practical handbook will guide readers in determining their areas of interests and competencies. Opportunities for networking among state licensing/standards agencies, funding agencies, and a listing of elder care organizations and advocacy groups adds value to this time-saving resource, ensuring a quicker and more likely success. Case studies, detailed guides, and the discussion of positive and negative aspects of being the owner of a small residential care business, based on interviews with people currently running elder care residential services, are also included. All aspects of business operations are covered in ***Residential Care Services for the Elderly***, including sources of funding and potential incomes; emotional and financial cost/benefit factors; parameters of organizing the business including personnel, respite care workers, need for registered nurses, and food service; special needs of clients; details of financial plans with outlines and sample forms; and variables of success and failure. Graduate and undergraduate students taking classes in regard to gerontological business and long-term care related alternatives will also find this statistic-filled handbook a useful reference.

Caring for the Elderly and Those with Dementia May 31 2022 With over 10 years' experience working as a carer for elderly people, B. Mack decided to write this book to share her knowledge. She has cared mainly for elderly people who were diagnosed with dementia. This book contains useful information that will help families, friends and caregivers to deal with their loved ones who may be going through various stages of dementia, from early stages to end stage dementia. With the help of this book you can set up a good environment for them, communicate effectively with them, learn their behavioural patterns, help navigate through changes in appetite and cope with behavioural changes. The useful tips and tried methods will help equip you when faced with challenging times like end-of-life care, dealing with abuse and so much more. For those who are torn between nursing homes, rest homes or in-home care, there are some advantages and disadvantages listed that you need to take into consideration to help you make informed decisions. The coping methods suggested here come from the author's own experience. Now they might be helpful to someone else too.

Psychological Therapies for the Elderly Mar 05 2020 Prior to publication, it had only recently been appreciated that psychology had a great deal to offer in therapeutic terms to a wide range of patients, and was not merely concerned with assessing and identifying problems. This is particularly so with the elderly where physical and mental problems and multiple pathology are compounded, and where psychological aspects of the quality of life are so important. The focus of this book, originally published in 1986, is on therapeutic approaches and the effective implementation of services. While the book is aimed particularly at clinical psychologists, it will also

be of great interest to medical, nursing or occupational therapy staff working with elderly people.

Delirium in Elderly Patients Jun 27 2019 This book provides a comprehensive, scholarly, and practical account of delirium that will be of value for all doctors and nurses involved in the care of the elderly. It not only offers a state of the art update on delirium, covering its history, epidemiology, pathophysiology, assessment, diagnosis, causes, prevention, and management, but also presents evidence-based and practical information relevant to daily clinical routine. Owing to the complex multifactorial causes of delirium, different aspects of delirium in the elderly are discussed from a variety of perspectives. The book closes by presenting a series of case vignettes, delirium assessment tools and screening scales, and a list of those drugs highly associated with delirium. Delirium is a cognitive disorder characterized by deficits in attention, arousal, consciousness, memory, orientation, perception, speech, and language. It is a common and serious problem among older persons at every healthcare interface. Although it occurs in 10–60% of the older hospitalized population, delirium remains a relatively misunderstood and misdiagnosed condition. This book will be of interest to professionals working in geriatrics, geriatric psychiatry, general psychiatry, or neurology, internists, intensive care unit specialists, and all who care for the elderly in hospitals or the community.

Ethics and the Elderly Sep 22 2021

The Built Environment for the Elderly and the Handicapped Apr 05 2020

Rehabilitation Medicine for Elderly Patients Apr 17 2021 This book clearly explains when and how different rehabilitation techniques should be applied in the aging patient, thereby enabling readers to identify and apply those rehabilitation strategies that will maximize quality of life and functional independence in individual cases. It is specifically designed for ease of consultation and rapid retrieval of the information most relevant to clinical practice. Prominence is given to the benefits of a multidisciplinary approach to rehabilitation, with discussion of a very wide range of aspects of rehabilitation in different disease settings. The breadth of coverage is illustrated by the attention paid to less commonly addressed topics such as visual and hearing rehabilitation, the role of robotics and 3D imaging techniques, variations in approach among health care systems, and rehabilitation in end-of-life care. The authors are international academic experts in their fields, guaranteeing a high scientific standard throughout. This manual will be an invaluable tool and source of knowledge for geriatricians and physiatrists but will also appeal to a wider range of clinicians, practitioners, and students.

Anemia in the Elderly Dec 02 2019 Anemia in the elderly has been properly defined as the silent epidemic, representing 3 million people in the United States aged 65 years and older. Incidence and prevalence of this condition increase with age. It differs in its etiology, pathogenesis and treatment from anemia in children and younger adults. Anemia is associated with reduced survival, increased risk of functional dependence and hospitalization, increased risk of congestive heart failure and stage renal disease and cognitive disorders. Approximately 70% of anemia in older individuals is reversible.

Long-Term Care for the Elderly in Europe Jul 01 2022 Long-term care is an increasingly important issue in many contemporary welfare states around the globe given ageing populations. This ground-breaking book provides detailed case studies of 11 EU-member states' welfare regimes within Europe to show how welfare states organize, structures and deliver long-term care and whether there is a social investment perspective in the delivery of long-term care. This perspective is important because the effect of demographic transitions is often used as an argument for the existence of economic pressure on welfare states and a need for either direct retrenchment or attempts to reduce welfare state spending. The book's chapters will look specifically into how different welfare states have focussed on long-term care in recent years and what type of changes have taken place with regard to ageing populations and ambitions to curb increases in public sector spending in this area. They describe the development in long-term care for the elderly after the financial crisis and also discuss the boundaries between state and civil society in the different welfare states' approaches to the delivery of care.

Respect for the Elderly May 07 2020 This book is concerned with the fundamental issues of elder respect, how it is practiced and perceived in the broad context of human service settings, and with the resolution of those issues. The writings presented in this book describe the role of elder respect in health, social work, religious, and cultural and ethnic settings. The authors aim for elder respect to be better understood by professionals in human services as well as by those people who care for elderly relatives in the East and the West. Book jacket.

Optimizing Housing for the Elderly Jul 09 2020 Discover the diverse range of housing options available to the elderly population with this excellent new book. This timely volume addresses the public policy and design and development issues that must necessarily face those concerned with housing our steadily growing elderly population. The chapters cover a broad spectrum of populations including elderly people in "aging ghettos" in suburbia, continuing care retirement community residents, full-time recreational vehicle travelers, and the homeless elderly. The authoritative contributors go beyond descriptions of wide-ranging elderly housing options and delve into the central themes that influence them all. *Optimizing Housing for the Elderly* explores some common considerations such as personal security, food and medical services, independence, and social interaction, that are important determining factors when selecting a style of housing, and addresses economic questions including advice on reducing costs in popular continuing care retirement communities, currently inaccessible to lower-income elderly people. Professionals involved in any aspect of housing for the elderly will benefit from the information in this insightful book.

A Resource Guide for Mental Health and Support Services for the Elderly Oct 12 2020

Improving Oral Health for the Elderly Nov 05 2022 This excellent new work confronts two important oral health policy concerns in the United States: the disparities in the oral disease burden and the inability of certain segments of the population to access oral health care. The book examines in depth this crucial yet frequently overlooked indicator of seniors' quality of life. It provides an invaluable set of recommendations to the clinical, research, and administrative communities that will serve the elderly population.

Camberwell Assessment of Need for the Elderly Aug 02 2022 Fully updated, the CANE is the recommended tool

for assessing the mental health needs of older people.

Legal and Healthcare Ethics for the Elderly Jan 03 2020 First Published in 1996. Routledge is an imprint of Taylor & Francis, an informa company.

Who Should Care for the Elderly? Apr 29 2022 This book comprises a collection of refereed and edited papers that originated from an invited conference on East-West values in elderly care held in Hong Kong in 1996. Organized under Western or Eastern perspectives, the contributions reflect the belief that knowledge in the care-giving field has reached a point where comparisons can shed useful insights into not only the differences between cultures but also between the perspectives of the scholars.

Housing for the Elderly Feb 25 2022 Find out how housing options for the elderly are changing—and not always for the better To maintain or improve their quality of life, many seniors in the United States will move to new locations and into new types of housing. *Housing for the Elderly* addresses the key aspects of the transitions they'll face, examines how housing programs can help, and looks at the role social workers can play to ensure they remain healthy, happy, and productive as they age. *Housing for the Elderly* provides the tools to build a comprehensive understanding of how housing is changing to support the growing number of elderly persons in the United States. This unique resource examines a full range of housing options, including assisted-living communities, elder friendly communities, and homelessness; looks at the effects of the Olmstead Decision of 1999, which requires states to place persons with disabilities in community settings rather than in institutions; and summarizes current research on Naturally Occurring Retirement Communities (NORCs). The book also presents a historical perspective of housing issues for the elderly, with a special focus on the discrimination of African-Americans. Topics in *Housing for the Elderly* include: creating elder friendly communities homelessness among the elderly in Toronto housing disparities for older Puerto Ricans in the United States grandparent caregiver housing programs how the Olmstead Decision affects the elderly, social workers, and health care providers New York State's experience with NORCs relocation concerns of people living in NORCs the integration of services for the elderly into housing settings-particularly low-income housing moving from a nursing home to an assisted-living facility assisted-living and Medicaid and much more! *Housing for the Elderly* is an essential resource for social work practitioners, administrators, researchers, and academics who deal with the elderly.

Information and Referral Services for the Elderly Sep 10 2020

Well-being for the Elderly Oct 24 2021

Health Promotion for the Elderly Sep 30 2019 Providing a foundation for understanding the requirements and goals for health promotion in the elderly, this book provides an overview of health promotion needs and objectives for aging populations.

Aiding and Aging Dec 14 2020 Citizens of all societies age both as biological beings and as members of households in the open community. Through joining a series of essays and survey analyses, Mogeys has constructed a book that examines the way aging affects those who are growing older as well as the institutions of their society. To study the relationships between aiding the elderly and the aging process, two very different societies--the United States and Hungary--were chosen for comparison. Throughout the book, the focus remains on the need to encourage the persistence of the kinship system, and the necessity of public programs to actively support the maintenance of households.

Families Caring for an Aging America Jan 27 2022 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

Health Issues and Care System for the Elderly May 19 2021 This book sheds new light on health issues that concern both aging patients and their caregivers, and provides practical and in-depth insights. The respective chapters address various topics including locomotive organ disease, cardiovascular disease, diabetes mellitus, chronic kidney disease and more. Japan is currently experiencing a massive growth in its elderly population, and at a speed unmatched elsewhere in the world. As such, this edited volume offers a valuable guide for countries that are likely to experience an increase in their elderly population, especially with regard to the epidemiological findings and cohort studies in Japan that it presents. *Health Issues and Care System for the Elderly* offers a valuable resource for both new and established researchers, doctors, healthcare workers, and students who are seeking information on health problems involving the elderly in the field of public health and gerontology.

Alternative Medicine for the Elderly Jul 21 2021 This book on complementary alternative medicine (CAM) for the Elderly provides a critical and objective evaluation of alternative medical therapy for the elderly. The focus on practical aspects such as adverse effects and general risks of various therapeutic methods makes it a valuable reference book for the general practitioner, for geriatricians and professionals within the area of alternative medicine, but also for interested laypeople. In the three sections, Epidemiology, Types of CAM, and Common Medical Problems and CAM, a broad range of issues are covered. They range from drug compliance in elderly people to CAM in the treatment of specific conditions such as pulmonary diseases, arthritis or cancer. The above features and in particular the unbiased approach to discuss the pros and cons of CAM make this publication a must-have for everybody searching for detailed information on alternative medicine for the elderly.

Human Aspects of IT for the Aged Population. Design for the Elderly and Technology Acceptance Aug 29 2019 This two-volume set LNCS 11592 and 11593 constitutes the refereed proceedings of the 5th International Conference on Human Aspects of IT for the Aged Population, ITAP 2019, held in July 2019 as part of HCI International 2019 in Orlando, FL, USA. HCII 2019 received a total of 5029 submissions, of which 1275 papers and 209 posters were accepted for publication after a careful reviewing process. The 86 papers presented in these two volumes are organized in topical sections named: Design with and for the Elderly, Aging and Technology Acceptance, Aging and the User Experience, Elderly-Specific Web Design, Aging and Social Media, Games and Exergames for the Elderly, Ambient Assisted Living, Aging, Motion, Cognition, Emotion and Learning.

International Perspectives on State and Family Support for the Elderly Dec 26 2021 Within the context of long-range planning, this book examines the changing responsibilities of the state and family toward elders in different societies around the world. *International Perspectives on State and Family Support for the Elderly* presents a fresh range of lucid analyses of family caregiving policy from Canada, the United States, Sweden, the United Kingdom, Hong Kong, Austria, Denmark, Israel, and the People's Republic of China. Different institutional structures, levels of economic development, and cultural values, among other factors, impact policy development in various countries. With the information examined in this book, readers can gain an understanding of elder care in other societies, which can help them in developing policies for their own countries. Authors of *International Perspectives on State and Family Support for the Elderly* address questions such as: Who is responsible for caring for the aged? What are the policy issues that determine how such care is handled in various countries? Are the underlying principles upon which policy is based changing? Who pays for the care of the aged? What is the balance of the roles of government, family, and community? Along with these questions, authors discuss: the importance of family care the well-being, payment, and rights of informal caregivers providing services for informal caregivers shifting the burden of care from formal organizations to families the effects of governmental frameworks on caregiving the impact of the political agenda on caregiving caregiving and the welfare state *International Perspectives on State and Family Support for the Elderly* contains information for all professionals interested or involved in developing policy for the elderly. Demographers, sociologists, social workers, health care and public health professionals, gerontologists, and advanced students in these fields will find this book a helpful guide in their studies.

A Loving Voice Nov 12 2020 Presents a collection of 52 stories and poems that adult day care workers can read aloud to elderly patients.

Who Cares for the Elderly? Mar 17 2021 Although caregiving is predominantly women's work, care for the elderly is largely absent from the feminist agenda in this country. Emily K. Abel presents a compelling and sensitive report that describes the experience of caregiving from the perspective of adult daughters. She places their stories in the context of an analysis of existing policies and services for the elderly and traces the history of family caregiving in the U.S. since 1800. Through in-depth, open-ended interviews with 51 women who were caring for one or both parents, Abel explores how caregivers themselves understand their endeavors. Poignant excerpts from these interviews reveal the overwhelming sense of responsibility that these women feel for their parents' lives, how they protect their parents' dignity, and the isolation and lack of support that is faced in these homecare situations. While policy analysts speak of "filial responsibility," Abel allows the adult daughters to interpret its meaning in heart-rending detail. In her examination of how public policies affect the nature of caregiving at home, Abel argues that the amount of care women deliver to elderly relatives is determined not only by demographic trends but by the inadequacies of the long-term care system in the U.S. Author note: Emily K. Abel is Adjunct Associate Professor in the School of Public Health at the University of California, Los Angeles. She has published several books and is co-editor (with Margaret K. Nelson) of *Circles of Care: Work and Identity in Women's Lives*.

Employment Services for the Elderly Oct 31 2019

The Growing Need for Home Health Care for the Elderly Feb 13 2021 The document reviews the requirements for providing home health care services in terms of the kind of services required, who can provide the services, and eligibility for receiving the services, as well as the benefits and cost-effectiveness of home health care, patient satisfaction, quality assurance and patient safety in providing the services in home settings, establishing an effective referral system, and experiences from other Regions.

Elderly People and the Environment Jul 29 2019 The present volume in our series follows the format of the immediately in dealing with a topical theme of considerable importance preceding ones in the environment and behavior field. In view of current and projected demographic trends, it is a certainty that a broad-ranging set of issues concerned with the elderly and the physical environment will continue to be of focal pertinence if not of increasing importance--in the remaining decades of this century. The present volume also follows in the tradition of earlier volumes in the series in being eclectic with respect to content, theory, and methodology and in including contributions from a variety of disciplines, such as anthropology, economics, psychology, geography, and urban and regional planning. To have encompassed the whole array of disciplines and topics in this emerging field in a single volume would have been impossible. We trust that the sample of contributions that we have selected is provocative and that it will illustrate the range of problems and topics and point to promising areas of study and analysis. We are pleased to have M. Powell Lawton as a guest co-editor for this volume. His broad-ranging expertise, perceptive judgment, and fine editorial talents have contributed enormously to the volume.

Full Circle Feb 02 2020 When you read *Full Circle: Spiritual Therapy for the Elderly*, you'll discover a brand new therapeutic approach—spiritual therapy—to treating elderly patients with cognitive disorders. This handy guide will assist you in starting your own renowned spiritually therapeutic program for dementia patients. *Full Circle* is a how-to book that will prove you can trigger emotional responses in an individual or group therapy session using the right spiritual cues. In the first ten pages of *Full Circle*, you'll learn about the Spiritual

Therapy Program and find the answers to general questions about how and where to establish the program. The remainder of Full Circle contains 80 thematic lesson plans for use in both group and individual sessions. The lessons are flexible and organized into lists to help you formulate the right agenda for individual dementia patients. Full Circle divides 70 themes into these easily accessible categories: Feelings: depression, anger, and shame Life Review: aging, children, and change Sensory: hearing, smell, and touch Special Occasions: Easter, Thanksgiving, and memories of Christmas Spiritual: forgiveness, heaven, and peace In addition, Full Circle has expanded units for higher-achieving seniors. You may also want to use the special notes, poetry, and quotations that are pinpointed within the appropriate specific theme for even more startling results. Full Circle's sophisticated approach to therapy will help you cater to the needs of the cognitively impaired elderly to trigger emotional responses and enhance overall quality of life.

Drugs for the Elderly Aug 22 2021 The purpose of this monograph is to describe the principles of drug treatment in old age and the best therapeutic practice for the elderly. The present text is based on those drugs likely to be available in most countries, and thus of universal relevance. The WHO Model List of Essential Drugs have been given some preference over others.

Development of Medical Garments and Apparel for the Elderly and the Disabled Jan 15 2021 Although the main theme of this book is products for the elderly and the disabled, it also contains major sections on medical garments, which include personal protective equipment (PPE), hip protectors (HP), pressure garments (PG), compression stockings (CS), wet dressings, products for wound dressing, adult incontinence products, sanitary napkins, disposable diapers, vital signs monitoring garments, motion aware clothing, wearable sensors and smart diapers and so on. The development of apparel for the elderly and the disabled is a challenge for the healthcare and clothing industries. The developed apparel products are not only based on various design, fashion and comfort concepts but also considered in terms of particular medical problems, restorative care functions, and appropriate solutions for healthcare purposes.

Fractures in the Elderly Mar 29 2022 Fractures in the Elderly: A Guide to Practical Management provides geriatricians and other medical specialists who provide care for older adults with the vital guidance and most current data and opinions regarding the treatment of elderly patients who sustain a variety of fractures. It also provides orthopedic surgeons with the necessary information and most current data and opinions regarding assessment and management of geriatric conditions that predispose the elderly to fracture, perioperative complications and subsequent functional decline. Each chapter is both readable and appealing not only to geriatricians and orthopedic surgeons but to all clinicians that have contact with elderly patients who have sustained or are at high risk of sustaining a fracture. Emphasis is placed on the fact that although in some cases pre- and post-operative care in elderly fracture patient may proceed as it does in younger individuals, often there are considerations owing to functional status, pre-existing conditions, and age-related physiological declines that require specialized knowledge and alternative approaches. Developed by a group of renowned experts, Fractures in the Elderly: A Guide to Practical Management is a major addition to the literature and provides a wealth of specialized knowledge and approaches to care. It is an essential reference for all clinicians who care for older adults as well as fellows and residents in training.

Education for the Elderly in the Asia Pacific Oct 04 2022 In many countries across the Asia Pacific region, people are adapting to the new demographic shift, but there is nonetheless much concern. This book documents the various educational approaches rendered by both public and private sectors to enable elderly individuals in their own countries to re-engage in society more inclusively, to stay longer in the labour market, and to become less dependent on the state or their families. In order to produce active, healthy, and productive aging citizens, the experiments showcased by this book highlight how adaptive action is needed across many policy areas, with emphasis on shaping structural differences in the composition and organisation of higher education systems that can better foster lifelong learning among elderly citizens. The book is a great venue to underline the interplay of the theory and practices of vastly complex challenges.

Site Planning and Design for the Elderly Nov 24 2021 Design for the elderly is at the forefront of architectural topics today. Yet, while much has been written about the design of indoor spaces, little work has been done on planning outdoor spaces to accommodate the needs of the elderly. Site Planning and Design for the Elderly specifically addresses this issue, drawing from a large body of original research, current knowledge, and theory to provide the background knowledge and specific information necessary for informed decision making throughout the site planning and design process. More than just a reference on accessibility standards, this volume offers key insights into the needs and concerns of older people in the built environment and presents guidelines and alternatives for responsive site planning and design. Organized in a clear step-by-step format for easy reference, issues and specific guidelines are provided for each stage of the planning and design process within the context of housing for older people. Moreover, architects, landscape architects, urban designers, developers and students will find the topics covered applicable to other settings where older people are a part of the user profile, such as downtown renewal, hospital, and park planning projects. Numerous illustrations and case studies highlight major points throughout the text. The first sections of this volume provide valuable background information on housing options available to seniors and outline design implications of the social and physiological changes associated with advancing age. Critical design and management issues are discussed, objectives are outlined, and implementation strategies are developed, including methods for promoting wayfinding, enhancing personalization, and maximizing opportunities for social interaction. The body of this volume provides specific guidelines for each stage of development. Site planning areas addressed include site selection, the layout of housing units (including relationships between facilities offering different levels of care), recreational amenities, and circulation systems. Detailed guidelines for the location, spatial configuration, detailing, and amenities of major site components and recreational facilities are also provided. Entryways, parking, patios, rooftop developments, and gardening centers are among the specific areas covered. A brief outline of the major issues affecting use of each site component is

particularly useful for making decisions regarding facility provision and for prioritizing development alternatives. Critical detailing and amenity specifications are pinpointed and thoroughly described. Paving materials, signage, lighting, site furniture, and pedestrian street crossings are among those elements examined. A concise overview in tabular form of the major guidelines presented throughout closes this practical volume. It is possible to design a site that will not only enhance the lives of elderly residents, but will be cost-effective and highly marketable as well. Site Planning and Design for the Elderly provides practical solutions to the problems of exterior design for one of the fastest-growing segments of the U.S. population today.

Encyclopedia of Home Care for the Elderly Jun 07 2020 "This comprehensive compendium will serve as a good resource for practitioners in the fields of medicine, nursing, rehabilitation, occupational therapy, physical therapy, and social work. Healthcare providers, family members, and faculty and students in the field of gerontology will also find it useful." Library Journal
